QUESTION 1

You work as a senior database developer at ABC.com. The ABC.com network consists of a single domain named ABC.com. ABC.com makes use of Microsoft SQL Server 2012 in their environment.

You are hosting a training exercise for ABC.com\\'s junior database developers. You are currently discussing the Fuzzy Lookup transformation. You want to show them how to set parameters for the fuzzy lookup.

Which tab of the Fuzzy Lookup Transformation Editor should you access?

A. The General tab.

B. The Advance tab.

C. The Columns tab.

D. The Reference Table tab.

Correct Answer: B

QUESTION 2

You develop a SQL Server Integration Services (SSIS) project by using the Package Deployment Model. A package in the project extracts data from a Windows Azure SQL Database.

The package is deployed to SQL Server.

The package is not producing the desired results.

You need to generate the .mdmp and .tmp debug files in order to troubleshoot the issues.

What should you do?

A. Execute the catalog.add_data_tap stored procedure with the package execution_id.

B. Execute the catalog.create_execution_dump stored procedure with the package execution_id.

C. Run the DTEXEC utility with the /DumpOnError option.

D. Run the DTEXEC utility with the /Reporting V option.

Correct Answer: C

QUESTION 3

You have a database named Sales and a data warehouse named DataW.

From Sales, you plan to bulk insert to a table in DataW that is more than 2 TB. The process will insert a minimum of 11 million rows simultaneously.

You need to identify which data storage strategy must be used to minimize load times. Which data storage strategy

should you identify?

A. a nonclustered columnstore

B. FileStream

C. a durable In-Memory OLTP

D. non-durable staging table

E. a page-compressed heap

Correct Answer: D

Incorrect Answers:

C: In-Memory OLTP can significantly improve the performance of transaction processing, data ingestion and data load, and transient data scenarios. It does not fit a data warehouse scenario. References: http://henkvandervalk.com/how-to-load-data-fast-into-sql-server-2016

QUESTION 4

You are developing a SQL Server Integration Services (SSIS) package that imports data from a relational database to a data warehouse.

You are importing data from a relational table named Projects. The table has change data capture enabled on all columns.

You need to process only the most recent values from rows that have been inserted or updated since the previous execution of the package.

Which query should you use as the data source?

A.   SELECT * FROM cdc.fn_cdc_get_all_changes_Projects (@from_lsn, @to_lsn, N'all')

B.   SELECT * FROM cdc.fn_cdc_get_all_changes_Projects (@from_lsn, @to_lsn, N'all update old')

C.   SELECT * FROM cdc.Projects_CT WHERE @from_lsn >= _$start_lsn AND @to_lsn < _$start_lsn

D.   SELECT * FROM cdc.fn_cdc_get_net_changes_Projects (@from_lsn, @to_lsn)

A. Option A

B. Option B

C. Option C

D. Option D

Correct Answer: D

QUESTION 5

You administer a SQL Server Integration Services (SSIS) solution in the SSIS catalog. A SQL Server Agent job is used to execute a package daily with the basic logging level.

Recently, the package execution failed because of a primary key violation when the package inserted data into the destination table.

You need to identify all previous times that the package execution failed because of a primary key violation.

What should you do?

A. Use an event handler for OnError for the package.

B. Use an event handler for OnTaskFailed for the package.

C. View the job history for the SQL Server Agent job.

D. View the All Messages subsection of the All Executions report for the package.

E. Store the System::SourceID variable in the custom log table.

F. Store the System::ServerExecutionID variable in the custom log table.

G. Store the System::ExecutionInstanceGUID variable in the custom log table.

H. Deploy the project by using dtutil.exe with the /COPY DTS option.

I. Deploy the project by using dtutil.exe with the /COPY SQL option.

J. Deploy the .ispac file by using the Integration Services Deployment Wizard.

K. Create a SQL Server Agent job to execute the SSISDB.catalog.validate_project stored procedure.

L. Create a SQL Server Agent job to execute the SSISDB.catalog.validate_package stored procedure.

Correct Answer: D
