QUESTION 1

Your network contains 100 virtual desktops that are hosted on a Remote Desktop Services (RD5) collection. All RDS servers run Windows Server 2012.

You need to recommend changes to the Remote Desktop environment to meet the following requirements:

Minimize the amount of bandwidth used by Remote Desktop sessions. Minimize the amount of hardware resources used by the RDS servers.

What should you recommend changing?

More than one answer choice may achieve the goal. Select the BEST answer.

A. The screen resolution settings

- B. The Configure RemoteFx adaptative graphics Group Policy object (GPO) setting
- C. The Configure RemoteFx lossless graphics data Group Policy object (GPO) setting
- D. The Configure compression for RemoteFx data Group Policy object (GPO) setting

Correct Answer: B

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains a server that runs Windows Server 2012.

You have an offline image of Windows 8.

You download and extract 10 updates from Microsoft Update.

You plan to deploy the updates to the image.

You need to identify which updates can be fully installed while the image is offline.

What should you do?

A. On Server1, run dism.exe and specify the /mountrw parameter and the /get-mountedwiminfo parameter.

B. On Server1, run the Mount-WindowsImage cmdlet, and then run the Get-WindowsImage cmdlet.

C. On Server1, run the Mount-WindowsImage cmdlet, and then run the Get-WindowsPackage cmdlet.

D. On Server1, run dism.exe and specify the /mount parameter and the /get-wiminfo parameter.

Correct Answer: C

QUESTION 3

Your network contains an Active Directory domain named contoso.com.

You have 20 secure client computers that do not have DVD drives or USB ports. The client computers run Windows XP and use an application named App1. App1 only runs on Windows XP. The client computers have multiple partitions.

You need to configure the client computers to dual-boot between Windows XP and Windows 8. You copy the Windows 8 source files to a network share.

What should you do next from the network share?

- A. Copy Install.wim to the local hard disk drive, and then run bcdedit.exe.
- B. Copy Boot.wim to the local hard disk drive, and then run bcdboot.exe.
- C. Run dism.exe.
- D. Run setup.exe.

Correct Answer: D

QUESTION 4

You need to ensure that when the sales users connect to their virtual desktop by using RD Web Access, the users can select the Experience setting manually from the RD Web Access website.

What should you include in the solution?

- A. On the RD Connection Broker Host servers, install the Quality Windows Audio Video Experience feature.
- B. On the RD Web Access servers, modify the Default.aspx file located in %SYSTEMROOT %\Web \RDWeb\Pages.
- C. On the RD Virtualization Host servers, install the Quality Windows Audio Video Experience feature.

D. On the RD Web Access servers, modify the Web.config file located in %SYSTEMROOT %\Web \RDWeb\Pages.

Correct Answer: D

QUESTION 5

Your company has a main office and a branch office.

The network contains an Active Directory domain named contoso.com. The domain contains two servers named Server1 and Server2 that run Windows Server 2012. Server1 has the Windows Server Update Services server role installed and

configured.

Server1 is located in the main office. Server2 is located in the branch office.

You plan to install Windows Server update Services (WSUS) on Server2.

You need to configure the update infrastructure to meet the following requirements:

Only updates approved by the administrator in the main office must be installed on client computers in the branch office.

The local administrator in the branch office must not be able to approve updates. Bandwidth usage between the offices must be minimized.

What should you do?

A. Configure Server2 as a downstream server in autonomous mode.

B. On Server1, configure a computer group that contains the client computers in the branch office, and then set the approvals to Automatic.

- C. On Server1, configure a client computer group that contains Server2, and then set the approvals to Automatic.
- D. Configure Server2 as a downstream server in replica mode.

Correct Answer: D
