QUESTION 1

You plan to deploy SQL Server 2012. You must create two tables named Table 1 and Table 2 that will have the following specifications: Table1 will contain a date column named Column1 that will contain a null value approximately 80 percent of the time.

Table2 will contain a column named Column2 that is the product of two other columns in Table2. Both Table1 and Table2 will contain more than 1 million rows. You need to recommend which options must be defined for the columns. The solution must minimize the storage requirements for the tables. Which options should you recommend? To answer, drag the appropriate options to the correct column in the answer area.

Select and Place: Select and Place:

Options	Answer Area
Sparse	Column1 <input type="text" value="Option"/>
Computed	Column2 <input type="text" value="Option"/>
Persisted computed	

www.GeekCert.com

Correct Answer:

Options	Answer Area
<input type="text"/>	Column1 <input type="text" value="Sparse"/>
<input type="text"/>	Column2 <input type="text" value="Computed"/>
<input type="text" value="Persisted computed"/>

QUESTION 2

You administer a SQL Server 2014 instance.

Users report that the SQL Server has seemed slow today. A large database was being restored for much of the day, which could be causing issues.

You want to write a query of the system views that will report the following:

Number of users that have a connection to the server Whether a user's connection is active

Whether any connections are blocked

What queries are being executed

Whether the database restore is still executing and, if it is, what percentage of the restore is complete

Which system objects should you use in your query to best achieve this task?

- A. sys.dm_exec_requests, sys.dm_exec_sessions, sys.objects
- B. sys.dm_exec_sessions, sys.dm_exec_query_stats, sys.dm_exec_query_text, sys.objects
- C. sys.sysprocesses, sys.dm_exec_query_text, sys.objects

D. sys.dm_exec_requests, sys.dm_exec_sessions, sys.dm_exec_query_text

Correct Answer: D

*

sys.dm_exec_requests

Returns information about each request that is executing within SQL Server.

*

sys.dm_exec_sessions

Returns one row per authenticated session on SQL Server. sys.dm_exec_sessions is a server- scope view that shows information about all active user connections and internal tasks. This information includes client version, client program name, client login time, login user, current session setting, and more.

*

sys.dm_exec_query_text

Returns the text of the SQL batch that is identified by the specified sql_handle.

sys.dm_exec_requests (Transact-SQL)

sys.dm_exec_sessions (Transact-SQL)

QUESTION 3

You are the senior database administrator at Contoso, Ltd. You manage a SQL Server 2014 Instance, with multiple databases used for reporting.

You have recently hired a junior database administrator. You want this person to be able to view the database structures on the server, but you do not want him or her to be able to make changes or see the data in the tables.

The new hire's login credentials are as follows: Login name: JFree Password: Jx672\$gse

You want the new hire to be required to change his password on his next login.

The code that is produced should execute no matter the initial database context in which it is started.

You need to write the code required to give the new hire only the desired access, using the smallest number of steps. Develop the solution by selecting and arranging the required code blocks in the correct order. You may not need all of the code blocks.

Select and Place:

Code Blocks	Answer Area
<pre>USE Tempdb; CREATE LOGIN [JFree] WITH PASSWORD = 'Jx672\$qse' MUST_CHANGE, CHECK_EXPIRATION = ON;</pre>	
<pre>USE MASTER; CREATE LOGIN [JFree] WITH PASSWORD = 'Jx672\$qse' CHANGE ON LOGIN, CHECK_EXPIRATION = ON;</pre>	
<pre>GRANT VIEW SERVER STATE TO [JFree];</pre>	
<pre>USE Master; CREATE LOGIN [JFree] WITH PASSWORD = 'Jx672\$qse' MUST_CHANGE, CHECK_EXPIRATION = ON;</pre>	
<pre>ALTER SERVER ROLE [securityadmin] ADD MEMBER [JFree];</pre>	
<pre>GRANT CONNECT ANY DATABASE TO [JFree]; GRANT SELECT ALL USER SECURABLES TO [JFree];</pre>	
<pre>GRANT VIEW ANY DEFINITION TO [JFree]; GRANT CONNECT ANY DATABASE TO [JFree];</pre>	

Correct Answer:

Code Blocks	Answer Area
<pre>USE Tempdb; CREATE LOGIN [JFree] WITH PASSWORD = 'Jx672\$qse' MUST_CHANGE, CHECK_EXPIRATION = ON;</pre>	
<pre>USE MASTER; CREATE LOGIN [JFree] WITH PASSWORD = 'Jx672\$qse' CHANGE ON LOGIN, CHECK_EXPIRATION = ON;</pre>	
<pre>GRANT VIEW SERVER STATE TO [JFree];</pre>	
<pre>ALTER SERVER ROLE [securityadmin] ADD MEMBER [JFree];</pre>	
<pre>GRANT CONNECT ANY DATABASE TO [JFree]; GRANT SELECT ALL USER SECURABLES TO [JFree];</pre>	

<pre>USE Master; CREATE LOGIN [JFree] WITH PASSWORD = 'Jx672\$qse' MUST_CHANGE, CHECK_EXPIRATION = ON;</pre>
<pre>GRANT VIEW ANY DEFINITION TO [JFree]; GRANT CONNECT ANY DATABASE TO [JFree];</pre>

QUESTION 4

You need to add a new column named Confirmed to the Employees table. The solution must meet the following

requirements: Have a default value of TRUE.

- A. ALTER TABLE Employees ADD Confirmed bit DEFAULT 0;
- B. ALTER TABLE Employees ADD Confirmed char(1) DEFAULT "1";
- C. ALTER TABLE Employees ADD Confirmed char(1) DEFAULT '\\0\\';
- D. ALTER TABLE Employees ADD Confirmed bit DEFAULT 1;

Correct Answer: D

QUESTION 5

You need to recommend a solution to allow application users to perform UPDATE operations on the database tables. The solution must meet the business requirements. What should you recommend?

- A. Create a user-defined database role and add users to the role.
- B. Create stored procedures that use EXECUTE AS clauses.
- C. Create functions that use EXECUTE AS clauses.
- D. Create a Policy-Based Management Policy.

Correct Answer: B
