QUESTION 1

You are configuring a SharePoint farm.

You have the following requirements: Implement an enterprise resource pool.

Enable tasks to be assigned to users.

Implement a resource breakdown structure.

You need to implement a solution that meets the requirements. What should you do?

- A. Import a Microsoft Excel spreadsheet as a custom list.
- B. Provision a Microsoft Project web app.
- C. Create a SharePoint task list.
- D. Create a collaboration portal.

Correct Answer: B

QUESTION 2

You need to provision a SharePoint environment for MyTailspin.TailspinToys.com. What should you do?

- A. Create a web application and a site collection using the My Site Host template.
- B. Create a web application, a site collection using the My Site Host template, and site collections for each user.
- C. Configure the User Profile Synchronization service to perform a full import of AD DS user profiles.
- D. Configure the User Profile Synchronization service to set up a My Sites site collection.

Correct Answer: A

QUESTION 3

You have a SharePoint Server 2013 server farm. The farm contains the following servers:

Six front-end Web servers

Four application servers

Four databases servers

All of the databases in the farm are mirrored by using Microsoft SQL Server database mirroring.

The farm contains the following service applications:

PerformancePoint Service Application

Managed Metadata Service

The PerformancePoint Service Application is configured as shown in the PerformancePoint exhibit. (Click the Exhibit button.)

Edit PerformancePoint Service Application

Specify settings for this service application. You can change these settings later from the Manage Service Applications page.

Name:

Specify a name and default status for this service application.

The setting makes this service application available by default for web applications in this farm to use. Do not check this setting if you wish to specify manually which web applications should use this service application.

PerformancePoint Service Application
☒ Add this service application's proxy to the farm's default proxy list.

Use of the default database server and database name is recommended for most cases. Refer to the administrator's guide for advanced scenarios where specifying database information is required.

Database Server

Database Name
PerformancePoint Service Application_c8d14a8

Database authentication
☒ Windows authentication (recommended)

☐ SQL authentication
Account

Password

Use of Windows authentication is strongly recommended. To use SQL authentication, specify the credentials which will be used to connect to the database.

Failover Server

You can choose to associate a database with a specific failover server that is used in conjunction

Failover Database Server

The Managed Metadata Service application is configured as shown in Managed Metadata exhibit. (Click the Exhibit button.)
Create New Managed Metadata Service

Specify the name, databases, application pool and content settings for this Managed Metadata Service. [Help](#)

Site Feed	

feature.

Correct Answer:

Answer Area

	Yes	No
If a single SQL Server server fails, the Managed Metadata Service will be available.	<input type="radio"/>	<input type="radio"/>
If a single SQL Server server fails, the PerformancePoint Service Application will be available.	<input type="radio"/>	<input type="radio"/>
SQL Server Failover Clustering must be deployed to provide high availability for the PerformancePoint Service Application.	<input type="radio"/>	<input type="radio"/>
SQL Server Failover Clustering must be deployed to provide high availability for the Managed Metadata Service application.	<input type="radio"/>	<input type="radio"/>

Answer Area

	Yes	No
If a single SQL Server server fails, the Managed Metadata Service will be available.	<input checked="" type="checkbox"/>	<input type="checkbox"/>
If a single SQL Server server fails, the PerformancePoint Service Application will be available.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
SQL Server Failover Clustering must be deployed to provide high availability for the PerformancePoint Service Application.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
SQL Server Failover Clustering must be deployed to provide high availability for the Managed Metadata Service application.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

QUESTION 4

You are the administrator for your company's SharePoint environment. Company policy requires that you use Windows PowerShell to deploy farm solutions.

You need to deploy a SharePoint solution to the farm. The solution is named solution.wsp and is located at c:\solution.wsp.

Which Windows PowerShell command should you run?

- A. Enable-SPFeature-Identitysolution
- B. Install-SPSolution -Identity solution.wsp -Confirm \$true
- C. Update-SPSolution -Identity solution.wsp -LiteralPath c:\solution.wsp -Confirm \$true
- D. Add-SPSolution solution.wsp-Confirm \$true

Correct Answer: B

To deploy a solution package to a single Web application by using Windows PowerShell

1.

Verify that you meet the following minimum requirements.

2.

On the Start menu, click All Programs.

3.

Click Microsoft SharePoint 2010 Products.

4.

Click SharePoint 2010 Management Shell.

5.

At the Windows PowerShell command prompt, type the following command:

6.

`Install-SPSolution -Identity -WebApplication`

Where:

is the name of the solution.

is the URL of the Web application to which you want to deploy the imported solution.

Reference: Deploy solution packages (SharePoint Server 2010)

QUESTION 5

You are designing the search service topology for a SharePoint farm.

The design must meet the following requirements:

Search services must be fault tolerant and highly available.

Search crawls must not affect page load times.

Search queries must run at the fastest possible speed.

You need to distribute the appropriate search service roles to meet the requirements.

How should you distribute the service roles? (To answer, select the appropriate service role from each drop-down list in the answer area.)
