QUESTION 1

You have a SQL Server 2014 environment That includes four servers. The servers are configured as shown in the following table.

Server name	SQL Server 2014 edition	SQL Server version	Details
Server1	Enterprise	SQL Server 2014	A production Online Transaction Processing (OLTP) server
Server2	Web	SQL Server 2014	A test server
Server3	Standard	SQL Server 2012	A production report server
Server4	Express	SQL Server 2008 R2	A witness server

You plan to configure Policy-Based Management to enforce the following rules:

On Server1, enable SQL Server password policies and enable the default trace. On Server3, ensure that the names of user-defined stored procedures begin with the prefix "usp_" and ensure that all databases use a case-sensitive collation.

You need to recommend which server you must configure as a Central Management Server.

Which server should you recommend? (Each correct answer presents a complete solution.)

Choose all that apply.)

- A. Server1
- B. Server2
- C. Server3
- D. Seiver4

Correct Answer: AC

Explanation: Need Standard or Enterprise edition of SQL Server.

QUESTION 2

You are designing a database named DB1.

Changes will be deployed to DB1 every Wednesday night.

You need to recommend a strategy to deploy the changes to DB1. The strategy must meet the following requirements:

The strategy must not disrupt backup operations. DB1 must be online while the changes are deployed. You must be able to undo quickly any changes made to objects.

What should you recommend?

More than one answer choice may achieve the goal. Select the BEST answer.

- A. Perform a copy-only database backup before the changes are deployed. If the deployment fails, restore the database to another server and recover the original objects from the restored database.
- B. Create a database snapshot. If the deployment fails, recover the objects from the database snapshot.
- C. Create a database snapshot. If the deployment fails, revert the database to the database snapshot.
- D. Perform a full database backup before the changes are deployed. If the deployment fails, restore the database to another server and recover the original objects from the restored database.

Correct Answer: C

Explanation: Database Snapshots (SQL Server)

QUESTION 3

You use SQL Server 2014. You create a table within a database by using the following DDL:

```
CREATE TABLE OrderData
(
  OrderID INT IDENTITY(1,1) Primary Key Clustered,
  OrderDate SMALLDATETIME NOT NULL DEFAULT getDate(),
  CustomerID INT,
  IsTaxable INT,
  SubTotal SmallMoney DEFAULT (0),
  TaxAmount AS (Case IsTaxable when 1 then SubTotal * .0875 else NULL END),
  Freight SmallMoney,
  OrderReturnedDate DATE,
  OrderReturnedCustReason TEXT,
  OrderReturnedEval Varchar(MAX)
)
```

The following table illustrates a representative sample of data:

OrderID	OrderDate	CustomerID	IsTaxable	SubTotal	TaxAmount	Freight
1	11/13/2013 11:22	58465	NULL	\$ 25.99	NULL	\$ 5.40
2	11/15/2013 9:34	12588	NULL	\$ 42.00	NULL	NULL
3	12/1/2013 14:34	85477	NULL	\$ 23.99	NULL	\$ 4.85
4	12/17/2013 4:31	58742	NULL	\$ 19.00	NULL	NULL
5	1/3/2014 8:22	12477	NULL	\$ 13.50	NULL	\$ 5.40
6	1/5/2014 18:39	63214	NULL	\$ 5.69	NULL	NULL
7	1/15/2014 14:22	85471	NULL	\$ 18.99	NULL	\$ 7.85
8	1/19/2014 3:20	85412	NULL	\$ 65.77	NULL	NULL
9	1/22/2014 13:44	12588	NULL	\$ 22.38	NULL	\$ 7.35
10	1/28/2014 10:14	85471	1	\$ 24.99	\$ 2.19	\$ 5.40

The system is expected to handle 50 million orders a month over the next five years.

You have been instructed by your Team Lead to follow best practices for storage and performance in the utilization of

SPARSE columns.

Which columns should you designate as SPARSE? To answer, mark each column as SPARSE or NOT SPARSE in the answer area.

Hot Area:

Answer Area

Column Names	Sparse	Not Sparse
OrderID	<input type="radio"/>	<input type="radio"/>
OrderDate	<input type="radio"/>	<input type="radio"/>
CustomerID	<input type="radio"/>	<input type="radio"/>
IsTaxable	<input type="radio"/>	<input type="radio"/>
SubTotal	<input type="radio"/>	<input type="radio"/>
TaxAmount	<input type="radio"/>	<input type="radio"/>
Freight	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Column Names	Sparse	Not Sparse
OrderID	<input type="radio"/>	<input checked="" type="radio"/>
OrderDate	<input type="radio"/>	<input checked="" type="radio"/>
CustomerID	<input type="radio"/>	<input checked="" type="radio"/>
IsTaxable	<input checked="" type="radio"/>	<input type="radio"/>
SubTotal	<input type="radio"/>	<input checked="" type="radio"/>
TaxAmount	<input checked="" type="radio"/>	<input type="radio"/>
Freight	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 4

Your company has a SQL Azure subscription.

You implement a database named Database1. Database1 has two tables named Table1 and Table2.

You create a stored procedure named sp1. Sp1 reads data from Table1 and inserts data into Table2.

A user named User1 informs you that he is unable to run sp1.

You verify that User1 has the SELECT permission on Table1 and Table2.

You need to ensure that User1 can run sp1. The solution must minimize the number of permissions assigned to User1.

What should you do?

- A. Change sp1 to run as the saUser.
- B. Grant User1 the EXECUTE permission on sp1.
- C. Add User1 to the db_datawriter role.
- D. Grant User1 the INSERT permission on Table2.

Correct Answer: B

Explanation: <http://msdn.microsoft.com/en-us/library/ms191291.aspx>

QUESTION 5

Your network contains a server that has SQL Server 2014 installed. You create a table by using the following script:

```
CREATE TABLE dbo.Products  
(  
    id int NOT NULL,  
    ProductName nvarchar(50) NULL,  
    ProductManufacturer nvarchar(50) NULL,  
    ProductDescription nvarchar(200) NULL,  
    CONSTRAINT PK_Products PRIMARY KEY CLUSTERED (id)  
)  
ON [PRIMARY]  
GO
```

You need to recommend a solution to ensure that each combination of ProductName and ProductManufacturer is not duplicated. What should you recommend creating?

- A. A UNIQUE constraint
- B. A filtered index
- C. A columnstore index
- D. A CHECK constraint

Correct Answer: A
