QUESTION 1

HOTSPOT

You have a standalone computer that runs Windows 10 Enterprise. The computer is configured to automatically back up files by using File History. The user of the computer uses the OneDrive desktop app to sync files.

The Previous Versions settings from the local group policy of the computer are shown in the following graphic.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

If a user deletes a file from OneDrive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using the Previous Versions tab

If a user deletes a file from a local drive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using Previous Versions tab

Correct Answer:

Answer Area

If a user deletes a file from OneDrive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using the Previous Versions tab

If a user deletes a file from a local drive by using File Explorer, the file [answer choice].

cannot be restored
can be restored from onedrive.com
can be restored by using Previous Versions tab

When a file is deleted from the local OneDrive folder with File Explorer, the deletion is replicated to Onedrive.com and the file is moved to the OneDrive recycle bin. The deleted file can therefore be recovered from the Recycle Bin on

Onedrive.com.

If a user deletes a file from a local drive by using File Explorer, the file cannot be restored. If the file is not in the OneDrive folder, it will not be a file that is synced to onedrive.com. We could use Previous Versions to restore the file but this is

prevented by the Group Policy settings. The "Prevent restoring local previous versions" ?Enabled group policy setting would prevent the previous version from being restored.

QUESTION 2

DRAG DROP

You receive the following error message when you attempt to open a Remote Desktop Protocol (RDP) file to make a connection: "The remote session was disconnected because there are no Remote Desktop License Servers available to provide a license. Please contact the server administrator."

You need to use the RDP file to sign into the virtual machine as administrator and then fix the issue.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Answer Area

Actions	Sequence
Use the RDP file to connect to the virtual machine in the Remote Desktop Connection. Sign in as an administrator.	
In Server Manager, under Remote Desktop Services, for the virtual machine server name open RD Licensing Manager.	⏪
Deploy the Remote Desktop Services licensing server role on the virtual machine.	⏩
In the RD Licensing Manager, activate the server. Fill out properties as required.	⏪
Open the RDP file in Notepad. Add/admin at the end of the address line. Save the file.	⏩

Correct Answer:

Answer Area

Actions	Sequence
<input type="text"/>	Open the RDP file in Notepad. Add/admin at the end of the address line. Save the file.
<input type="text"/>	Use the RDP file to connect to the virtual machine in the Remote Desktop Connection. Sign in as an administrator.
<input type="text"/>	Deploy the Remote Desktop Services licensing server role on the virtual machine.
<input type="text"/>	In Server Manager, under Remote Desktop Services, for the virtual machine server name open RD Licensing Manager.
<input type="text"/>	In the RD Licensing Manager, activate the server. Fill out properties as required.

QUESTION 3

HOTSPOT

You need to configure the required security measures for the sales department mobile devices.

What should you do? To answer, select the appropriate action from each list in the answer area. Each correct answer is worth one point.

Hot Area:

Answer Area

Security requirement

Actions

Configure password requirements.

▼

Create a configuration policy for iOS.
Create a Terms and Conditions policy.
Create a Corporate Device Enrollment policy.

Require a trusted build.

▼

Determine whether a device is jailbroken.
Determine whether a device was shipped from another country/region.
Confirm that the device has an Apple Push Notification Certificate.

Require encryption.

▼

Configure a compliance policy that requires encryption.
Use a configuration policy for iOS that enforces basic device requirements.
Configure the Terms and Conditions policy to require encryption on all devices.

Correct Answer:

Answer Area

Security requirement

Actions

Configure password requirements.

▼

Create a configuration policy for iOS.
Create a Terms and Conditions policy.
Create a Corporate Device Enrollment policy.

Require a trusted build.

▼

Determine whether a device is jailbroken.
Determine whether a device was shipped from another country/region.
Confirm that the device has an Apple Push Notification Certificate.

Require encryption.

▼

Configure a compliance policy that requires encryption.
Use a configuration policy for iOS that enforces basic device requirements.
Configure the Terms and Conditions policy to require encryption on all devices.

1: Create a new policy using the Itune Agent Settings template

2: Configure the delay between restart prompts for 720 minutes

3: Deploy a policy to the engineering group

QUESTION 4

You configure Windows Remote Desktop to allow remote connections. You are testing the remote desktop connection.

When users that are not administrators sign in to the Remote Desktop Connection, the following error message displays: "To sign in remotely, you need the right to sign in through Remote Desktop Services."

You need to ensure that all employees can access resources by using Remote Desktop Connection.

What should you do?

- A. In the local group policy, configure the Remote Desktop Connection Client to prompt for credentials on the client.
- B. Create a Group Policy Object that enables the Windows Firewall to allow inbound Remote Desktop Exceptions.
- C. Ensure that the employee's device is joined to the domain.
- D. In Computer Management, add the Authenticated Users group to the Remote Users group.

Correct Answer: D

QUESTION 5

HOTSPOT

You administer Office 365 and Azure Active Directory (AD) for a car rental company. You also manage an on-premises Active Directory Domain Services (AD DS) domain. You implement Active Federation Services (AD FS).

You plan to implement Azure AD Connect Health.

You need to ensure that you can install and configure Azure AD Connect Health.

What should you do? To answer, select the appropriate option from each list in the answer area.

Hot Area:

Answer Area

Licensing needed	Rights needed
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Azure AD Free	<input type="checkbox"/> User management administrator
<input type="checkbox"/> Azure AD Basic	<input type="checkbox"/> Service administrator
<input type="checkbox"/> Azure AD Premium	<input type="checkbox"/> Password administrator
	<input type="checkbox"/> Global administrator

Correct Answer:

Answer Area

Licensing needed	Rights needed
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Azure AD Free	<input type="checkbox"/> User management administrator
<input type="checkbox"/> Azure AD Basic	<input type="checkbox"/> Service administrator
<input checked="" type="checkbox"/> Azure AD Premium	<input checked="" type="checkbox"/> Password administrator
	<input type="checkbox"/> Global administrator
