### QUESTION 1

You are planning the implementation of two new servers that will be configured as RADIUS servers.

You need to recommend which configuration must be performed on the VPN servers. The solution must meet the technical requirements.

What should you do on each VPN server?

- A. Add a RADIUS client.
- B. Install the Health Registration Authority role service.
- C. Enable DirectAccess.
- D. Modify the authentication provider.

Correct Answer: D

\*

Implement RADIUS authentication for VPN connections.

\*

The new sales.contoso.com domain will contain a web application that will access data from a Microsoft SQL Server located in the contoso.com domain. The web application must use integrated Windows authentication. Users\ credentials must be passed from the web applications to the SQL Server.

---

### QUESTION 2

You need to recommend an IP addressing solution for the virtual machines hosted in HostGroup2. The solution must meet the technical requirements. What should you include in the recommendation?

- A. scope policies
- B. reservations
- C. server options
- D. filters

Correct Answer: A

Ensure that virtual machines hosted in HostGroup2 receive IP addresses from the DHCP server in the Seattle site. The IP addresses for the virtual machines will be from a different range than the IP addresses used for physical machines.

---

### QUESTION 3

You need to recommend a solution for the sales reports. What should you include in the recommendation?

- A. BranchCache in distributed cache mode
- B. Offline files
- C. BranchCache in hosted cache mode
- D. Distributed File System (DFS)

Correct Answer: A

\*

Scenario: Server3 has a shared folder that contains sales reports. The sales reports are read frequently by the users in both offices. The reports are generated automatically once per week by an enterprise resource planning (ERP) system.

\*

BranchCache is designed to reduce WAN link utilization and improve application responsiveness for branch office workers who access content from servers in remote locations. Branch office client computers use a locally maintained cache of data to reduce traffic over a WAN link. The cache can be distributed across client computers (Distributed Cache mode) or can be housed on a server in the branch (Hosted Cache mode).

---

#### QUESTION 4

Your company plans to deploy a remote access solution to meet the following requirements:

1.

Ensure that client computers that are connected to the Internet can be managed remotely without requiring that the user log on.

2.

Ensure that client computers that run Windows Vista or earlier can connect remotely.

3.

Ensure that non-domain-joined computers can connect remotely by using TCP port 443.

You need to identify which remote access solutions meet the requirements.

Which solutions should you identify?

To answer, drag the appropriate solution to the correct requirement in the answer area. Each solution may be used once, more than once, or not at all.

Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Solutions	Answer Area
DirectAccess	Solution Ensure that client computers that are connected to the Internet can be managed remotely without requiring that the user log on.
L2TP VPN	Solution Ensure that client computers that run Windows Vista or earlier can connect remotely.
SSTP VPN	Solution Ensure that non-domain-joined computers can connect remotely by using TCP port 443.

Correct Answer:

Solutions	Answer Area
	DirectAccess Ensure that client computers that are connected to the Internet can be managed remotely without requiring that the user log on.
	L2TP VPN Ensure that client computers that run Windows Vista or earlier can connect remotely.
	SSTP VPN Ensure that non-domain-joined computers can connect remotely by using TCP port 443.

Note:

\*Direct is supported in Windows 7 and newer so second answer is not correct it should be L2TP VPN.

\*

DirectAccess, introduced in the Windows 7 and Windows Server 2008 R2 operating systems, allows remote users to securely access enterprise shares, web sites, and applications without connecting to a virtual private network (VPN).

\*

Both L2TP and IPsec must be supported by both the VPN client and the VPN server. Client support for L2TP is built in to the Windows Vista® and Windows XP remote access clients, and VPN server support for L2TP is built in to members of the Windows Server® 2008 and Windows Server 2003 family.

\*

Secure Socket Tunneling Protocol (SSTP) is a form of VPN tunnel that provides a mechanism to transport PPP or L2TP traffic through an SSL 3.0 channel. SSL provides transport-level security with key-negotiation, encryption and traffic integrity checking. The use of SSL over TCP port 443 allows SSTP to pass through virtually all firewalls and proxy servers.

### QUESTION 5

You need to generate the required report Which tool should you use?

- A. Microsoft Deployment Toolkit (MDT)
- B. Microsoft Desktop Optimization Pack (MDOP)
- C. Microsoft Assessment and Planning Toolkit (MAP)
- D. Application Compatibility Toolkit (ACT)

Correct Answer: C

Scenario: Consolidation reports

The company requires a report that describes the impact of consolidation. The report must provide the following information:

- 

An inventory of the existing physical server environment

- 

Visual charts that show the reduction of physical servers
