### QUESTION 1

Your network contains an Active Directory domain named contoso.com. The domain contains client computers that run Windows 7 Enterprise and Windows 8 Enterprise.

Your company identifies the desktop security requirements shown in the following table.

User group name	Software restriction
Group1	Group members must be prevented from running Windows Installer files that originate from Restricted sites.
Group2	Group members must be prevented from running Windows Installer files that originate from Trusted sites.
Group3	Group members must be prevented from running executables located in C:\Temp.
Group4	Group members must be prevented from running executables located in C:\Software.
Group5	Group members must be prevented from running executables located in C:\Temp.
Group6	Group members must be prevented from running executables located in C:\Software.

You need to recommend the number of Group Policy objects (GPOs) that must be created to meet the desktop security requirements.

The solution must use the least amount of GPOs.

How many group policy objects should you recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. 1
- B. 2
- C. 3
- D. 6

Correct Answer: C

### QUESTION 2

Your network contains a main datacenter and a disaster recovery datacenter. The main datacenter contains a Virtual Desktop Infrastructure (VDI). The Hyper-V hosts run on a failover cluster.

The virtual desktop infrastructure contains 50 personal virtual desktops that have custom settings.

In the disaster recovery datacenter, you implement a Hyper-V failover cluster.

You plan to implement a business continuity solution for the 50 personal virtual desktops.

The virtual desktops must meet the following requirements:

Replicate to the Hyper-V cluster in the disaster recovery datacenter. Connect to the local network resources in the disaster recovery datacenter if a failover occurs.

Use application-consistent replicas.

You need to identify what must be implemented to meet the requirements of the planned deployment.

What should you identify? To answer, drag the appropriate task to the correct requirement in the answer area. Each task may be used once, more than once, or not at all. Additionally, you may need to drag the split bar between panes or scroll to view content.

Select and Place:

Tasks	Answer Area
Add a virtual SAN adapter.	Replicate to the Hyper-V cluster in the disaster recovery datacenter. Task
Implement Recovery History.	Connect to the local network resources in the disaster recovery datacenter if a failover occurs. Task
Modify the Failover TCP/IP Settings.	Use application-consistent replicas. Task
Implement the Hyper-V Replica Broker role.	

Correct Answer:

Tasks	Answer Area
Add a virtual SAN adapter.	Replicate to the Hyper-V cluster in the disaster recovery datacenter. Implement the Hyper-V Replica Broker role.
	Connect to the local network resources in the disaster recovery datacenter if a failover occurs. Modify the Failover TCP/IP Settings.
	Use application-consistent replicas. Implement Recovery History.

### QUESTION 3

Your network contains multiple servers that run Windows Server 2012. The network contains a Windows Server Update Services (WSUS) infrastructure.

On a server named Server1, you create and deploy images by using Microsoft Deployment Toolkit (MDT) 2012.

You need to recommend a solution to ensure that the available updates are applied during the deployment of the image.

What should you do?

- A. From the WSUS Administration console, configure the personalization settings, and then create a computer group.
- B. From Server1, edit the task sequence, and then modify the Customsettings.ini file.
- C. From the WSUS Administration console, configure the personalization settings, and then configure the classifications.
- D. From Server1, edit the task sequence, and then modify the Bootstrap.ini file.

Correct Answer: B

---

#### QUESTION 4

You publish App3 as a RemoteApp program.

You need to configure App3 to meet the application requirements.

What should you do?

- A. On the RD Session Host servers, modify the Windows Installer RDS Compatibility setting. On client computers, modify the Remote Desktop Connection settings.
- B. From Remote Desktop Services, modify the properties of the App3 RemoteApp program. On the client computers, configure the RemoteApp and Desktop Connection feed.
- C. From Remote Desktop Services, modify the properties of the collection to which the App3 RemoteApp program is published. On the client computers, configure the RemoteApp and Desktop Connection feed.
- D. From Remote Desktop Services, modify the properties of the collection to which the App3 RemoteApp program is published. On client computers, modify the Remote Desktop Connection settings.

Correct Answer: B

---

#### QUESTION 5

You need to recommend a solution for the HR users that meets the application requirements. What should you recommend?

- A. Client Hyper-V

- B. An App-V 5.0 client on an RD Session Host server
- C. An App-V 5.0 client
- D. A RemoteApp program on an RD Session Host server

Correct Answer: A

App-V does not support 16bit applications.

RemoteApp is running from a 64bit OS; 16bit apps are not supported on a 64bit OS.
