-  **800,000+** Satisfied Customers

QUESTION 1

Your company has a SharePoint Server 2013 server farm.

You create a Business Connectivity Services (BCS) application.

You deploy the application to the farm,

Users create lists and add items to the lists based on the BCS application.

The users report that when they search for data, BCS items are not displayed in the search results. Other items in the farm are displayed in the search results.

You need to ensure that BCS data is displayed in the search results. The solution must minimize administrative effort.

What should you create?

- A. a Local SharePoint Results result source
- B. an OpenSearch 1.0/1.1 result source
- C. a Line of Business Data content source
- D. a Custom Repository content source

Correct Answer: C

Explanation: If your company has an on-premises SharePoint 2013 farm and a SharePoint Online 2013 tenancy, you can use BCS to create a secure connection between the two to make line-of-business (LOB) data available to applications for SharePoint and external lists in SharePoint Online. This is called a SharePoint BCS Hybrid solution. SharePoint Online 2013 supports only one-way connections from online to on-premises and to only one on-premises farm. The LOB data must be published as an OData source

QUESTION 2

You need to configure the environment to allow replication from the existing domain to Office 365.

Which components should you use? (To answer, drag the appropriate products or technologies to the correct location or locations in the answer area. Each product or technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Answer Area

Purpose	Product or technology
Local area network	
Perimeter network	
User replication	

AD FS 2.0

AD FS 2.0 Proxy

Microsoft Office 365 Deployment Readiness Tool

Microsoft Online Services Directory Synchronization tool

SAML token-based claims authentication

Windows Identity Foundation

Correct Answer:

Answer Area

Purpose	Product or technology
Local area network	AD FS 2.0
Perimeter network	AD FS 2.0 Proxy
User replication	Microsoft Online Services Directory Synchronization tool

Microsoft Office 365 Deployment Readiness Tool

SAML token-based claims authentication

Windows Identity Foundation

QUESTION 3

You need to import employee photos into SharePoint user profiles by using the least amount of administrative effort. Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

- A. Define a mapping for the thumbnailPhoto attribute of the Picture user profile property.
- B. Run the Update-SPUserSolution Windows PowerShell cmdlet.
- C. Run an incremental synchronization of the User Profile Synchronization service.
- D. Run a full synchronization of the User Profile Synchronization service.
- E. Run the Update-SPProfilePhotoStore Windows PowerShell cmdlet.

F. Define a mapping for the photo attribute of the Picture user profile property.

Correct Answer: ADE

QUESTION 4

You are the SharePoint administrator for a company that is installing SharePoint 2013. You have a SQL Server named SPSQLA that has an instance named SharePointPilot. You have the following requirements:

