### QUESTION 1

You manage an Active Directory Domain Services (AD DS) domain that has 500 devices. All devices run Windows 7 Enterprise Edition. You deploy System Center 2012 R2 Configuration Manager SP1.

You plan to upgrade all devices to Windows 10 Enterprise and encrypt the devices by using Microsoft BitLocker Administration and Monitoring (MBAM). Data secured with BitLocker must not be stored on USB devices.

You need to ensure that existing devices are ready for the upgrade.

What should you do?

- A. Implement MBAM in the domain. Create an MBAM group policy and apply the policy to all devices.
- B. Verify that the System Center Configuration Manager agent is installed on all devices.
- C. In the system BIOS, verify that all devices have a Trusted Platform Module (TPM) 1.2 or higher chip. Enable the TPM chip.
- D. Integrate MBAM with System Center Configuration Manager. Deploy the BitLocker prepare task sequence to all laptop computers.
- E. From System Center Configuration Manager, create a custom deploy task sequence that enables MBAM. Deploy the task sequence to all Windows 7 devices.

Correct Answer: B

---

### QUESTION 2

HOTSPOT

A Sales department user overwrites a version of a Word document on their device.

You need to implement the required Group Policy settings.

How should you configure the Group Policy Objects (GPOs)? To answer, select the appropriate option from each list in the answer area.

Hot Area:

**Answer Area**

Users	Removable Storage Access
Sales	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <p>Removable Disks Deny Write Access All Removable Storage classes: Deny all access Tape Drives: Deny Write Access Removable Disks: Deny Read Access</p> </div>
HR	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <p>Removable Disks Deny Write Access All Removable Storage classes: Deny all access Tape Drives: Deny Write Access Removable Disks: Deny Read Access</p> </div>

Correct Answer:

**Answer Area**

Users	Removable Storage Access
Sales	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <p style="background-color: #e0ffe0;">Removable Disks Deny Write Access</p> <p>All Removable Storage classes: Deny all access Tape Drives: Deny Write Access Removable Disks: Deny Read Access</p> </div>
HR	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid black;">▼</div> <p style="background-color: #e0ffe0;">Removable Disks Deny Write Access</p> <p>All Removable Storage classes: Deny all access Tape Drives: Deny Write Access Removable Disks: Deny Read Access</p> </div>

**QUESTION 3**

The company apps need to be made available to all mobile devices. You recently published the new applications in Azure. What should you do?

A. In the Microsoft Azure admin portal, add users to the app collection for the apps.

- B. In the Microsoft Azure admin portal, enable multi-factor authentication.
- C. Instruct users to download the Remote Desktop app from the appropriate vendor app store.
- D. Run the following Windows PowerShell cmdlet: Update-AzureRemoteAppCollection

Correct Answer: D

#### QUESTION 4

DRAG DROP

Your organization needs to implement a Dynamic Access Control (DAC) plan that includes user and device claims.

The domain controllers have not been enabled to provide claims and compound authentication.

You need to configure the Default Domain Controller's Group Policy Object to provide claims and compound authentication.

You decide to first enable the domain controllers to provide claims and compound authentication on request.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

**Answer Area**

Actions	Sequence
Select the <b>Always provide claims</b> option.	
Select the <b>KDC support for claims, compound authentication, and Kerberos armoring</b> option.	➔
Edit the Default Domain Controllers policy.	⬅
Edit the Default Domain policy.	⬆

Correct Answer:

### Answer Area

#### Actions

#### Sequence

Edit the Default Domain Controllers policy.

Select the **KDC support for claims, compound authentication, and Kerberos armoring** option.

Edit the Default Domain policy.

Select the **Always provide claims** option.

### QUESTION 5

A Datum Corporation plans to implement Mobile Device Management (MDM). The company uses the domain name Adatum.com. The company plans to integrate Microsoft Intune with System Center 2012 R2 Configuration Manager. Configuration Manager uses the public IP address 102.157.31.12. Domain Name System (DNS) is not configured to support MDM. You need to create a DNS record for automatically enrolling the device. Which DNS record type should you create?

- A. a CNAME record named EnterpriseEnrollment.adatum.com that points to manage.microsoft.com.
- B. a CNAME record named MDMErollment.adatum.com that points to manage.microsoft.com.
- C. a PTR record named 102.157.31.12 that points to EnterpriseEnrollment.Adatum.com
- D. an A resource record named autoenroll.adatum.com that points to 102.157.31.12

Correct Answer: A
