QUESTION 1

An organization has two SharePoint farms named FarmA and FarmB.

You need to grant a service account full control of the Managed Metadata service on Farm A.

In Central Administration, which command should you select to complete the configuration? (To answer, select the appropriate command in the answer area.)

Hot Area:

Correct Answer:

QUESTION 2

You need to resolve the SharePoint database error. What should you do?

- A. Add a new request URL mapping to the web application.
- B. Remove the orphaned objects from the database.
- C. Set the databases to read-write.
- D. Add the managed path for the site collection to the web application.

Correct Answer: D

QUESTION 3

An organization is deploying a SharePoint farm that will provide a records-management solution.

Users must be able to perform the following actions:

Create in-place holds on content stored in SharePoint and in Microsoft Exchange 2013.

Search for content and place holds based on the search query.

You need to create a site collection that meets the requirements.

Which type of site collection should you create? (To answer, select the appropriate template in the answer area.)

Hot Area:

Collaboration Enterprise Publishing Custom

| |
|------------------------------|
| Document Center |
| eDiscovery Center |
| Records Center |
| Business Intelligence Center |
| Enterprise Search Center |
| My Site Host |
| Community Portal |
| Basic Search Center |
| Visio Process Repository |

A site to centrally manage documents in your enterprise.

Correct Answer:

Collaboration Enterprise Publishing Custom

| |
|------------------------------|
| Document Center |
| eDiscovery Center |
| Records Center |
| Business Intelligence Center |
| Enterprise Search Center |
| My Site Host |
| Community Portal |
| Basic Search Center |
| Visio Process Repository |

A site to centrally manage documents in your enterprise.

QUESTION 4

A SharePoint 2010 farm contains four site collections. Each site collection has a separate content database. You plan to upgrade the farm to SharePoint 2013. You create a SharePoint 2013 test farm to test the upgrade process.

The upgrade of the content databases completes with errors.

You need to export a list of the upgrade error for each content database to a comma-separated values (.csv) file. You need to drag the Windows PowerShell segments to Answer area.

The screenshot shows a drag-and-drop interface. On the left, under 'Windows PowerShell segments', are: Get-SPWebApplication, ContentDatabases, \$WebApp.Sites.ContentDatabase, Upgrade-SPContentDatabase, Test-SPContentDatabase, and -WebApplication. On the right, the 'Answer Area' contains a PowerShell script. The script is: `Add-PSSnapin Microsoft.SharePoint.PowerShell -ErrorAction SilentlyContinue`, `Foreach-Object ($WebApp in) {`, `("Testing Web Application" + $WebApp.Name | Write-Host -ForegroundColor Green ;`, `Foreach-Object ($CDB in $WebApp.`, `{`, `Name $CDB.Name`, `WebApp.URL`, `-ServerInstance $CDB.Server | ConvertTo-Csv | Out-File -Encoding default`, `-FilePath $("C:\ + $CDB Name + ".csv")}}`. A watermark 'www.GeekCerts.com' is visible across the script.

Correct Answer:

This screenshot is identical to the previous one, but with the correct PowerShell segments highlighted in the 'Answer Area' script. The highlighted segments are: 'ContentDatabases' (for the first foreach loop), '\$WebApp.Sites.ContentDatabase' (for the second foreach loop), 'Test-SPContentDatabase' (for the inner foreach loop), and '-WebApplication' (for the inner foreach loop). A watermark 'www.GeekCerts.com' is visible across the script.

QUESTION 5

You are moving a customized SharePoint site collection to a new farm. You attach and mount the source content database in the destination farm.

You need to ensure that all customizations from the source farm are available in the destination farm.

What should you do?

- A. Install all custom applications in the destination farm.
- B. Configure alternate access mappings on the source server.
- C. Copy all search indexes from the source farm to the destination farm.

D. Copy all SharePoint groups and users from the source farm to the destination farm.

Correct Answer: A
