QUESTION 1

You are planning the search components for a SharePoint Server 2013 server farm. You have a content source named CS1 that contains all of the local SharePoint content.

You upload a display template named DT1.

You need to configure searches to meet the following requirements:

If a user types a search query that contains the word **sliddeck**, the search results must include only files that have either the .ppt file extension or the .pptx file extension.

The local SharePoint content must be indexed one document at a time.

DT1 must be used to display results that have the .mp4 file extension.

Which components should you use to achieve each requirement? (To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Components	Answer Area
authoritative pages	If a user types a search query that contains the word sliddeck , the search results must include only files that have either the .ppt file extension or the .pptx file extension. <input type="text" value="Component"/>
crawler impact rules	The local SharePoint content must be indexed one document at a time. <input type="text" value="Component"/>
query rules	DT1 must be used to display results that have the .mp4 file extension. <input type="text" value="Component"/>
result sources	
result types	

Correct Answer:

Components

authoritative pages

result sources

Answer Area

If a user types a search query that contains the word slidedeck, the search results must include only files that have either the .ppt file extension or the .pptx file extension.

The local SharePoint content must be indexed one document at a time.

DN must be used to display results that have the .mp4 file extension.

query rules

crawler impact rules

result types

Note:

*query rules

Without any custom code, you can help searches respond to the intent of your users by creating query rules. In a query rule, you specify conditions and correlated actions. When a query meets the conditions, the search system performs the

actions to improve the relevance of the search results.

* crawler impact rule Applies To: Office SharePoint Server 2007 A crawler impact rule defines the rate at which the Windows SharePoint Services Help Search service requests documents from a Web site during crawling. The rate can be defined either as the number of simultaneous documents requested or as the delay between requests. You can use crawler impact rules to modify loads placed on sites when you crawl them.

* Result type To display search results differently, search results have to be sorted into different result types. A result type distinguishes one search result from another. For example, if a search result is found in a Microsoft Word

QUESTION 2

You have a SharePoint Server 2013 server farm.

You need to implement a site mailbox for a site.

Which link should you use from Site Contents? (To answer, select the appropriate link in the answer area.)

Hot Area:

Answer Area

Site Contents

Lists, Libraries, and other Apps

SITE WORKFLOWS SETTINGS RECYCLE BIN (0)

 add an app	 Content and Structure Reports 7 items Modified 5 days ago	 Documents 0 items Modified 5 days ago
 Form Templates 0 items Modified 5 days ago	 Home Slides 3 items Modified 4 days ago	 Images 43 items Modified 4 days ago
 Pages 2 items Modified 4 days ago	 Reusable Content 1 items Modified 5 days ago	 Site Assets 0 items Modified 4 days ago
 Site Collection Documents 0 items Modified 5 days ago	 Site Collection Images 12 items Modified 4 days ago	 Style Library 500 items Modified 4 days ago
 Workflow Tasks 0 items Modified 5 days ago		

Correct Answer:

Answer Area

Site Contents

Lists, Libraries, and other Apps

SITE WORKFLOWS SETTINGS RECYCLE BIN (0)

The screenshot displays the 'Site Contents' page in SharePoint. It features a grid of content libraries and apps. At the top left is a green 'add an app' button. Below it are several blue tiles representing different content types:

- Form Templates**: 0 items, Modified 5 days ago
- Pages**: 2 items, Modified 4 days ago
- Site Collection Documents**: 0 items, Modified 5 days ago
- Workflow Tasks**: 0 items, Modified 5 days ago
- Content and Structure Reports**: 7 items, Modified 5 days ago
- Home Slides**: 3 items, Modified 4 days ago
- Reusable Content Items**: Modified 5 days ago
- Site Collection Images**: 12 items, Modified 4 days ago
- Documents**: 0 items, Modified 5 days ago
- Images**: 43 items, Modified 4 days ago
- Site Assets**: 0 items, Modified 4 days ago
- Style Library**: 500 items, Modified 4 days ago

Note: Create the site mailbox When you've decided that it is beneficial to have a site mailbox, creating one is very straight- forward. Every time you create a new site in SharePoint 2013 you see the option in the "Get started with your site" menu to "Keep email in context". Clicking this tile installs the site mailbox app on your SharePoint team site. If you don't see this option on your site just click "Site Contents", and add the "Site Mailbox" app under the app listings.

QUESTION 3

You need to implement Office 365 authentication.

What should you do?

- A. Create an AD DS domain named proseware.com and join the AD FS servers to the proseware.com domain.
- B. Add a DNS CNAME record for www.proseware.com and point it to www.adatum.com.
- C. Deploy an AD FS proxy for the proseware.com domain.
- D. Add proseware.com as an Office 365 SSO domain and update all user principal names (UPNs) to also use proseware.com.

