QUESTION 1

Your network contains an Active Directory domain named contoso.com. The domain has Microsoft System Center 2012 Configuration Manager deployed.
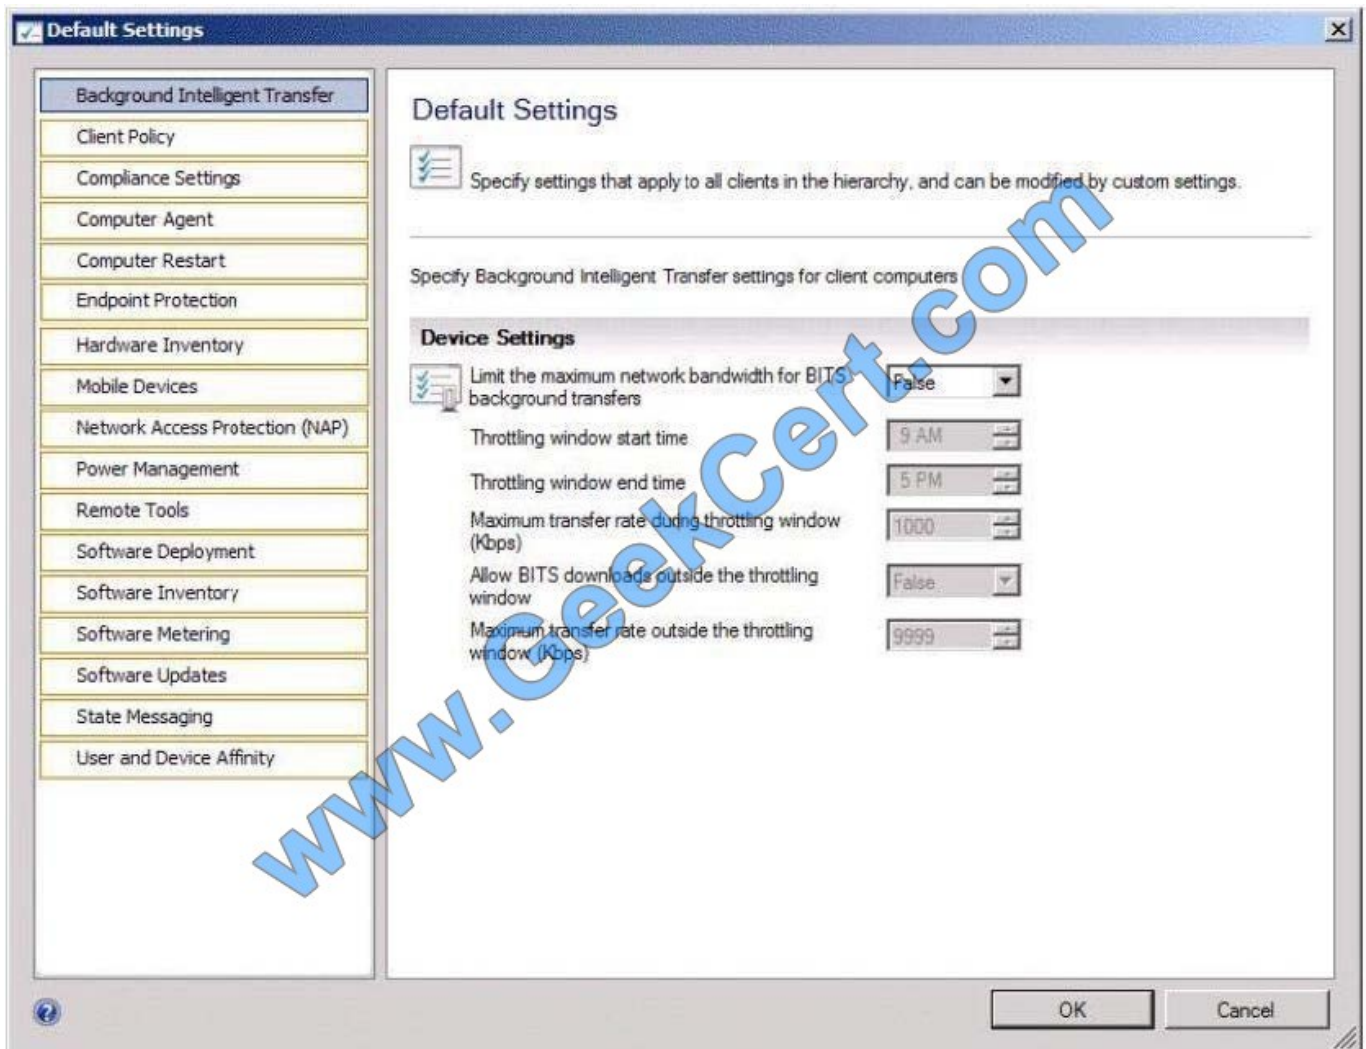

You plan to implement Asset Intelligence reports by using Configuration Manager.

