QUESTION 1

You need to recommend a storage solution for the Hyper-V hosts. The configuration must meet the technical requirements. What should you include in the recommendation?

- A. Cluster Shared Volumes (CSVs) and Hyper-V replicas
- B. Cluster Shared Volumes (CSVs) and Failover Clustering
- C. pass-through disk and Network Load balancing (NLB)
- D. iSCSI targets and Hyper-V replicas

Correct Answer:

<https://blogs.technet.microsoft.com/cedward/2013/11/05/windows-server-2012-smb-multichannel-and-csv-redirected-traffic-caveats/>

QUESTION 2

Your network contains four failover clusters. The clusters are configured as shown in the following table.

Cluster name	Nodes	Platform
FC1	four nodes	Hyper-V
FC2	six nodes	Hyper-V
FC3	four nodes	VMware ESX 4.0
FC4	eight nodes	Citrix XenServer

You manage all of the clusters and all of the servers by using Microsoft System Center 2012 Virtual Machine Manager (VMM).

You plan to implement Dynamic Optimization for the virtual machines. You need to recommend a configuration for the planned implementation. What should you recommend?

- A. Dynamic Optimization on all of the clusters. Virtual machines that are balanced across the nodes in the clusters.
- B. Dynamic Optimization on FC1 and FC2 only. Virtual machines that are balanced across the nodes in the clusters.
- C. Dynamic Optimization on all of the clusters. Virtual machines that are balanced across the clusters.
- D. Dynamic Optimization on FC1, FC2, and FC3 only. Virtual machines that are balanced across the clusters.

Correct Answer: D

QUESTION 3

Your company has three offices. The offices are located in Seattle, London, and Tokyo.

The network contains an Active Directory domain named northwindtraders.com. Each office is configured as an Active Directory site.

System Center 2012 R2 Operations Manager is deployed to the domain. The servers in all three sites are monitored by using Operations Manager.

The company has a web site for its customers. The web site requires users to sign-in.

You need to recommend a solution to monitor the web site.

The solution must meet the following requirements:

Monitor the availability of the web site from locations in North America, Europe, Asia, and Australia.

Monitor multi-step requests to the web site.

Use a central console for monitoring.

What should you include in the recommendation?

- A. Import the System Center Global Services Monitoring Management Pack and add the Web Application Availability Monitoring monitoring type.
- B. Add the Web Application Transaction monitoring type and configure watcher nodes.
- C. Add the TCP Port monitoring type and configure watcher nodes.
- D. Import the System Center Global Services Monitor Management Pack and add the Visual Studio Web Test Monitoring monitoring type.

Correct Answer: D

QUESTION 4

Your network contains an Active Directory domain named contoso.com. The domain contains a Network Load Balancing (NLB) cluster named Cluster1 that contains four nodes.

Cluster1 hosts a web application named App1. The session state information of App1 is stored in a Microsoft SQL Server 2012 database.

The network contains four subnets.

You discover that all of the users from a subnet named Subnet1 always connect to the same NLB node.

You need to ensure that all of the users from each of the subnets connect equally across all of the nodes in Cluster1.

What should you modify from the port settings?

To answer, select the appropriate setting in the answer area.

Hot Area:

Add/Edit Port Rule

Cluster IP address
192.168.1.111 or ☐ All

Port range
From: 80 To: 80

Protocols
☒ TCP ☐ UDP ☐ Both

Filtering mode
☒ Multiple host Affinity: ☐ None ☐ Single ☒ Network
☐ Timeout(in minutes): 0

☐ Single host

☐ Disable this port range

Correct Answer:

Add/Edit Port Rule

Cluster IP address
192.168.1.111 or ☐ All

Port range
From: 80 To: 80

Protocols
☒ TCP ☐ UDP ☐ Both

Filtering mode
☒ Multiple host Affinity: ☐ None ☐ Single ☒ Network
☐ Timeout(in minutes): 0

☐ Single host

☐ Disable this port range

QUESTION 5

You administer an Active Directory Domain Services environment. There are no certification authorities (CAs) in the environment.

You plan to implement a two-tier CA hierarchy with an offline root CA.

You need to ensure that the issuing CA is not used to create additional subordinate CAs.

What should you do?

- A. In the CAPolicy.inf file for the issuing CA, enter the following constraint: PathLength=1
- B. In the CAPolicy.inf file for the root CA, enter the following constraint: PathLength=1
- C. In the CAPolicy.inf file for the root CA, enter the following constraint: PathLength=2
- D. In the CAPolicy.inf file for the issuing CA, enter the following constraint: PathLength=2

Correct Answer: B