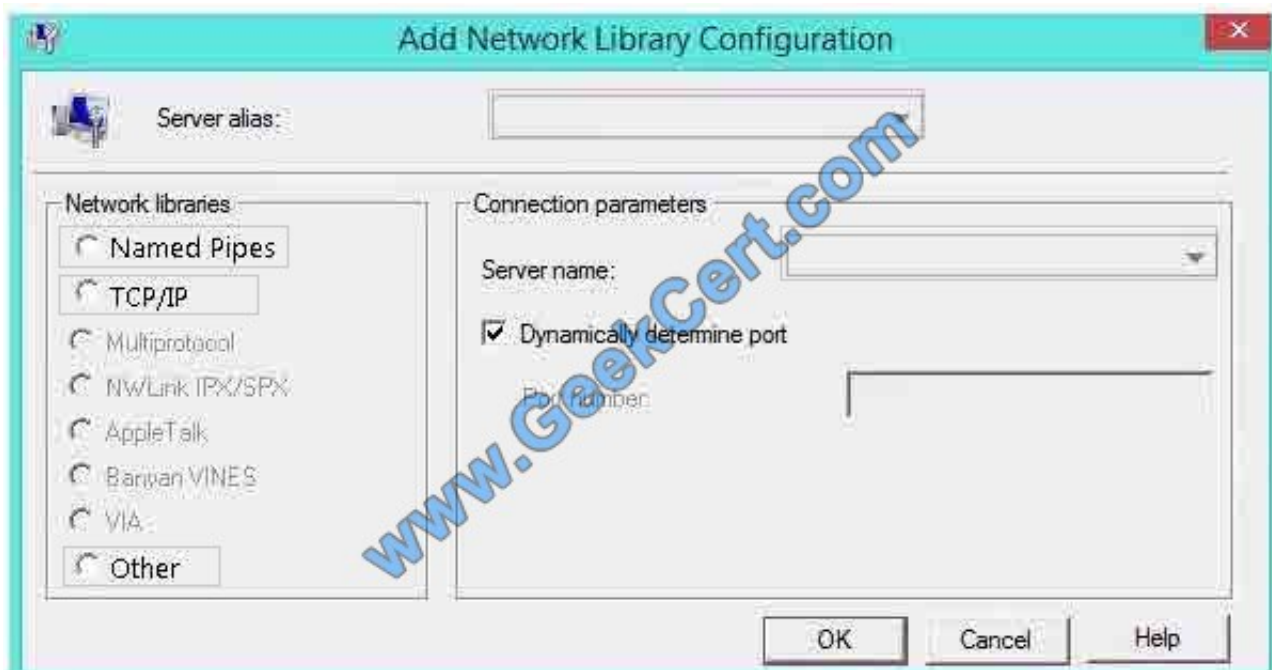

SQL aliases must be used to specify the connection to the database.

The name of the SQL alias must be configured as SPSQL.

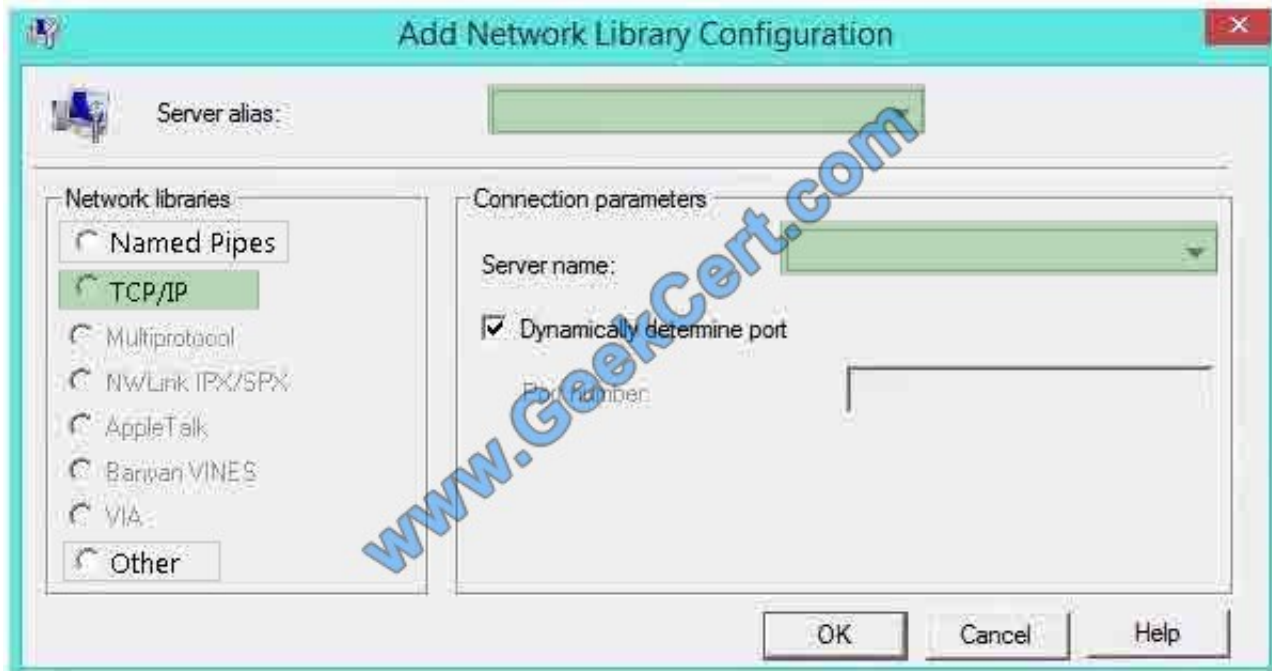

You need to configure the SQL alias on the SharePoint 2013 server.

On the Add Network Library Configuration window, which three options should you select? To answer, select the appropriate options in the answer area.

Hot Area:

Correct Answer:

QUESTION 5

You deploy a SharePoint Server 2013 server farm.

You receive a custom display template.

You need to ensure that the custom display template is available in a site collection.

What should you use to upload the template?

- A. The Master Page Gallery
- B. Composed looks
- C. Result types
- D. Variations

Correct Answer: A

Explanation: You can view existing display templates in Design Manager, but you don't create them in Design Manager the way that you create master pages and page layouts. Instead, you:

*

Open your mapped network drive to the Master Page Gallery.

*

Open one of the four folders in the Display Templates folder.

*

Copy the HTML file for an existing display template that's similar to what you want. The exact location that you copy the file to does not matter, as long as it is in the Master Page Gallery.

*

Open and modify your copy in an HTML editor.
