QUESTION 3

DRAG DROP

You receive the following error message when you attempt to open a Remote Desktop Protocol (RDP) file to make a

connection: "The remote session was disconnected because there are no Remote Desktop License Servers available to provide a license. Please contact the server administrator."

You need to use the RDP file to sign into the virtual machine as administrator and then fix the issue.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Answer Area

Actions	Sequence
Use the RDP file to connect to the virtual machine in the Remote Desktop Connection. Sign in as an administrator.	
In Server Manager, under Remote Desktop Services, for the virtual machine server name open RD Licensing Manager.	➤
Deploy the Remote Desktop Services licensing server role on the virtual machine.	⬅
In the RD Licensing Manager, activate the server. Fill out properties as required.	
Open the RDP file in Notepad. Add/admin at the end of the address line. Save the file.	

⬆
⬇

Correct Answer:

Answer Area

Actions	Sequence
<div style="border: 1px solid #ccc; height: 40px;"></div>	<div style="border: 1px solid #ccc; padding: 5px;">Open the RDP file in Notepad. Add/admin at the end of the address line. Save the file.</div>
<div style="border: 1px solid #ccc; height: 40px;"></div>	<div style="border: 1px solid #ccc; padding: 5px;">Use the RDP file to connect to the virtual machine in the Remote Desktop Connection. Sign in as an administrator.</div>
<div style="border: 1px solid #ccc; height: 40px;"></div>	<div style="border: 1px solid #ccc; padding: 5px;">Deploy the Remote Desktop Services licensing server role on the virtual machine.</div>
<div style="border: 1px solid #ccc; height: 40px;"></div>	<div style="border: 1px solid #ccc; padding: 5px;">In Server Manager, under Remote Desktop Services, for the virtual machine server name open RD Licensing Manager.</div>
<div style="border: 1px solid #ccc; height: 40px;"></div>	<div style="border: 1px solid #ccc; padding: 5px;">In the RD Licensing Manager, activate the server. Fill out properties as required.</div>

QUESTION 4

DRAG DROP

You are deploying Windows 10 clients for a small company. The environment does not have access to any network shares, and USB drives are not allowed.

You need to determine which recovery options you can use.

For each scenario, which recovery option should you use? To answer, drag the appropriate recovery tool to the correct scenario. Each recovery tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Each correct answer is worth one point.

Select and Place:

Recovery options	Answer Area	Recovery option
	Scenario	
System Restore	You install a new driver. The new driver causes system issues. You need to roll back the driver installation.	
Reset this PC	You need to quickly revert back to the original computer state. You must keep personal files. You must remove apps and settings.	
File History	You need to quickly revert back to the original PC state. You must remove personal files, apps, and settings.	
Windows Backup	You install a new application. The application causes system issues. You must revert to the state that the computer was in before you installed the application.	
PC Refresh		

Correct Answer:

Recovery options	Answer Area	Recovery option
	Scenario	
System Restore	You install a new driver. The new driver causes system issues. You need to roll back the driver installation.	System Restore
Reset this PC	You need to quickly revert back to the original computer state. You must keep personal files. You must remove apps and settings.	PC Refresh
File History	You need to quickly revert back to the original PC state. You must remove personal files, apps, and settings.	Reset this PC
Windows Backup	You install a new application. The application causes system issues. You must revert to the state that the computer was in before you installed the application.	System Restore
PC Refresh		

