QUESTION 1

You are configuring permission levels for two user groups named Architects and Sales.

You have the following requirements for SharePoint site permissions:

Architects must be able to view website usage reports.

Sales must be able to edit documents online.

You need to configure the appropriate permission levels for each group.

Which permission levels should you assign? (To answer, drag the appropriate permission levels to the correct group or groups in the answer area. Each permission level may be used once, more than once, or not at all. You may need to drag

the split bar between panes or scroll to view content.)

Select and Place:

Answer Area	
Group	Permission level
Managers	
Editors	

Apply Style Sheets

Manage Lists

Manage Web Site

Use Client Integration Features

View Web Analytics Data

Correct Answer:

Answer Area	
Group	Permission level
Managers	View Web Analytics Data
Editors	Use Client Integration Features

Apply Style Sheets

Manage Lists

Manage Web Site

Note:

* After the Web Analytics service application is configured, the View Web Analytics Data permission needs to be created for users that are not a site collection administrator or site owner. This is the minimum required permission needed to view Web Analytics reports.

* Use Client Integration Features Use features that start client applications. Without this permission, users must work on documents locally and then upload their changes. Reference: Create and configure the View Web Analytics Data permission

QUESTION 2

Contoso, Ltd., has an on-premises SharePoint 2013 implementation. It plans to migrate the sales department to SharePoint Online. Additional departments will be migrated in the future.

The sales department currently has a dedicated site collection for collaboration and document sharing.

The sales department site collection uses the managed path <https://sales.contoso.com>. Contoso's SharePoint Online environment is accessible by using the URL <https://contoso.sharepoint.com>.

Sales team employees must be able to connect to SharePoint Online by using a simple managed path.

You need to configure SharePoint Online.

Which managed path should you use?

- A. <https://sales.contoso.com>
- B. <https://contoso-my.sharepoint.com>
- C. <https://contoso.sharepoint.com/sites/sales/>
- D. <https://teams.contoso.com/sites/sales/>

Correct Answer: C

Define managed paths in SharePoint Server 2013 An explicitly named path (for example, <http://server/sites/team>) is used for a single site collection. In this case the managed path would be <https://contoso.sharepoint.com/sites/sales/> as SharePoint online uses <https://contoso.sharepoint.com> and we want to provide a managed path for the Sales department's site collection.

QUESTION 3

Contoso. Ltd., has a public-facing SharePoint site collection. The default site page contains a list that displays the most popular music tracks played on the site. The sitemap file for the site resides at <http://www.contoso.com/sitemap.xml>.

Users search for the most popular music tracks by using an external search engine.

Users observe that the external search engine results contain hundreds of links to the default site page.

You need to exclude the site from being crawled by any external search engines.

What should you do?

- A. On the default site page, create a search engine optimization (SEO) meta tag to exclude the page from search engines.
- B. On the Search engine optimization setting page, enable the Do not filter link parameter checkbox.
- C. On the search engine sitemap settings page, enter the following internet search engine exclusion:
`http://www.contoso.com/sitemap.xml`
- D. Create a robots.txt file at `http://www.contoso.com/robot.txt` in the file, include the following values: User-agent: *Disallow: /.

Correct Answer: C

QUESTION 4

A company deploys Enterprise Search for SharePoint Server 2013.

Some crawls of result sources fail to complete.

You need to examine detailed information about crawl rate, crawl latency, crawl freshness, content processing, CPU and memory load, continuous crawls, and the crawl queue to determine how you should alter crawling.

What should you review?

- A. Microsoft Search Server performance counters
- B. The crawl log
- C. Crawl-health reports
- D. Unified Logging Service (ULS) logs

Correct Answer: C

Crawl-health reports provide detailed information about crawl rate, crawl latency, crawl freshness, content processing, CPU and memory load, continuous crawls, and the crawl queue.

Incorrect answers:

Not A: Microsoft Search Server performance counters would not provide any crawl data. Not B: The crawl log would not provide such detailed information. The crawl log tracks information about the status of crawled content. The log includes

views for content sources, hosts, errors, databases, URLs, and history.

Not D: ULS logs would not provide any crawl data.

QUESTION 5

You are managing web applications on a SharePoint site.

You need to begin configuring anonymous access for a SharePoint web application.

Which command should you select? (To answer, select the appropriate command in the answer area.)

Hot Area:

Correct Answer:

Note: anonymous access is a security setting.
