QUESTION 1

You maintain a multidimensional Business Intelligence Semantic Model (BISM) that was developed with default settings.

The model has one cube and the cube has one measure group. The measure group is based on a very large fact table and is partitioned by month. The fact table is incrementally loaded each day with approximately 800,000 new rows. You need to ensure that all rows are available in the cube while minimizing the processing time.

Which processing option should you use?

- A. Process Add
- B. Process Clear
- C. Process Default
- D. Process Index
- E. Process Data
- F. Process Full

Correct Answer: A

QUESTION 2

You develop a SQL Server Analysis Services (SSAS) tabular project. The tabular model loads data from a SQL Server 2012 relational database each day.

You define a connection.

You need to ensure that the connection minimizes the attack surface area of the server.

How should you define the impersonation information for the connection? (More than one answer choice may achieve the goal. Select the BEST answer.)

- A. Use the credentials of the SQL Server Analysis Services (SSAS) service account. Grant least privilege to this account in the source database.
- B. Use your domain credentials. Grant least privilege to your account in the source database.
- C. Create and use a new Windows domain account. Grant least privilege to this account in the source database.
- D. Use SQL Server authentication.

Correct Answer: C

QUESTION 3

You are setting role permissions for a SQL Server Analysis Service (SSAS) cube.

You plan to grant Read access for specific attribute members only to specific Active Directory security groups.

You need to enter a Multidimensional Expressions (MDX) expression to configure the attribute member access.

On which tab should you enter the MDX expression? To answer, select the appropriate tab in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

You need to ensure that queries to the Sales Analysis cube default to the correct time period. Where should you set the default member Multidimensional Expressions (MDX) expression?

- A. In the DefaultMember property of the Month attribute of the Date dimension.
- B. In the cube's calculation script.
- C. In the DefaultMeasure property of the cube.
- D. In the Analysts role.

Correct Answer: B

QUESTION 5

A school stores information about teachers, students, classes, and enrollments in a Windows Azure SQL Database database. The database includes a table that maps the user IDs of teachers to the subjects they teach.

Teachers access reports in a SQL Server Reporting Services (SSRS) instance by using their credentials.

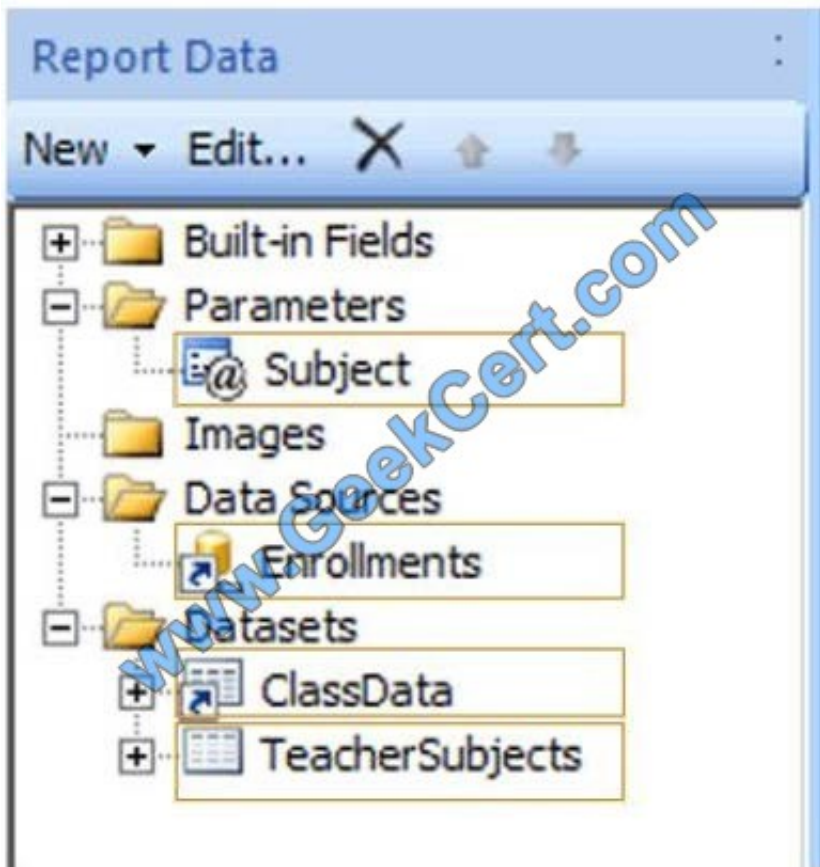

You are developing a report that displays a table of class enrollments for a specific subject.

The report will prompt teachers to select from their mapped subjects. The table is based on a dataset named ClassData. To minimize report execution time, the ClassData dataset has been configured to cache all class enrollment data.

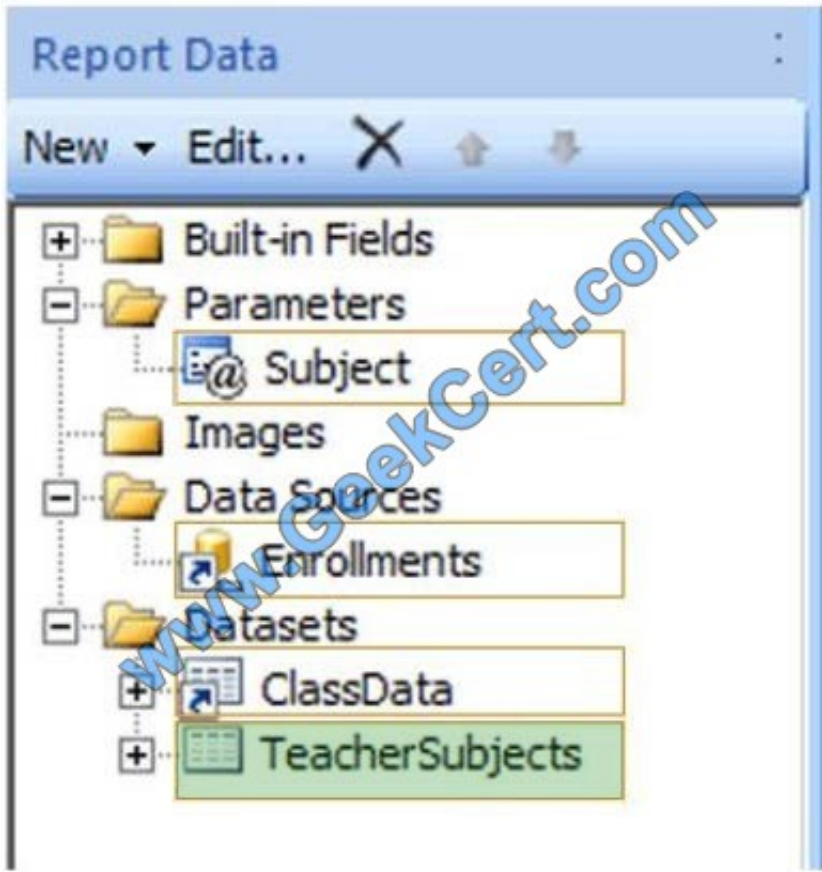

You need to ensure that the report parameter displays the correct subjects for each teacher.

Which item should you configure? To answer, select the appropriate item in the answer area.
