QUESTION 1

DRAG DROP

You have an Exchange Server organization named adatum.com. The organization contains servers that have Exchange Server 2010 and Exchange Server 2013 installed.

The company executives require that all email messages remain stored for three years.

You create two retention tags named Ret1 and Ret2. Ret1 moves the email messages to an Archive mailbox after one year. Ret2 permanently deletes the emailmessages after three years.

You need to meet the company executives\\' requirements. The solution must ensure that all email messages that are older than two years are removed as quickly as possible.

Which three actions should you perform in sequence? (To answer, move the appropriate three actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Actions	Answer Area
Run the **Search-Mailbox** cmdlet.	
Add retention tags to a new retention policy.	
Run the **Start-ManagedFolderAssistant** cmdlet.	
Assign the retention policy by running the **Set-Mailbox** cmdlet.	
Run the **Set-Mailbox** cmdlet and specify the *retentionholdenabled* parameter.	

Correct Answer:

Actions	Answer Area
Run the **Search-Mailbox** cmdlet.	Add retention tags to a new retention policy.
	Assign the retention policy by running the **Set-Mailbox** cmdlet.
	Run the **Start-ManagedFolderAssistant** cmdlet.
Run the **Set-Mailbox** cmdlet and specify the *retentionholdenabled* parameter.	

QUESTION 2

You have an Exchange Server 2013 organization.

You plan to use document fingerprinting.

You need to identify which file type cannot be used as a template for document fingerprinting.

Which document type should you identify?

A. .pptx

B. .doc

C. .txt

D. .dotx

Correct Answer: D

Document Fingerprinting supports the same file types that are supported in transport rules. One quick note about file types: neither transport rules nor Document Fingerprinting supports the .dotx file type, which can be confusing because that\\'s a template file in Word. When you see the word "template" in this and other Document Fingerprinting topics, it refers to a document that you have established as a standard form, not the template file type.

Reference: Document Fingerprinting https://technet.microsoft.com/en-us/library/dn635176(v=exchg.150).aspx

QUESTION 3

You work for a financial services company that has an Exchange Server 2013 organization.

Mailbox audit logging is enabled for all mailboxes.

The company identifies the following requirements for the sales department:

The manager of the sales department must be able to search for email messages that contain specific key words in the mailboxes of the users in the sales department.

The manager of the human resources department must receive a report that contains a list of all the sales users\\' mailboxes that were searched by the sales manager.

You need to identify which tasks must be performed to meet the requirements.

Which tasks should you identify?

To answer, drag the appropriate task to the correct requirement in the answer area. Each task may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Tasks	Answer Area
Export the security events.	The manager of the sales department must be able to search for email messages that contain specific key words in the mailboxes of the users in the sales department. — Task
Export the mailbox audit logs.	
Export the administrator audit log.	The manager of the human resources department must receive a report that contains a list of all the sales users' mailboxes that were searched by the sales manager. — Task
Run an in-place eDiscovery report.	

Correct Answer:

Tasks	Answer Area
Export the security events.	The manager of the sales department must be able to search for email messages that contain specific key words in the mailboxes of the users in the sales department. — Run an in-place eDiscovery report.
Export the administrator audit log.	The manager of the human resources department must receive a report that contains a list of all the sales users' mailboxes that were searched by the sales manager. — Export the mailbox audit logs.

QUESTION 4

DRAG DROP

You have an Exchange Server organization. The organization contains servers that have Exchange Server 2010 and Exchange Server 2013 installed.

A new compliance policy requires that all email messages remain stored for two years.

You create two retention tags named Tag1 and Tag2. Tag1 moves the email messages to an Archive mailbox after one year. Tag2 permanently deletes the email messages after two years.

You need to meet the compliance policy requirements. The solution must ensure that all email messages that are older than two years are removed as quickly as possible.

Which three actions should you perform?

To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Run the **Start-Process** cmdlet.	
Run the **Set-Mailbox** cmdlet and specify the *retentionholdenabled* parameter.	
Run the **Start-ManagedFolderAssistant** cmdlet.	
Add retention tags to a new retention policy.	
Assign the retention policy by running the **Set-Mailbox** cmdlet.	

Correct Answer:

Note:

Box 1: First use the retention tags to create a new retention policy.

Box 2: Use the Set-Mailbox cmdlet to modify the settings of an existing mailbox. You can use this cmdlet for one mailbox at a time.

Box 3: Use the Start-ManagedFolderAssistant cmdlet to immediately start messaging records management (MRM) processing of mailboxes that you specify

/ The Managed Folder Assistant uses the retention policy settings of users\' mailboxes to process retention of items. This mailbox processing occurs automatically. You can use the Start-ManagedFolderAssistant cmdlet to immediately start processing the specified mailbox.

1 Create Retention Tags
Retention tags are used to apply retention settings to messages and folders. There are three types of retention tags:
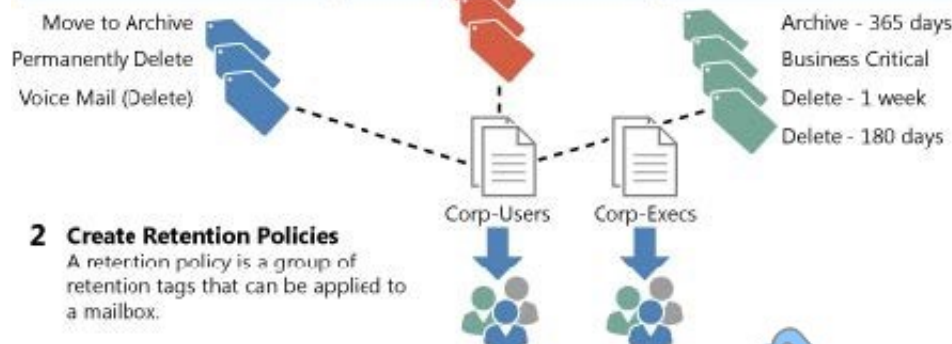

Default Policy Tag
A default policy tag (DPT) applies to all items that do not have a retention tag applied, either inherited or explicit.