You discover that the inventory data required for the Asset Intelligence reports is missing.
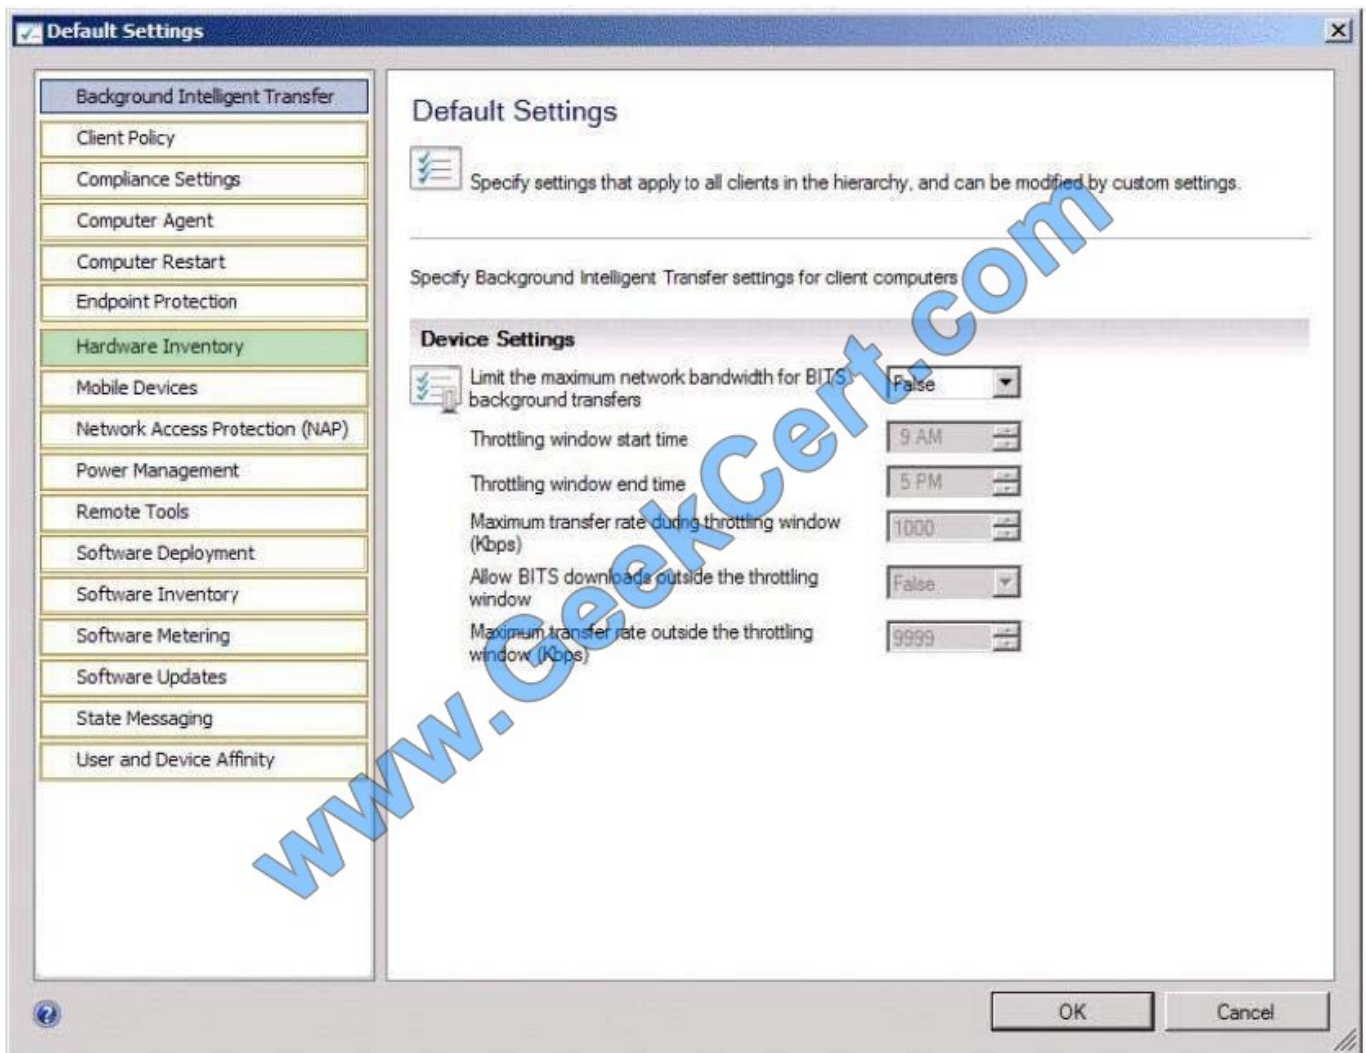

