QUESTION 1

You are troubleshooting query performance for a SQL Server Analysis Services (SSAS) cube.

A user reports that a Multidimensional Expressions (MDX) query is very slow.

You need to identify the MDX query statement in a trace by using SQL Server Profiler.

Which event class should you use?

- A. Get Data From Aggregation
- B. Query Subcube
- C. Query Begin
- D. Progress Report Begin
- E. Calculate Non Empty Begin
- F. Execute MDX Script Begin

Correct Answer: C

QUESTION 2

You are managing a SQL Server Reporting Services (SSRS) instance. A website must pass credentials to the local security authority for Reporting Services.

You need to configure Reporting Services to issue a challenge/response when a connection is made without credentials.

Which authentication type should you configure in the RSReportServer.config file?

- A. RSWindowsKerberos only
- B. RSWindowsKerberos and RSWindowsNTLM
- C. RSWindowsBasic
- D. RSWindowsKerberos and RSWindowsNegotiate

Correct Answer: C

QUESTION 3

You are developing a SQL Server Analysis Services (SSAS) tabular project for a Power View solution.

You need to grant permission for salespersons to view only the data based on their sales territory.

What should you do?

- A. Create a member and then create a Data Analysis Expressions (DAX) filter.
- B. Create a member and then create a Multidimensional Expressions (MDX) filter.
- C. Use SQL Server Management Studio to create a role. Then create a Data Analysis Expressions (DAX) filter.
- D. Use SQL Server Management Studio to create a role. Then create a Multidimensional Expressions (MDX) filter.

Correct Answer: C

QUESTION 4

You are developing a tabular Business Intelligence Semantic Model (BISM) database based on a SQL Server database.

In the data source, the FactInternetSales table is partitioned by month. Data from the current month has been updated and new data has been inserted in the FactInternetSales table, in the DimProduct table, and in the DimCustomer table.

In the model, the FactInternetSales table is also partitioned by month.

You need to ensure that the model has the most recent data while minimizing the processing time.

What should you do?

- A. Process the latest FactInternetSales model table partition, the DimProduct table, and the DimCustomer table with the Process Clear processing option. Then process the database with the Process Data processing option.
- B. Process the latest FactInternetSales model table partition, the DimProduct table, and the DimCustomer table with the Process Clear processing option. Then process the database with the Process Full processing option.
- C. Process the latest FactInternetSales model table partition, the DimProduct table, and the DimCustomer table with the Process Defrag processing option. Then process the database with the Process Recalc processing option.
- D. Process the latest FactInternetSales model table partition, the DimProduct table, and the DimCustomer table with the Process Data processing option. Then process the database with the Process Defrag processing option.
- E. Process the latest FactInternetSales model table partition, the DimProduct table, and the DimCustomer table with the Process Data processing option. Then process the database with the Process Recalc processing option.

Correct Answer: D

QUESTION 5

You need to develop an SSRS report that retrieves currency exchange rate data. How should you configure the data source for the report?

- A. Use the Microsoft Azure SQL Database data source type and then set a username and password for the credentials.
- B. Use the SQL Server data source type and then set Windows authentication for the credentials.
- C. Use the Microsoft Azure SQL Database data source type and then set Windows authentication for the credentials.

D. Use the SQL Server data source type and then set a username and password for the credentials.

Correct Answer: A