QUESTION 5

HOTSPOT

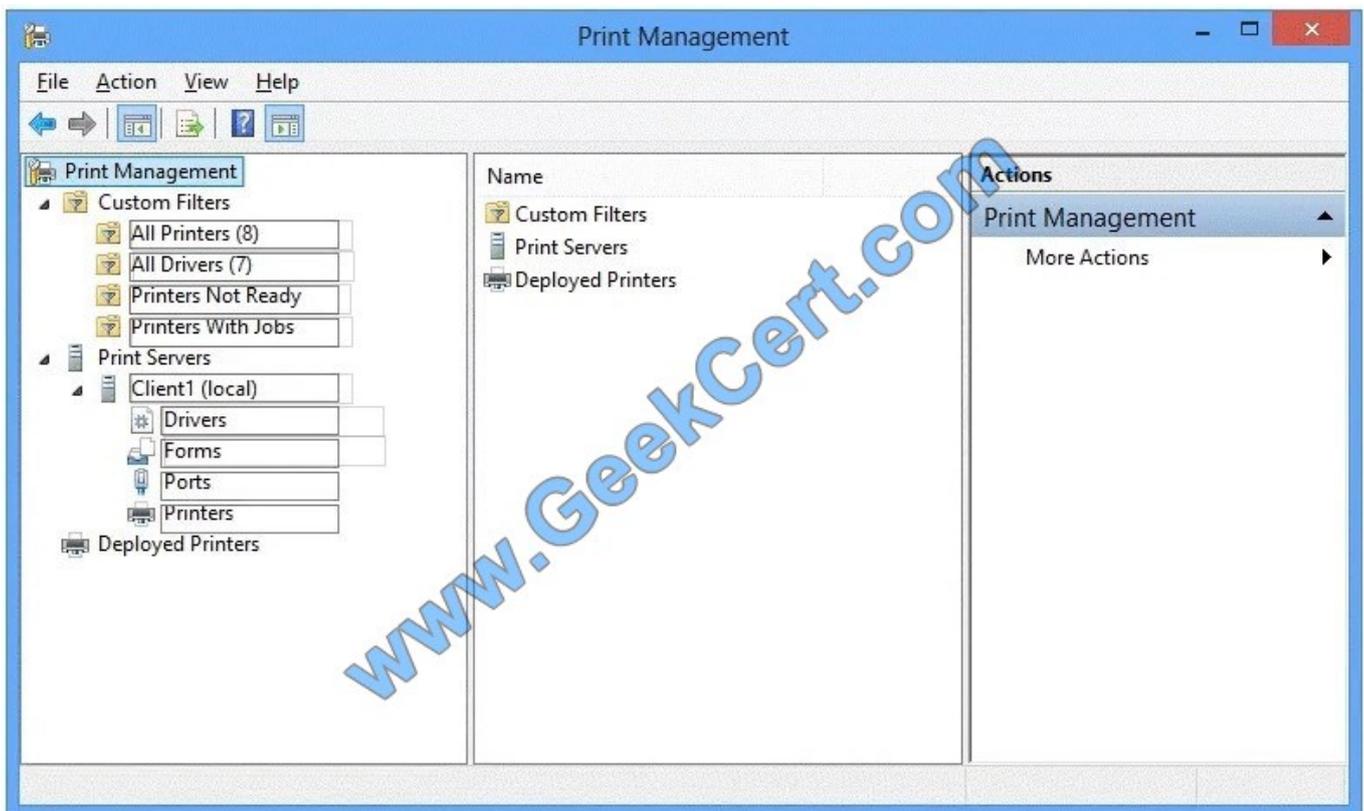

You administer Windows 10 Enterprise computers in your company network, including a computer named Wst1. Wst1 is configured with multiple shared printer queues.

Wst1 indicates hardware errors. You decide to migrate the printer queues from Wst1 to a new computer named Client1.

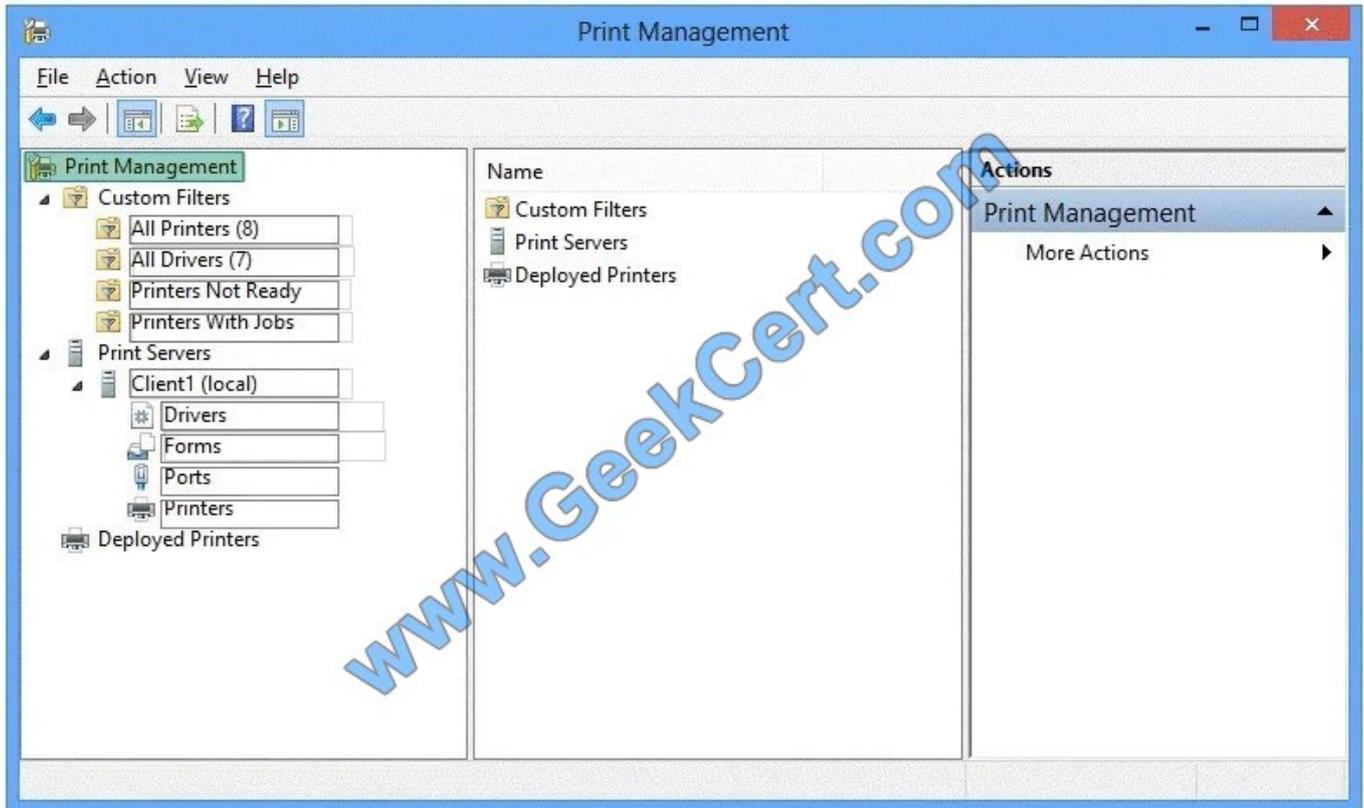

You export the printers on Wst1 to a file. You need to import printers from the file to Client1.

From the Print Management console, which Print Management node should you select? To answer, select the appropriate node in the answer area.

Hot Area:

Correct Answer:

We have exported the printers on Wst1 to a file. To import printers from the file to Client1, we use the Printer Migration Wizard.

Right-click Print Management, and then click Migrate Printers to open the Printer Migration Wizard. Select Import printer queues and printer drivers from a file, and select the export file. Then complete the wizard.
