### QUESTION 1

You are project manager in your company's PMO. You have permission to manage the Enterprise Global view in Microsoft PPM. Your organization works with many large multiyear projects often managed by more than one project manager.

You need to provide an Enterprise Global view that displays the fields necessary for your colleagues to control whether a task is published, who will be responsible for sending the task updates for the task, and who is responsible for approving updates from resources.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Actions**

- Create a new table named **Publish** that includes the **Publish**, **Assignment Owner**, and **Status Manager** fields.
- Open and checkout the **Enterprise Global** file.
- Use the **Organizer** to copy the **Publish Table**, **No Group** group, **No Filter** filter, and the **Publishing** view from the local project to the **Enterprise Global** file.
- Save, close, and check in the **Enterprise Global** file.
- Create a new view named **Publishing** using the **Publish Table**, **Task Usage** screen, **No Group** group, and the **No Filter** filter.
- Create a new view named **Publishing** using the **Publish Table**, **Tracking Gantt** screen, **No Group** group, and the **No Filter** filter.
- Use the **Organizer** to copy the **Publish Table** and

**Answer Area**

Correct Answer:

**Actions**

- Use the **Organizer** to copy the **Publish Table** and
- Create a new view named **Publishing** using the **Publish Table**, **Tracking Gantt** screen, **No Group** group, and the **No Filter** filter.
- Create a new view named **Publishing** using the **Publish Table**, **Task Usage** screen, **No Group** group, and the **No Filter** filter.
- Use the **Organizer** to copy the **Publish Table**, **No Group** group, **No Filter** filter, and the **Publishing** view from the local project to the **Enterprise Global** file.
- Create a new table named **Publish** that includes the **Publish**, **Assignment Owner**, and **Status Manager** fields.
- Save, close, and check in the **Enterprise Global** file.

**Answer Area**

- Open and checkout the **Enterprise Global** file.
- Create a new view named **Publishing** using the **Publish Table**, **Task Usage** screen, **No Group** group, and the **No Filter** filter.
- Use the **Organizer** to copy the **Publish Table**, **No Group** group, **No Filter** filter, and the **Publishing** view from the local project to the **Enterprise Global** file.
- Create a new table named **Publish** that includes the **Publish**, **Assignment Owner**, and **Status Manager** fields.
- Save, close, and check in the **Enterprise Global** file.

## QUESTION 2

Your company has had several large projects fail due to cost overruns and the lack of available resources. These projects use an enterprise project type named Large IT Project and use a workflow to govern the approval of the projects. The

workflow consists of four phases; Initiate, Plan, Execute, and Close.

You need to use Microsoft PPM to compare the value that a new project provides with the cost of implementing the project.

Which three configuration changes should you make? Each correct answer presents part of the solution.

- A. Navigate to PWA Settings Edit the Large IT Project project type, and in the Available Project Detail Page section, add the Strategic Impact form.
- B. Create a project-level custom field that will be used to enter the total cost of a project
- C. Define your company's strategic drivers, and enter them into the Strategic Impact form.
- D. Create a project-level custom field that will be used to enter the value statements of why this project should be undertaken.
- E. Define your company's strategic drivers and enter them into the driver library.
- F. In PWA Settings, edit and then save the stage information. In the Available Project Detail Page section, add the Strategic Impact.

Correct Answer: BCE

---

### QUESTION 3

You are a project manager for an organization that uses Microsoft PPM. You plan each project in phases.

Team members must only see the assignments from a selected phase. All reports and project schedule views must reflect the entire project schedule, so the entire project is visible to the management team.

You need to configure Microsoft PPM.

What should you do?

- A. Set the Publish field to No for all tasks that need the assignments to be hidden from the team members.
- B. Delete the assignments that are not ready to be published to the team members.
- C. Set up a new security category for the management team.
- D. Set the booking type to Proposed for all tasks that need the assignments to be hidden from the team members

Correct Answer: A

---

### QUESTION 4

Your organization is in the process of implementing Microsoft PPM.

You need to configure Microsoft PPM to ensure that project managers can choose the tracking method for each of their projects..

On the Task Settings and Display page, what should you do?

- A. Set the tracking method to Free form
- B. Select the check box Force project managers to use the progress reporting method specified above for all projects.
- C. Clear the check box Force project managers to use the progress reporting method specified above for all projects
- D. Set the tracking method to Percent of work complete

Correct Answer: A

### QUESTION 5

You are the administrator for an organization that uses Microsoft PPM.

Users must be able to create projects by using predefined templates.

You need to create a new Enterprise Project Template and make it available for users

Select and Place:

The screenshot shows a mobile application interface with a list of actions on the left and an answer area on the right. The actions are:

- Open the project file you want to save as a template, in Project Pro for Office 365, while connected to PWA.
- From Microsoft Project, in **Save to Project Web App**, set the **Type** to **Template**.
- From **Settings**, click **Enterprise Project Types** and attach the project template to the new **Enterprise Project Type**.
- From **Save as Template**, select the type of the data that you want to remove from the template.

The answer area on the right contains two circular arrows, one pointing up and one pointing down, indicating a scrollable list. A watermark 'www.GeekCert.com' is visible across the center of the screenshot.

Correct Answer:

**Actions**

**Answer Area**

Open the project file you want to save as a template, in Project Pro for Office 365, while connected to PWA.

From **Save as Template**, select the type of the data that you want to remove from the template.

From Microsoft Project, in **Save to Project Web App**, set the **Type** to **Template**.

From **Settings**, click **Enterprise Project Types** and attach the project template to the new **Enterprise Project Type**.