Retention Policy Tags
Retention policy tags (RPTs) are created for default folders such as Inbox, Deleted Items, etc.

Personal Tags
Personal tags are used by Outlook and Outlook Web App users to apply retention settings to custom folders and individual items such as email messages.

Move to Archive
Permanently Delete
Voice Mail (Delete)

Archive - 365 days
Business Critical
Delete - 1 week
Delete - 180 days

Corp-Users   Corp-Execs

2 Create Retention Policies
A retention policy is a group of retention tags that can be applied to a mailbox.

3 Link Retention Tags to Retention Policies
A retention policy can have one DPT to move items to the archive, one DPT to delete items, one DPT to delete voice mail messages, one RPT for each supported default folder, and any number of personal tags.

4 Apply Retention Policies
Retention policies are applied to mailbox users. Different sets of users can have different retention policies.
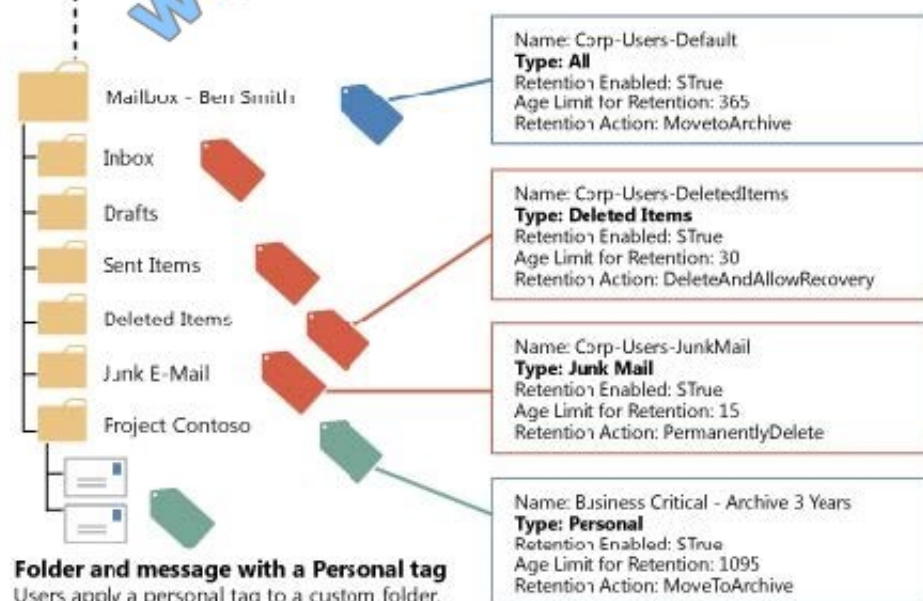

5 The Managed Folder Assistant Processes Mailboxes
The Managed Folder Assistant, a process that runs on Mailbox servers, processes mailboxes, applies retention settings to mailbox items, and takes the specified retention action.

6 Mailbox Processed
After a mailbox is processed, the DPT and RPTs are applied to the mailbox and default folders, and personal tags become available in Outlook and Outlook Web App. Retention action is taken on messages based on tag settings.

Mailbox - Ben Smith
Inbox
Drafts
Sent Items
Deleted Items
Junk E-Mail
Project Contoso

Name: Corp-Users-Default
Type: All
Retention Enabled: $True
Age Limit for Retention: 365
Retention Action: MovetoArchive

Name: Corp-Users-DeletedItems
Type: Deleted Items
Retention Enabled: $True
Age Limit for Retention: 30
Retention Action: DeleteAndAllowRecovery

Name: Corp-Users-JunkMail
Type: Junk Mail
Retention Enabled: $True
Age Limit for Retention: 15
Retention Action: PermanentlyDelete

Name: Business Critical - Archive 3 Years
Type: Personal
Retention Enabled: $True
Age Limit for Retention: 1095
Retention Action: MoveToArchive

Folder and message with a Personal tag
Users apply a personal tag to a custom folder. Items in folders can have a different personal tag applied.

Reference: Retention Tags and Retention Policies

QUESTION 5

DRAG DROP

You have a server that has Exchange Server 2013 installed.

You plan to deploy Unified Messaging (UM) to all users.

You have two UM IP gateways named GW1 and GW2.

You create, and then associate a new UM dial plan for each IP gateway. The IP gateways are configured as shown in the following table.

IP gatewayname	UM dial plan name
GW1	GW1DialPlan
GW2	GW2DialPlan

You need to recommend a solution that meets the following security requirements:

All voice traffic received by GW1 must be encrypted.

All voice traffic received by GW2 must be unencrypted.

All signaling traffic to GW1 and GW2 must be encrypted.

Which security settings should you recommend configuring for each dial plan?

To answer, drag the appropriate security setting to the correct UM dial plan in the answer area. Each security setting may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Security Settings	Answer Area
Secured	GW1DialPlan — Security setting
SIP Secured	GW2DialPlan — Security setting
Unsecured	

Correct Answer:

Security Settings	Answer Area	
	GW1DialPlan	Secured
	GW2DialPlan	SIP Secured
Unsecured
