QUESTION 1

In this section, you will see one or more sets of questions with the same scenario and problem.

Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem.

It is also possible that none of the solutions solve the problem.

Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You have an existing SharePoint 2016 on-premises environment.

You are configuring a SharePoint hybrid solution.

You must store all personal sites in Office 365.

You configure the Managed Metadata service and User Profile service applications.

You create a My Site Host site collection. In SharePoint Central Administration, you grant the Create Personal Site and Follow People and Edit Profile permissions to users and configure hybrid OneDrive for Business settings.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 2

You need to plan the Atlanta farm deployment.

Which file systems should you use? To answer, select the appropriate file system from each list in the answer area.

QUESTION 3

You need to configure SharePoint to support the required common document properties. Which two actions should you perform? Each correct answer presents part of the solution.

- A. Activate the Metadata Navigation and Filtering feature.
- B. In each site collection, define content types and site columns.
- C. Create a site collection. Define content types and site columns.
- D. Activate the Content Type Syndication Hub feature.
- E. Create a library. Create columns and save the library as a template.

Correct Answer: CD

QUESTION 4

A company uses SharePoint 2016 in a hybrid environment. You replace an administrator that has left the company.

The SSL certificate that you purchased from a vendor is expired. You observe the following issues:

Domain users that attempt to access the hybrid environment are not able to authenticate.

When accessing the online environment by using a cloud user account, Search does not return results from on-premises servers.

You need to renew the expired certificates.

For each issue, which certificate should you renew? To answer, select the appropriate certificate type or location from each list in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Issue	Certificate type	Location
Domain users are unable to access online resources.	<input type="text"/> Security Token Service certificate wildcard SSL certificate secure channel certificate	<input type="text"/> Office 365 tenant reverse proxy server federation server domain controller
SharePoint Online search queries are not returning expected results.	<input type="text"/> STS certificate wildcard SSL certificate domain certificate	<input type="text"/> Office 365 tenant reverse proxy server federation server domain controller

Correct Answer:

Answer Area

Issue	Certificate type	Location
Domain users are unable to access online resources.	<input type="text"/> Security Token Service certificate wildcard SSL certificate secure channel certificate	<input type="text"/> Office 365 tenant reverse proxy server federation server domain controller
SharePoint Online search queries are not returning expected results.	<input type="text"/> STS certificate wildcard SSL certificate domain certificate	<input type="text"/> Office 365 tenant reverse proxy server federation server domain controller

QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this sections, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You manage an on-premises SharePoint Server 2016 farm and SharePoint Online.

You plan to deploy a SharePoint Search solution. The solution must meet the following requirements:

Present a unified set of search results to users.

Reduce the number of Search Servers in the farm.

Customize the search schema for content that is stored on-premises.

You implement bi-directional hybrid topologies.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B
