QUESTION 1

Which of the following features can you install if you are installing SQL Server 2012 Enterprise edition on a computer running Windows Server 2008 R2 SP1 Enterprise edition in the Server Core configuration? (Choose all that apply.)

- A. Database Engine Services
- B. SQL Server Replication
- C. Analysis Services
- D. Reporting Services

Correct Answer: ABC

QUESTION 2

You have a SQL Server database named DB1.

You plan to load 10 million rows to DB1 by running bcp.exe.

You need to modify DB1 to minimize the amount of space required to store the transaction logs during the load operation. The solution must ensure that you can perform a point-in-time restore.

What data base setting should you modify?

- A. Compatibility level to 120
- B. Recovery model to Bulk logged
- C. Containment type to Partial
- D. Recovery model to Simple

Correct Answer: C

A contained database is a database that is isolated from other databases and from the instance of SQL Server that hosts the database.

The contained database feature is currently available only in a partially contained state. A partially contained database is a contained database that allows the use of uncontained features.

Incorrect Answers:

A: To change the compatibility level, select a different option from the list. The choices are SQL Server 2008 (100), SQL Server 2012 (110), or SQL Server 2014 (120).

B: Point-in-time recovery is not supported in the Bulk logged recovery model.

D: The Simple recovery model does not support Point-in-time restores

QUESTION 3

You administer a Microsoft SQL Server instance named SQL1 that hosts an OLTP database of 1 terabyte in size.

The database is modified by users only from Monday through Friday from 09:00 hours to 17:00 hours. Users modify more than 30 percent of the data in the database during the week.

Backups are performed as shown in the following schedule:

Type	Frequency
Full	Sunday at 20:00 hours
Differential	Monday through Friday at 20:00 hours
Log	Monday through Friday between 08:00 hours and 18:00 hours

The Finance department plans to execute a batch process every Saturday at 09:00 hours. This batch process will take a maximum of 8 hours to complete.

The batch process will update three tables that are 10 GB in size. The batch process will update these tables multiple times.

When the batch process completes, the Finance department runs a report to find out whether the batch process has completed correctly.

You need to ensure that if the Finance department disapproves the batch process, the batch operation can be rolled back in the minimum amount of time.

What should you do on Saturday?

- A. Perform a differential backup at 08:59 hours.
- B. Record the LSN of the transaction log at 08:59 hours. Perform a transaction log backup at 17:01 hours.
- C. Create a database snapshot at 08:59 hours.
- D. Record the LSN of the transaction log at 08:59 hours. Perform a transaction log backup at 08:59 hours.
- E. Create a marked transaction in the transaction log at 08:59 hours. Perform a transaction log backup at 17:01 hours.
- F. Create a marked transaction in the transaction log at 08:59 hours. Perform a transaction log backup at 08:59 hours.

Correct Answer: C

QUESTION 4

You have a server named SPS1 that has Microsoft SharePoint Server 2013 installed.

You have several Power View reports that are created in Microsoft Excel 2016.

You need to configure SPS1 to display the Power View reports.

Which two SQL Server components should you install on SPS1? Each correct answer presents part of the solution.

- A. SQL Server Analysis Services (SSAS) in Multidimensional and Data Mining Mode
- B. SQL Server Reporting Services (SSRS) in SharePoint mode
- C. the PowerPivot for SharePoint 2013 add-in
- D. SQL Server Analysis Services (SSAS) in SharePoint mode
- E. SQL Server Analysis Services (SSAS) in Tabular Mode

Correct Answer: BC

Power Pivot for SharePoint is a middle-tier data engine that loads, queries, and refreshes data models hosted in SharePoint. It is used to implement Power Pivot and Excel data models in SharePoint.

Power View is an interactive data exploration, visualization, and presentation experience that encourages intuitive ad-hoc reporting. Power View is a feature of Microsoft Excel 2013, and of Microsoft SharePoint Server 2010 and 2013 as part of the SQL Server 2012 Service Pack 1 Reporting Services Add-in for Microsoft SharePoint Server Enterprise Edition.

QUESTION 5

You work as a Database Administrator (DBA) at ABC.com. The infrastructure includes servers running Microsoft SQL Server 2012. All databases are hosted on a SAN (Storage Area Network).

You need to design a database solution for a new application.

You are tasked with designing a high-availability database solution.

The solution must include a single copy of the database to save disk space and the database must remain online in the event of a SQL Server failure. What should you include in your solution?

- A. You should include two servers configured as a failover cluster.
- B. You should include two servers and database mirroring.
- C. You should include two servers and log shipping.
- D. You should include two servers configure as a SQL Server Availability Group

Correct Answer: A
