QUESTION 1

Services domain uses Windows 2003 native mode. The company acquires a new division and plans to synchronize the additional forest with Office 365.

You perform the initial configuration steps for the solution by using the DirSync tool.

You need to perform a multi-forest Active Directory sync.

Which three actions can you perform? Each correct answer presents a complete solution.

- A. Install DirSync on a server that runs Forefront Identity Manager 2010 R2. Use DirSync for the multi-forest synchronization.
- B. Install Azure Active Directory Synchronization Services on a separate server from the server that runs DirSync and Forefront Identity Manager server.
- C. Install and configure Forefront Identity Manager 2010 R2.
- D. Uninstall any instances of Azure Active Directory Synchronization Services or Forefront Identity Management 2010 R2, and then install and use DirSync for the multi-forest synchronization.
- E. Uninstall DirSync and then install Azure Active Directory Synchronization Services (AAD Sync). Use AAD Sync for the multi-forest synchronization.
- F. Install Azure Active Directory Synchronization Services on the same server that hosts DirSync. Use DirSync to configure multi-forest on-premises SharePoint environments

Correct Answer: BCF

QUESTION 2

A company is planning to deploy My Sites to its 25,000 employees. The company will maintain dedicated content databases for the storage of personal site collections.

You need to create the minimum number of content databases required to support the My Sites.

What should you do?

- A. Create three content databases. Set the value of the WarningSiteCount property of each content database to 10,000.
- B. Create one content database. Set the value of the WarningSiteCount property of the content database to 25,000.
- C. Create one content database. Set the value of the MaxSiteCount property of the content database to 25,000.
- D. Create three content databases. Set the value of the MaxSiteCount property of each content database to 10,000.
- E. Create five content databases. Set the value of the WarningSiteCount property of each content database to 5,000.
- F. Create five content databases. Set the value of the MaxSiteCount property of each content database to 5,000.

Correct Answer: D

QUESTION 3

You have a SharePoint Server 2013 server farm.

You have a web application named Web1 that contains three site collections named Site1, Site2, and Site3.

Site3 contains several content types. Site3 has the Content Type Syndication hub feature enabled.

You create a Managed Metadata Service application named MMS1.

You need to ensure that users can use the content types from Site3 in Site1 and Site2.

Which three actions should you perform in sequence? (To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Configure a proxy connection for MMS1.	
Publish the content types.	
Activate the Cross-Site Collection Publishing feature in Site3.	
Activate the Content Type Syndication feature in Site1 and Site2.	
Configure the properties of MMS1.	
Publish the Managed Metadata Service application.	

Correct Answer:

Actions	Answer Area
Configure a proxy connection for MMS1.	Activate the Content Type Syndication feature in Site1 and Site2.
Activate the Cross-Site Collection Publishing feature in Site3.	Publish the Managed Metadata Service application.
Configure the properties of MMS1.	Publish the content types.

QUESTION 4

You need to configure the SharePoint environment for App1.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

	Answer Area
From the fabrikam.com SharePoint environment, create a trusted root authority.	
From the adatum.com SharePoint environment, create an identity provider.	
From the fabrikam.com SharePoint environment, export the security token certificate.	
From the adatum.com SharePoint environment, export the security token certificate.	
From the adatum.com SharePoint environment, create a trusted root authority.	
From the fabrikam.com SharePoint environment, create an identity provider.	

Correct Answer:

Answer Area	
From the fabrikam.com SharePoint environment, create a trusted root authority.	From the adatum.com SharePoint environment, create a trusted root authority.
From the adatum.com SharePoint environment, create an identity provider.	From the fabrikam.com SharePoint environment, create an identity provider.
	From the fabrikam.com SharePoint environment, export the security token certificate.
From the adatum.com SharePoint environment, export the security token certificate.	

Box 1: From the adatum.com SharePoint environment, create a trusted root authority.

Box 2: From the fabrikam.com SharePoint environment, create an identity provider.

Box 3: From the fabrikam.com SharePoint Environment, export the security token certificate.

Note:

* From scenario:

/ Fabrikam has an AD DS domain named fabrikam.com

/ Fabrikam users must be able to directly access internal SharePoint resources in the adatum.com domain.

/ Datum users must not be able to access resources in the fabrikam.com domain.

* Add Certificate to the SharePoint Trusted Root Certificate Authority Step 1: Export the Security Certificate

Here from Fabrikam.

Step 2: Import the Security Certificate into SharePoint Trusted Root Certificate authority Here in Adatum.com

Reference: Add Certificate to the SharePoint Trusted Root Certificate Authority

QUESTION 5

You need to choose the Performance Monitor counter to use to meet the new monitoring requirements for the production environment. Which performance counter should you use? (To answer, select the appropriate counter in the answer area.)

Hot Area:

SharePoint Publishing Cache

Publishing cache flushes / second
Publishing cache hit count
Publishing cache hit ratio
Publishing cache hits / sec
Publishing cache miss count
Publishing cache misses / sec
Total number of cache compactions

Correct Answer:

SharePoint Publishing Cache

Publishing cache flushes / second
Publishing cache hit count
Publishing cache hit ratio
Publishing cache hits / sec
Publishing cache miss count
Publishing cache misses / sec
Total number of cache compactions

* From Scenario:

Monitor whether a large number of documents are checked out. Monitor whether a large number of unpublished items are being requested.

Publishing cache hit ratio

A low ratio can indicate that unpublished items are being requested, and these cannot be cached. If this is a portal site, the site might be set to require check-out,

or many users have items checked out.
