QUESTION 1

DRAG DROP

You have an Exchange Server 2016 organization.

You run the Microsoft Office 365 Hybrid Configuration Wizard and you move all the mailboxes to Exchange Online.

You need to ensure that all of the email services remain available after you remove the Exchange Server 2016 servers from the organization.

Which DNS records should you modify? To answer, drag the appropriate record types to the correct DNS zones. Each record type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content.

Select and Place:

Record Types

- Autodiscover
- MX
- NX
- SRV

Answer Area

Record to modify in the internal DNS zone: Record Type

Record to modify in the public DNS zone: Record Type

Record Type

Correct Answer:

Record Types		Answer Area
Autodiscover	Record to modify in the internal DNS zone:	Autodiscover
MX		
NX	Record to modify in the public DNS zone:	Autodiscover
SRV		MX

QUESTION 2

You have an Exchange Server organization. The organization contains servers that have Exchange Server 2010 and Exchange Server 2016 installed.

You establish a hybrid deployment between Exchange Server and Microsoft Office 365.

Some users have on-premises mailboxes and personal archives in Exchange Online.

You discover that you are unable to use In-Place eDiscovery to search user mailboxes and Exchange Online Archiving archives concurrently.

You need to recommend a solution to ensure that In-Place eDiscovery can search the mailboxes and the personal archives concurrently.

What should you include in the recommendation?

- A. OAuth authentication
- B. an organization relationship
- C. a retention policy
- D. the Mailbox Replication service (MRS)

Correct Answer: A

References: [https://technet.microsoft.com/en-us/library/dd298021\(v=exchg.160\).aspx](https://technet.microsoft.com/en-us/library/dd298021(v=exchg.160).aspx)

QUESTION 3

Your company has an Exchange Server 2016 organization and a Microsoft Office 365 subscription configured in a hybrid deployment.

You configure the synchronization of on-premises Active Directory accounts to Office 365.

All users connect to email services by using Outlook 2016.

You plan to deploy Office 365 Message Encryption for the mailboxes of two executives named Exec1 and Exec2. The mailboxes are hosted in Office 365.

You need to recommend which actions must be performed to ensure that all of the email messages sent from Exec1 and Exec2 to any recipient on the Internet are encrypted.

Which two actions should you recommend? Each correct answer presents part of the solution.

- A. Deploy Microsoft Azure Rights Management (Azure RMS) to the Office 365 subscription.
- B. Deploy Active Directory Rights Management Services (AD RMS) to the network.
- C. Run the Set-MSOLUserLicense cmdlet.
- D. From the Office 365 Exchange admin center, create a rule.
- E. Install a certificate on the computer of Exec1 and the computer of Exec2.
- F. From the on-premises Exchange admin center, create a transport rule.

Correct Answer: AF

A: Office 365 Message Encryption requires the Azure Rights Management service. Once you have a subscription to this service, you can activate it.

Note: Encryption options for Office 365:

Azure RMS, including both IRM capabilities and OME

S/MIME

TLS

Encryption of data at rest (through BitLocker)

F: As an administrator, you can create transport rules to enable Microsoft Office 365 Message Encryption. This lets you encrypt any outgoing email messages and remove encryption from encrypted messages coming from inside your

organization or from replies to encrypted messages sent from your organization.

To use the transport rule to encrypt messages, your organization must have Windows Azure Rights Management set up for Office 365 Message Encryption.

QUESTION 4

You have an Exchange Server 2016 organization.

You plan to audit all the tasks performed by administrators.

You need to configure a weekly automated email notification that reports each time an administrator permanently deletes a mailbox.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

▼
New-AdminAuditLogSearch
New-MailboxAuditLogSearch
Set-AdminAuditLogConfig
Set-AuditLogConfig

-Name "Permanent mailbox removal"

▼
-StartDate \$startweek -EndDate \$endweek
-ScheduleEnabled \$true
-Force
-AdminAuditLogEnabled \$true
-AdminAuditLogParameters

-StatusMailRecipients auditmailbox@adatum.com

Correct Answer:

▼
New-AdminAuditLogSearch
New-MailboxAuditLogSearch
Set-AdminAuditLogConfig
Set-AuditLogConfig

-Name "Permanent mailbox removal"

▼
-StartDate \$startweek -EndDate \$endweek
-ScheduleEnabled \$true
-Force
-AdminAuditLogEnabled \$true
-AdminAuditLogParameters

-StatusMailRecipients auditmailbox@adatum.com

QUESTION 5

You need to ensure that members of a group named Relecloudadmins can create user accounts and mailboxes for new employees by using Exchange Admin Center (EAC) after the planned upgrade. What should you do first?

- A. Run the New-ManagementRole cmdlet.
- B. Run the New-ManagementRoleAssignment cmdlet.
- C. Run setup.exe and specify the /PrepareDomain parameter.
- D. Run setup.exe and specify the /prepareAD parameter.

Correct Answer: B