Correct Answer: D

QUESTION 4

You need to meet the Project2 monitoring requirements. What should you do?

- A. Create a user-defined data collector set.
- B. Monitor only startup event trace sessions.
- C. Monitor only event trace sessions.
- D. Use a system-defined data collector set.

Correct Answer: A

QUESTION 5

You are the SharePoint administrator for Contoso, Ltd. You plan to create a public website for Contoso's customers by using content that is created in SharePoint.

The public site will contain information that is created by internal users. Pages are created dynamically based on navigation.

You have the following requirements:

The marketing department is responsible for creating web page content and needs an approval workflow for any content generated before the content is made available to site visitors.

The sales department is responsible for creating a product catalog that includes information concerning products, such as properties, price, and delivery estimates.

The customer relationship department is responsible for ensuring that customer documentation is accessible for approved clients and vendors.

You need to design the environment.

location. Each site collection type or content type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

Site collection types

Publishing site collection

Authoring site collection

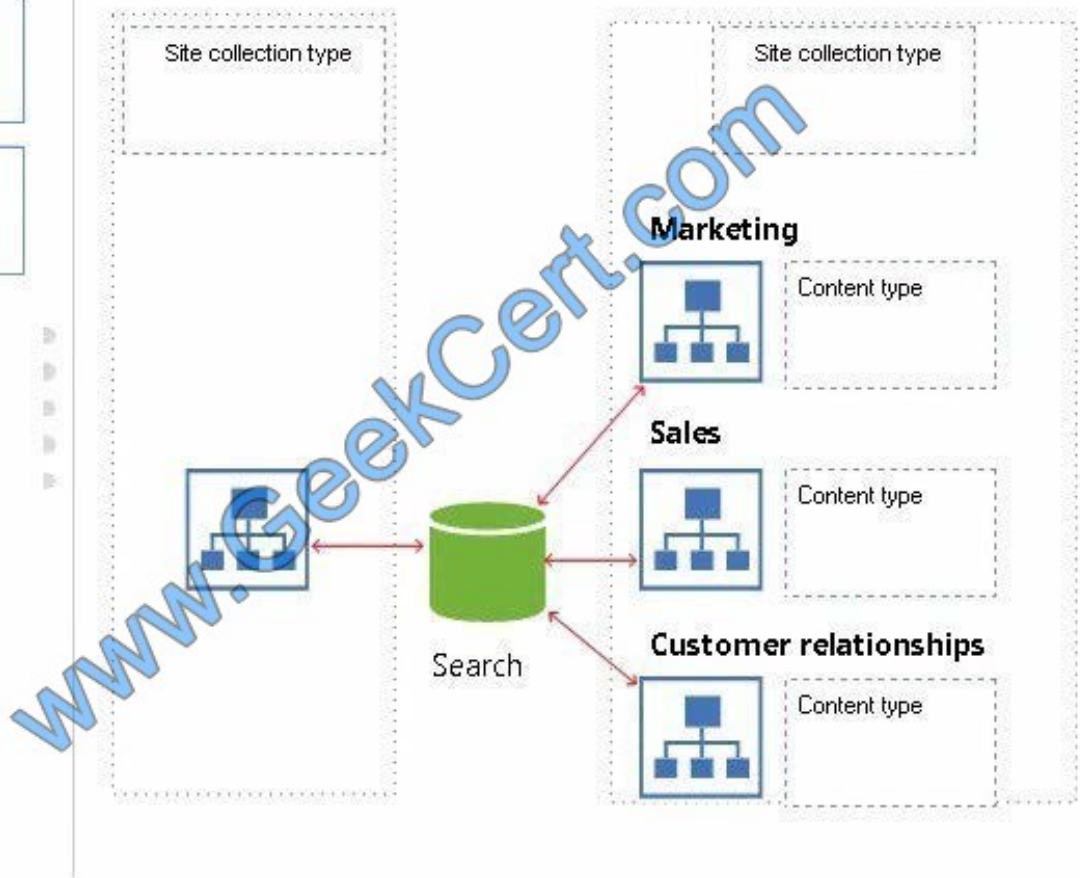

Content types

Pages library

List

Document library

Answer Area

Correct Answer:

Site collection types

Content types

Answer Area

Publishing site collection

Authoring site collection

Marketing

Pages library

Sales

Document library

Customer relationships

List

- * The Publishing site collection is on the perimeter network.
- * Marketing, Sales, and the Customer relationships department work on the Authoring site collection in the local network.
- * The Marketing department works with the Pages library as they are responsible for creating the web page content.
- * The Sales department works with the Document library as they work with a product catalog.
- * The customer relationship department makes sure clients and vendors get access so they work with lists.
