QUESTION 1

Your network environment includes a Microsoft Visual Studio Team Foundation Server 2012 (TFS) server.

You build a multi-tiered application that contains the following tiers:

User Interface

Application Services

Integration Services

Database

You need to modify the item template to meet the following requirements:

When a bug is created, the testing team is able to identify the application tier.

You are able to produce a report of bugs by tier.

Which three actions should you perform? (Each correct answer presents part of the solution. Choose three.)

A. Add a control to the work item FORM. For type, select WorkItemClassificationControl.

B. Add a new FIELD called Custom.ApplicationTier Application Tier and configure its list of ALLOWEDVALUES LISTITEMS to be:

User Interface

Application Services

Integration Services

Database

C. Add a control to the work item FORM. For type, select FieldControl.

D. Add the attribute reportable^Dimension to the FIELD definition.

E. Add the attribute reportable = Measure to FIELD definition.

Correct Answer: ABC

QUESTION 2

Your client's network environment includes a Microsoft Visual Studio Team Foundation Server (TFS) 2012 server installed at its main office.

The network administrator at a remote office reports high WAN utilization. Users at the remote office report slow response times when downloading source code.

You need to minimize WAN utilization and improve the response times for downloading source code.

What should you do?

- A. Install TFS Server at the remote site and set up database synchronization between the existing TFS Server and the remote site.
- B. Install and configure TFS Proxy at the remote site. Point the TFS Proxy to the TFS server and point Team Explorer to the TFS Proxy.
- C. Install and configure IIS caching. Point Team Explorer to the IIS server.
- D. Install TFS Proxy at the remote site. Configure TFS Proxy to point to the TFS Server and configure each user's Visual Studio Source Control to use the proxy server for file downloads.

Correct Answer: D

QUESTION 3

Your network environment includes a Microsoft Visual Studio Team Foundation Server (TFS) server.

A developer has left the company and still has files checked out. The developer's computer is no longer available to undo the checkouts.

You need to undo any checked-out files for the user. You also need to delete the user's workspace.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Use the tf undo command to remove the user's pending changes.	
Use the tf workspaces command to delete the user's workspaces.	
Use the tf workspace command to delete the user's workspaces.	
Use the tf workspaces command to get a list of the user's workspaces.	
Use the tf delete command to delete the user's workspace.	
Use the tf view command to get a list of the user's workspaces.	
Use the tf status command to change the status of any of the user's pending changes to remove them.	

Correct Answer:

Actions	Answer Area
	Use the tf status command to change the status of any of the user's pending changes to remove them.
Use the tf workspaces command to delete the user's workspaces.	Use the tf undo command to remove the user's pending changes.
	Use the tf workspace command to delete the user's workspaces.
Use the tf workspaces command to get a list of the user's workspaces.	
Use the tf delete command to delete the user's workspace.	
Use the tf view command to get a list of the user's workspaces.	

QUESTION 4

Your network environment includes a Microsoft Visual Studio Team Foundation Server (TFS) 2012 server installed at a main office.

A TFS Proxy is installed at the branch office with a default port number.

You need to access TFS from the branch office to add and manage work items.

What should you do?

A. Navigate to the Internet Options of your browser. In the LAN settings area, configure the name of the TFS proxy and enter the port number 8081.

B. Navigate to the Internet Options of your browser. In the LAN settings area, configure the name of the TFS proxy and enter the port number 8080.

C. In the Add/Remove Team Foundation Server dialog box within Visual Studio 2012, enter the name of the TFS server.

D. From the Source Control section of Visual Studio 2012, enter the name of the proxy server and port number 8081.

Correct Answer: C

QUESTION 5

You are planning to install a new Microsoft Visual Studio Team Foundation Server (TFS) 2012 server.

You need to ensure that the minimum supported version of Microsoft SQL Server is installed.

Which version should you install?

A. SQL Server 2005

B. SQL Server 2008 32-bit

C. SQL Server 2008 64-bit

D. SQL Server 2008 R2

E. SQL Server 2012

Correct Answer: D
