QUESTION 1

You have a Lync Server 2013 infrastructure.

Your network contains a single site. The site contains a Standard Edition server and multiple network segments. Each segment is associated to a different subnet. Some of the network segments are wireless and some are wired.

You enable Enterprise voice and deploy a Lync Server 2013 media gateway.

You configure media bypass. You set media bypass to Always bypass. Call Admission Control (CAC) is disabled.

Users on the wireless network report poor audio quality during calls to external phone numbers. The users report good audio quality during calls to other Lync Server 2013 users.

You need to recommend changes to the infrastructure to improve the audio quality of calls for the wireless network users.

Which three actions should you recommend? (Each correct answer presents part of the solution. Choose three.)

- A. From the Microsoft Lync Server 2013 Control Panel, select Use sites and region configuration.
- B. Associate the wireless subnets to the new site.
- C. From the Microsoft Lync Server 2013 Control Panel, select Enable bypass for nonmapped sites.
- D. Create a new network site.
- E. From the Microsoft Lync Server 2013 Control Panel, select Enable call admission control.
- F. Associate the wired subnets to the new site.

Correct Answer: ADF

QUESTION 2

You have a Lync Server 2013 infrastructure.

A user named Executive1 has an assistant named Assistant1. Assistant1 is configured as a delegate and receives all of the calls for Executive1.

You need to modify the current voice solution to meet the following requirements:

Ensure that some of the calls from other executives to Executive1 only ring on the Microsoft Lync 2013 client of Executive1.

Ensure that Executive1 can receive the calls from the other executives when his presence status is set to Do Not Disturb.

What should you configure?

- A. Call Park

- B. A private line
- C. Simultaneous ring
- D. A response group

Correct Answer: B

QUESTION 3

You need to recommend a solution to integrate the planned on-premises Lync Server 2013 infrastructure and Lync Online.

Which two components should you include in the recommendation? (Each correct answer presents part of the solution. Choose two.)

- A. A Lync Server 2013 partner application
- B. A new certificate issue by a trusted third-party certification authority (CA)
- C. The Microsoft Online Services Directory Synchronization tool
- D. A Session Border Controller
- E. A Lync Server 2013 Edge pool

Correct Answer: CE

QUESTION 4

You have a Lync Server 2013 infrastructure. The infrastructure contains one central site.

The infrastructure contains a Standard Edition server that has the Mediation Server role installed and is located in the central site.

You configure a trunk to an IP-PBX. The IP-PBX is on the Unified Communications Open Interoperability program.

You have 300 users who are enabled for Enterprise Voice.

You need to provide PSTN services to the Enterprise Voice users if the IP-PBX fails.

What should you do?

- A. Install a PSTN gateway that connects directly to the PSTN. Configure a new trunk to the new PSTN gateway. Create a new route and a new PSTN usage. Add the route to the PSTN usage and add the PSTN usage to the voice policy.
- B. Install a Survivable Branch Server that connects directly to the PSTN. Configure a new trunk and add the trunk to the existing route. Add the route to the PSTN usage and add the PSTN usage to the voice policy.

C. Install a new trunk to a certified SIP trunk provider. Add the trunk to the existing PSTN usage. Add the PSTN usage to the voice policy.

D. Install an additional IP-PBX that connects directly to the PSTN. Configure the existing trunk to use both IP-PBXs in resiliency mode.

Correct Answer: A

QUESTION 5

You need to configure UM to meet the UM requirements.

Which UM component should you use to meet each requirement?

To answer, drag the appropriate components to the correct requirements in the answer area. Each setting may be used once, more than once, or not at all. Additionally, you can split bar between panes or scroll to view content.

Select and Place:

Components	Answer Area
an auto attendant	All users must be able to use the Play on Phone feature in Microsoft Outlook. Component
a dial plan	UM administrators must be able to configure calls to be redirected to external phone numbers. Component
a UM IP gateway	Users must be prevented from navigating the voice mail system menu by using their voice. Component
a UM mailbox policy	
a UM mailbox setting	

Correct Answer:

Components	Answer Area
an auto attendant	All users must be able to use the Play on Phone feature in Microsoft Outlook.
a UM IP gateway	UM administrators must be able to configure calls to be redirected to external phone numbers.
	Users must be prevented from navigating the voice mail system menu by using their voice.
