QUESTION 1

DRAG DROP

You have an Exchange Server 2016 organization.

You run the Microsoft Office 365 Hybrid Configuration Wizard and you move all the mailboxes to Exchange Online.

You need to ensure that all of the email services remain available after you remove the Exchange Server 2016 servers from the organization.

Which DNS records should you modify? To answer, drag the appropriate record types to the correct DNS zones. Each record type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

Select and Place:

Record Types

- Autodiscover
- MX
- NX
- SRV

Answer Area

Record to modify in the internal DNS zone: Record Type

Record to modify in the public DNS zone: Record Type

Record Type

Correct Answer:

Record Types		Answer Area
Autodiscover	Record to modify in the internal DNS zone:	Autodiscover
MX		
NX	Record to modify in the public DNS zone:	Autodiscover
SRV		MX

QUESTION 2

You have an Exchange Server 2016 organization.

You allow mobile devices to connect to the organization from the Internet.

You discover that a specific version of the operating system on mobile devices causes performance issues on an Exchange server when the devices connect to the organization by using Exchange ActiveSync.

You need to prevent the mobile devices from connecting to the Exchange Server organization. The solution must allow all other mobile devices to connect.

Which command should you use?

- A. New-ActiveSyncDeviceAccessRule
- B. New-ActiveSyncMailboxPolicy
- C. Remove-ActiveSyncDevice
- D. Set-ActiveSyncOrganizationSettings

Correct Answer: A

References: <https://docs.microsoft.com/en-us/powershell/module/exchange/devices/new-activesyncdeviceaccessrule?view=exchange-ps>

QUESTION 3

You have two Mailbox servers named EX1 and EX2 that have Exchange Server 2016 installed.

Server name	Disk name	Disk usage
EX1	C	Operating system
	D	Exchange Server database files
	E	Exchange Server transaction logs
EX2	C	Operating system
	D	Exchange Server database files
	E	Exchange Server transaction logs
	F	Spare

The disks on the servers are configured as shown in the following table.

Drive D on EX1 fails.

You plan to restore the mailbox databases in EX2 by using drive F.

You copy the contents of drive E on EX1 to drive F on EX2.

You need to restore the mailbox databases as soon as possible.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Answer Area

Set the AllowFileRestore parameter to \$true.

Mount the database.

Run eseutil.exe.

Restore the database.

Create a new mailbox database.

Correct Answer:

Actions

Answer Area

Run eseutil.exe.

Create a new mailbox database.

Set the AllowFileRestore parameter to \$true.

Restore the database.

Mount the database.

QUESTION 4

You have an Exchange Server 2016 organization.

All users work from a main office and use Microsoft Outlook 2016.

You recently ran the Microsoft Office 365 Hybrid Configuration Wizard and moved most of the user mailboxes to Exchange Online. A network administrator reports an increase in the amount of outbound SMTP traffic from the network.

You need to reduce the amount of bandwidth utilization for the outbound SMTP traffic.

What should you do?

- A. From the Exchange Server organization, create a Receive connector that uses the IP address of Exchange Online as a remote range.
- B. From the public DNS zone, modify the MX record to point to Exchange Online.
- C. From the public DNS zone, modify the SRV record to point to Exchange Online.
- D. From the Exchange Server organization, create a Send connector that uses Exchange Online as an SMTP smart host.

Correct Answer: B

The path messages sent to recipients in your on-premises and Exchange Online organizations take depends on how you decide to configure your MX record in your hybrid deployment. The Hybrid Configuration wizard doesn't configure the routing for inbound Internet messages for either the on-premises or Exchange Online organizations. You must manually configure your MX record if you want to change how your inbound Internet mail is delivered.

QUESTION 5

You need to recommend a solution that meets the security requirements for the human resources users. What should you include in the recommendation?

- A. an Outlook protection rule
- B. an Inbox rule
- C. a transport rule
- D. a TLS sender-domain filter list

Correct Answer: A