You need to configure Configuration Manager to collect the inventory data required for the Asset Intelligence reports.

What should you enable in the default settings of the client agent? To answer, select the appropriate setting in the answer area.

Hot Area:

Correct Answer:

QUESTION 2

Your network contains an Active Directory domain named contoso.com. The domain contains 2,000 client computers that run either Windows 7 or Windows 8.

Version 1.0 of a custom application named App1 is deployed to all of the client computers by using a Group Policy object (GPO).

You obtain version 2.0 of App1.

You need to upgrade App1 to version 2.0 on the client computers that run Windows 8 only. App1 must be upgraded when each client computer restarts.

What should you do? More than one answer choice may achieve the goal. Select the BEST answer.

A. Assign version 2.0 of App1 by using a new GPO. Configure WMI filtering on the GPO.

B. Publish version 2.0 of App1 by using a new GPO. Configure WMI filtering on the GPO.

C. Publish version 2.0 of App1 by using a new GPO. Configure security filtering on the GPO.

D. Assign version 2.0 of App1 by using a new GPO. Configure security filtering on the GPO.

Correct Answer: A

Publishing an application only makes the application available and does not install the app. WMI filtering allows you to specify OS.

QUESTION 3

You identify a hotfix published on the Microsoft Support website. The hotfix applies to a locally installed application.

You need to apply the hotfix to all of the client computers that have the application installed.

What should you do?

A. Create a Group Policy startup script that runs wuaclt.exe.

B. Run wsusutil.exe and specify the import switch.

C. Create a Group Policy startup script that runs wusa.exe.

D. Run wsusutil.exe and specify the use custom website switch.

Correct Answer: C

http://support.microsoft.com/kb/934307

WUSA can be used to script hotfix installations. Hotfixes that are downloaded from MS but not available as part of the standard update catalog cannot be installed with WSUS.

QUESTION 4

Your network contains servers that run Windows Server 2012 and client computers that run Windows 8.

You plan to use Microsoft Application Virtualization (App-V) 5.0 as an application virtualization platform.

You have an application named App1. App1 requires a system restart during its installation. You install the App-V Sequencer on a client computer named CL1 that runs Windows 8.

You need to sequence App1.

Which three actions should you perform? To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Restart the App-V Sequencer and select **Modify an Existing Virtual Application Package**. Update the App1.appv package.	
From the App-V Sequencer, select App1.exe as an installer for the new virtual application package.	
Run an installation of App1.exe and complete the installation.	
Restart CL1.	
From the App-V Sequencer, select **I am finished installing**.	

Correct Answer:

Actions	Answer Area
Restart the App-V Sequencer and select **Modify an Existing Virtual Application Package**. Update the App1.appv package.	From the App-V Sequencer, select App1.exe as an installer for the new virtual application package.
	Run an installation of App1.exe and complete the installation.
	From the App-V Sequencer, select **I am finished installing**.
Restart CL1.	

Box 1: From the App-V Sequencer, select App1.exe as an installer for the new virtual application package.

Box 2: Run an installation of App1.exe and complete the installation.

Box 3: From the App-V Sequencer, select I am finished installing.

QUESTION 5

You need to install Office 2010 on virtual desktops that run Windows 8. The virtual desktops will be used by the research users in the Miami office. The solution must meet the technical requirements. What should you do first?

A. Run the App-V client setup and specify the /sharedcontentstoremode switch.

B. Run the App-V client setup and specify the /migrationmode switch.

C. Run the Office Customization Tool (OCT).

D. Run the Office Migration Planning Manager (OMPM).

Correct Answer: A
