QUESTION 1

You need to ensure that queries to the Sales Analysis cube default to the correct time period. Where should you set the default member Multidimensional Expressions (MDX) expression?

- A. In the DefaultMember property of the Month attribute of the Date dimension.
- B. In the cube's calculation script.
- C. In the DefaultMeasure property of the cube.
- D. In the Analysts role.

Correct Answer: B

QUESTION 2

You administer a SQL Server Reporting Services (SSRS) instance in native mode.

You need to assign a predefined role that meets the following requirements:

Members of the role must be able to update shared data sources. Members of the role must not be able to consume reports or manage subscriptions.

The role must provide only the minimum permissions required.

Which role should you assign? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. The Content Manager role
- B. The Read and Process role
- C. The Publisher role
- D. The Browser role

Correct Answer: C

QUESTION 3

You are developing a SQL Server Analysis Services (SSAS) multidimensional project that is configured to source data from a SQL Azure database.

The largest partition in the cube takes an unacceptably long time to process. The partition must be available for querying as soon as possible after processing commences.

You need to ensure that the partition is available for querying as soon as possible, without using source data to satisfy the query.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

On the Properties window, change the **ProcessingMode** property to **Regular**.

On the Properties window, change the **ProcessingMode** property to **LazyAggregations**.

Click **Storage Settings** and then click **Options** to open the Storage Options dialog box.

Open the cube for editing and then select the **Partitions** tab.

Enable proactive caching and then select the **Bring Online Immediately** option.

On the Partitions tab, select the partition to edit.

Correct Answer:

On the Properties window, change the **ProcessingMode** property to **Regular**.

Open the cube for editing and then select the **Partitions** tab.

On the Partitions tab, select the partition to edit.

Click **Storage Settings** and then click **Options** to open the Storage Options dialog box.

On the Properties window, change the **ProcessingMode** property to **LazyAggregations**.

Enable proactive caching and then select the **Bring Online Immediately** option.

QUESTION 4

A SQL Server Analysis Services (SSAS) cube contains billions of rows of data and is rapidly increasing in size. The cube consists of a single measure group and a single partition. The cube is currently processed by using the Process Full process option.

You have the following requirements to reduce the cube processing time:

Partition the measure group by month.

Create a staging table that contains only data which is more recent than the last time the cube was processed.

Do not include data updates or deletions in the staging table.

Insert records from the staging table into the appropriate partition.

You need to change the process option to meet the requirements.

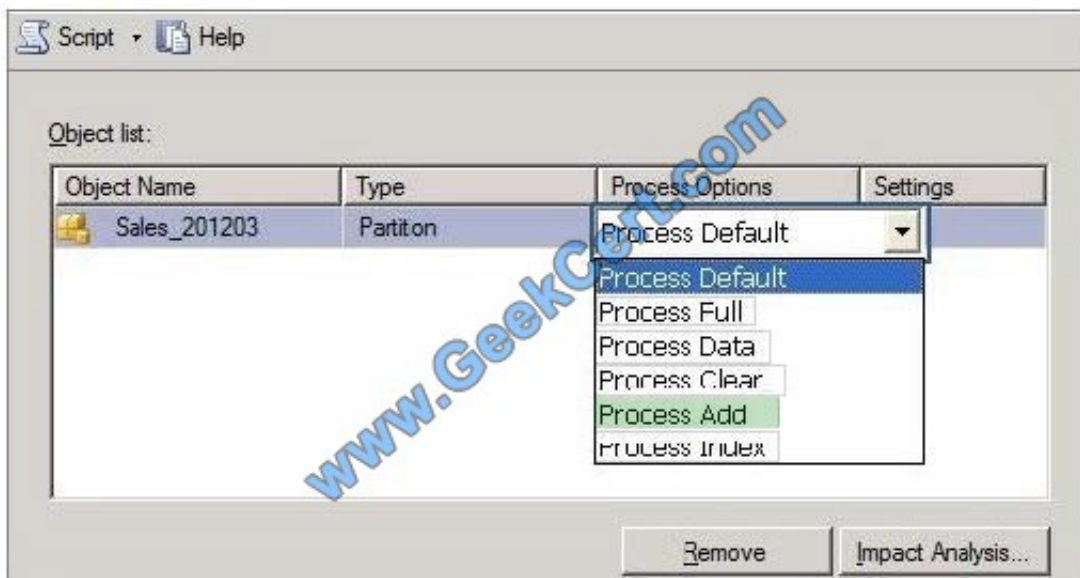

Which process option should you choose?

To answer, select the appropriate option from the drop-down list in the dialog box.

Hot Area:

Correct Answer:

QUESTION 5

You are designing a subscription strategy for a SQL Server Reporting Services (SSRS) report.

You have an application that populates a table with user-specific subscription schedules and report formats.

You need to ensure that users can receive reports by email according to their preferences. Email messages will be sent via an internal mail server.

What should you do? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Create a standard SSRS subscription for each record in the table.
- B. Create a data-driven SSRS subscription for each record in the schedule table.
- C. Create a standard SSRS subscription for each subscription schedule.
- D. Create one data-driven SSRS subscription. Schedule the subscription to frequently retrieve user preferences.

Correct Answer: D
