QUESTION 1

You administer several SQL Server 2008 instances.

You need to ensure that all SQL Server instances are consistently configured for the following aspects:

Naming conventions

Security settings

Force index creation

Avoidance of data fragmentation

What should you do?

- A. Use the Database Engine Tuning Advisor.
- B. Use the SQL Server Configuration Manager.
- C. Create a policy in Microsoft SQL Server Management Studio.
- D. Create a maintenance plan in Microsoft SQL Server Management Studio.

Correct Answer: C

QUESTION 2

You upgrade an instance of Microsoft SQL Server 2000 to SQL Server 2008. The SQL Server Agent service is configured to use the LocalSystem account. A job uses a CMDExec step to access a file located on a remote network share. After the upgrade, the job step fails to complete execution. You need to configure the job step so that it can successfully complete execution. What should you do?

- A. Configure a certificate.
- B. Configure the job step to use a proxy account.
- C. Configure the SQL Server Agent service to use a local Windows account.
- D. Configure the SQL Server Agent service to use the NetworkService account.

Correct Answer: B

QUESTION 3

You maintain a SQL Server 2008 instance that contains a database named Finance. The most recent full backup was taken at 13:00 hours, a differential backup was taken at 15:00 hours, and database snapshots were created at 16:00

hours and at 17:00 hours. The backups and the database snapshots are stored on a different disk from the database files. The hard disk that contains the database files fails at 17:02 hours. You need to restore the Finance database by ensuring minimal data loss. What should you do?

- A. Restore the full backup.
- B. Restore the database snapshot from 16:00 hours.
- C. Restore the database snapshot from 17:00 hours.
- D. Restore the full backup and the differential backup.

Correct Answer: D

QUESTION 4

You maintain a SQL Server 2008 instance that runs on a computer that hosts several applications. You configure the SQL Server Agent service to run by using the SERVER1\AGENT account. You create a job named MailingList that requires a file to be written to a file server. The job fails to run because it does not have appropriate access to the file server. You plan to configure the SQL Server Agent service. You need to perform the configuration such that only the SQL Server Agent service has read and write access to the file server. Which account type should you use?

- A. Domain account
- B. Local System account
- C. Local Service account
- D. Network Service account

Correct Answer: A

QUESTION 5

You maintain a SQL Server 2008 instance that contains a database named Finance. The Finance database currently contains 100 GB of data. On an average, 1 GB of data is modified or inserted daily. The recovery model of the Finance database is set to Simple. Business requirements specify that data loss of more than two hours worth of transactions during business hours is unacceptable. You need to select a backup strategy that uses the least amount of disk space by adhering to the business requirements. What should you do?

- A. Perform a full database backup once daily.
- B. Perform a full database backup once daily. Perform a differential backup every two hours during business hours.
- C. Perform a full database backup once daily. Perform a transaction log backup every two hours during business hours.
- D. Perform a full database backup once every week. Perform a differential backup once daily. Perform a transaction log backup every two hours during business hours.

Correct Answer: B
