QUESTION 1

You need to recommend a solution to meet the high-availability requirements for VMM 2012. What should you include in the recommendation?

- A. Install Network Load Balancing (NLB) on Servers.
- B. Split the VMM roles between separate servers.
- C. Store all of the VMM templates in a Distributed File System (DFS) namespace.
- D. Install Failover Clustering and Network Load Balancing (NLB) on Server1.

Correct Answer: B

QUESTION 2

You have a System Center 2012 Service Manager infrastructure that contains a single server named SCSM1.

You plan to use a new account named Account1 as the Operational Database Account.

You plan to configure SCSM1 to use Account1 as the logon account for the System Center Data Access Service.

You need to identify which roles must be assigned to Account1.

Which two roles should you identify? (Each correct answer presents part of the solution. Choose two.)

- A. the Service Manager Administrators User Role Profile
- B. the Microsoft SQL Server db_ddladmin fixed database role
- C. the Service Manager Workflows User Role Profile
- D. the Service Manager Advanced Operators User Role Profile
- E. the Microsoft SQL Server configsvc_users database role
- F. the Microsoft SQL Server sdk_users database role

Correct Answer: AF

<http://technet.microsoft.com/en-us/library/hh495527.aspx> suggests that A, E and F are required (Service Manager Administrators User Role Profile, configsvc_users database role and sdk_users database role) but the question is asking for

just two answers.

<http://technet.microsoft.com/en-us/library/hh495527.aspx> doesn't mention the configsvc_users database role as below so the answer is A and F.

System Center Configuration service and System Center Data Access service account:

This account is one set of credentials that is used to update and read information in the operational database.

Operations Manager ensures that the credentials used for the System Center Data Access service and System Center Configuration service account are assigned to the sdk_user role in the operational database.

QUESTION 3

You are implementing System Center 2012 R2.

You have four servers named Server1, Server2, Server3, and Server4 that run Windows Server 2012 R2. You install Operations Manager on Server1 and Data Protection Manager (DPM) on Server2.

You need to install the following System Center components:

A Service Manager data warehouse server

A Service Manager management server

Virtual Machine Manager (VMM)

App Controller

On which servers should you install each System Center component? To answer, select the appropriate component for each server in the answer area.

Answer Area

| | |
|----------|----------------------|
| Server1: | <input type="text"/> |
| Server2: | <input type="text"/> |
| Server3: | <input type="text"/> |
| Server4: | <input type="text"/> |

Hot Area:

Answer Area

Server1:
Service Manager data warehouse server
Service Manager management server
VMM

Server2:
App Controller
Service Manager data warehouse server
Service Manager management server

Server3:
App Controller
Service Manager data warehouse server
VMM

Server4:
App Controller
Service Manager management server
VMM

Correct Answer:

Answer Area

Server1:
Service Manager data warehouse server
Service Manager management server
VMM

Server2:
App Controller
Service Manager data warehouse server
Service Manager management server

Server3:
App Controller
Service Manager data warehouse server
VMM

Server4:
App Controller
Service Manager management server
VMM

Some of the System Center 2012 R2 components will not function properly if other components have been installed on the same computer. None of the following four components can exist on the same computer with each other: DPM Management Server Operations Manager Management Server Service Manager Management Server Service Manager Data Warehouse Management Server Any of the remaining System Center 2012 components, App Controller, Orchestrator, and VMM can coexist with each other and with the four components in the previous list. Therefore, four computers is the minimum number of computers that you will need to deploy all of the System Center 2012 R2 components. Ref: <http://technet.microsoft.com/en-us/library/dn281928.aspx>

QUESTION 4

You need to recommend a solution to meet the technical requirements for the web tier of Appl.

What should you include in the recommendation? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Network Load Balancing (NLB)
- B. Failover Clustering
- C. Multipath I/O (MPIO)
- D. DNS round robin

Correct Answer: A

Network Load Balancing (NLB) provides scalability and at the same time helps increase availability of Web-based services <http://technet.microsoft.com/en-us/library/cc725946.aspx>

QUESTION 5

You plan to deploy a System Center 2012 infrastructure.

You plan to create and deploy a service named Service1.

You need to recommend a solution to deploy Service1 to a private cloud and a Windows Azure subscription.

What should you include in the recommendation?

- A. System Center 2012 Service Manager
- B. System Center 2012 Virtual Machine Manager (VMM)
- C. The Virtual Machine Manager Self-Service Portal (VMMSSP) 2.0
- D. System Center 2012 App Controller

Correct Answer: D
