QUESTION 1

You support Skype for Business clients and servers in your customer’s company network.

All computers are members of a single Active Directory Domain Services (AD DS) domain named contoso.local. The single front-end Skype for Business Server 2015 server is configured to support a Session Initiation Protocol (SIP) domain

named contoso.com.

You configure Skype for Business to support users from a new SIP domain named proseware.net.

The users of the new SIP domain report that the Skype for Business client is able to connect to the Skype for Business server only after manual configuration. Users of the Contoso.com SIP domain are able to connect to Skype for Business

server automatically, both internally and externally.

You need to restore the internal and external automatic discovery features for the users of the proseware.net SIP domain.

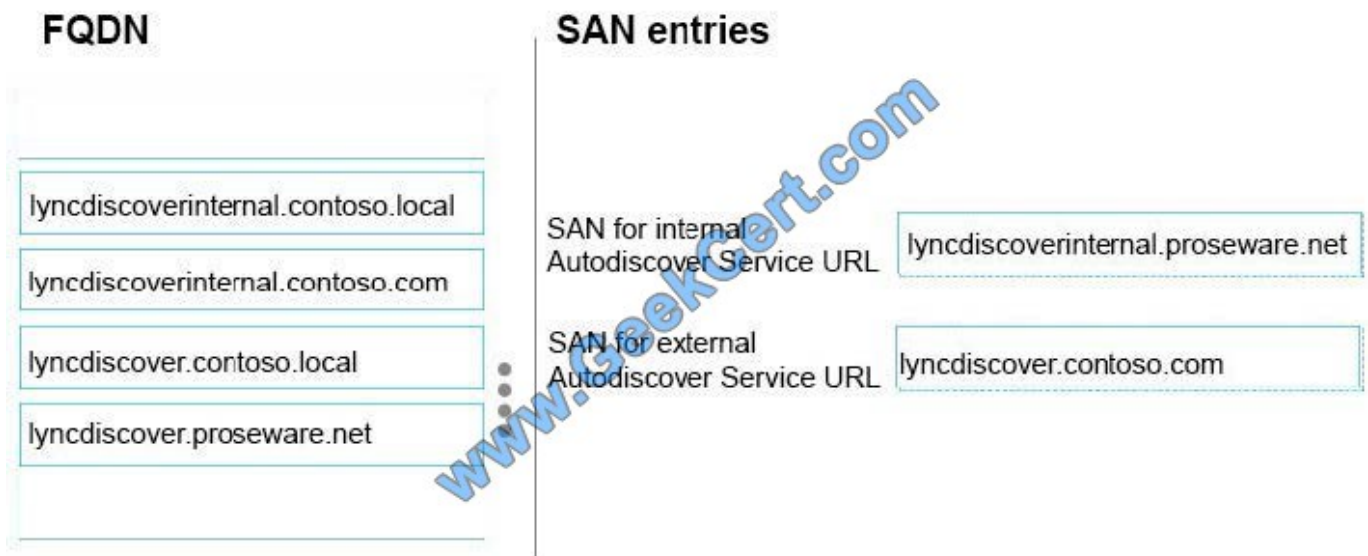

Which fully qualified domain name (FQDN) should you add to the subject alternative name (SAN) for each certificate? To answer, drag the appropriate FQDN to the correct certificate request. Each FQDN may be used once, more than once,

or not at all. You may need to drag the split bar between panes or scroll to view content.

Select and Place:

FQDN	SAN entries
lyncdiscoverinternal.proseware.net	SAN for internal Autodiscover Service URL <input type="text"/>
lyncdiscoverinternal.contoso.local	
lyncdiscoverinternal.contoso.com	SAN for external Autodiscover Service URL <input type="text"/>
lyncdiscover.contoso.local	
lyncdiscover.proseware.net	
lyncdiscover.contoso.com	

Correct Answer:

QUESTION 2

A company plans to allow users to sign in to Skype for Business by using either Skype for Business 2015 or the Skype for Business mobile app on various mobile platforms (iOS, Android, and Windows Phone).

Skype for Business mobile users must be able to access conversation history and scheduled meetings.

You need to enable mobility access for Skype for Business 2015 for external networks. On the Reverse Proxy server, which three services must you publish? Each correct answer presents part of the solution.

- A. Skype for Business External Web Services
- B. Skype for Business Internal Web Services
- C. Lyncdiscover
- D. Skype for Business Phone Access URL
- E. Skype for Business Meeting URL

Correct Answer: ACD

QUESTION 3

You have a Lync Server 2013 and Skype for Business Server 2015 infrastructure. You migrate all users to the Skype for Business Server 2015 Front End pool.

After the migration, users are unable to access the whiteboards, attachments, poll data, and the Microsoft PowerPoint presentations that were uploaded to meetings before the migration.

You need to ensure that users can access the PowerPoint presentations, whiteboards, attachments, and the poll data.

What should you do?

- A. Run the Move-CsConferenceDirectorySkype for Business Management cmdlet.
- B. Run the Move-CsUserSkype for Business Management cmdlet and specify a value for the ProxyPool parameter.
- C. Run the Move-CsUserSkype for Business Management cmdlet and specify a value for the MoveConferenceData parameter.
- D. Run the Move-CsLegacyUserSkype for Business Management shell cmdlet.

Correct Answer: C

QUESTION 4

A company has a Skype for Business 2015 environment that consists of a single site. Client Version Configuration policies are disabled globally. Employees report that they are missing some Skype for Business features and that they are not able to see multiple people in conferences. You must notify users. You need to configure Skype for Business. What should you do?

- A. Enable the global Client Version Configuration policy.
- B. Create a client policy for the internal users. Run the New-CsEdgeAllowList Skype for Business Management Shell cmdlet to notify external users.
- C. Create a client Version Configuration policy for the internal users. Run the Set-CsAccessEdgeConfiguration Skype for Business Management Shell cmdlet to notify external users.
- D. Create a client policy for the site that enforces versions.

Correct Answer: A

QUESTION 5

You need to implement the planned unified contact store.

Which three actions should you perform? Each correct answer presents part of the solution. Choose three.

- A. From a server that has Skype for Business Server 2015 deployed, run the New-CsPartnerApplication Skype for Business Management Shell cmdlet.
- B. From a server that has Exchange Server 2013 deployed, run the ExchUCUtil.ps1 script.
- C. From a server that has Skype for Business Server 2015 deployed, run the Set-CsUserServicesPolicy Skype for Business Management Shell cmdlet.
- D. From a server that has Exchange Server 2013 deployed, run the Configure-EnterprisePartnerApplication.ps1 script.
- E. From a server that has Skype for Business Server 2015 deployed, run the Set-CsClientPolicy Skype for Business Management Shell cmdlet.

Correct Answer: ABC
