QUESTION 1

You are creating a Multidimensional Expressions (MDX) calculation for Projected Revenue in a cube.

For Customer A, Projected Revenue is defined as 150 percent of the Total Sales for the customer. For all other customers, Projected Revenue is defined as 110 percent of the Total Sales for the customer.

You need to calculate the Projected Revenue as efficiently as possible.

Which calculation should you use? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS CASE WHEN [Customer].[Customer Name].CurrentMember.Name = "Customer A"
THEN [Measures].[Total Sales] * 1.5
ELSE [Measures].[Total Sales] * 1.1 END
```
- B.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS [Measures].[Total Sales];
SCOPE ([Customer].[Customer Name].MEMBERS, [Measures].[Projected Revenue]);
[Measures].[Total Sales] * 1.1;
IF [Customer].[Customer Name].CurrentMember.Name = "Customer A"
THEN [Measures].[Total Sales] * 1.5
END IF;
END SCOPE;
```
- C.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS [Measures].[Total Sales] * 1.1;
SCOPE ([Customer].[Customer Name].MEMBERS, [Measures].[Projected Revenue]);
[Customer].[Customer Name] & [Customer A] = [Measures].[Total Sales] * 1.5;
END SCOPE;
```
- D.

```
CREATE MEMBER CurrentCube.[Measures].[Projected Revenue]
AS [Measures].[Total Sales] * 1.1;
SCOPE ([Customer].[Customer Name] & [Customer A], [Measures].[Projected Revenue]);
THIS = [Measures].[Total Sales] * 1.5;
END SCOPE;
```

- A. Option A
B. Option B
C. Option C
D. Option D

Correct Answer: C

QUESTION 2

You are designing a strategy for an enterprise reporting solution that uses SQL Server Reporting Services (SSRS). Many of the SSRS reports will use common utilities and functions, including the following:

Report utility functions and business logic in code

Standardized report formatting properties such as fonts and colors for report branding

Formatting may change and new functions may be added as the reporting solution evolves.

You need to create a strategy for deploying the formatting and code across the entire enterprise reporting solution. You must also ensure that reports can be easily updated to reflect formatting and function changes.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

A.

Create a report as a template. Apply standardized formatting to the template. Store code in the Code section of the template.

B.

Build a web service that retrieves formatting properties and runs code. Call the web service through a report dataset.

C.

Store the formatting properties and code in database objects. Use stored procedures to populate a default value for report parameters and map each parameter to a corresponding formatting property.

D.

Create an assembly that contains formatting properties and code. Deploy the assembly on the Reporting Server and reference the assembly from each report.

Correct Answer: D

QUESTION 3

You need to implement the aggregation designs for the cube. What should you do?

A. Implement cache warming in SSAS via an SSIS package.

B. Use the Usage-Based Optimization Wizard.

C. Use the Aggregation Design Wizard.

D. Partition the cube by month.

Correct Answer: B

QUESTION 4

You are developing a SQL Server Analysis Services (SSAS) tabular project. A model contains tables and columns that

must not be visible to the user. The columns and tables cannot be removed because they are used in calculations. The calculations are used to calculate the budget and forecast for the current quarter.

You need to hide the tables and columns.

What should you do?

- A. Before adding the forecast calculations to the model, right-click the applicable tables and columns and select the Hide option.
- B. After adding the budget calculations to the model, in the Properties window for the applicable tables and columns, set the Visible property to True.
- C. Before adding the forecast calculations to the model, right-click the applicable tables and columns and select the Hide from Client Tools option.
- D. After adding the budget calculations to the model, in the Properties window for the applicable tables and columns, set the Enabled property to False

Correct Answer: C

QUESTION 5

You need to ensure that all reports meet the reporting requirements.

What is the best way to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Create a report part. Publish the report part to a server that has SSRS installed. Add the report part to each new report that is created.
- B. Create a report part. Publish the report part to a SharePoint site. Add the report part to each new report that is created.
- C. Create a report. Copy the report to source code control. Create each new report by using the report template in source code control.
- D. Create a report. Copy the report to the PrivateAssemblies\ProjectItems\ReportProject folder in the Visual Studio directory. Create each new report by using the locally stored report

Correct Answer: D
