### QUESTION 1

You are developing a release plan for a new project.

You need to create a risk management plan.

Which three activities or elements should you include in your plan? (Each correct answer presents a complete solution. Choose three.)

- A. Probability assessment
- B. Assumptions
- C. Resolution planning
- D. Impact analysis
- E. Resource planning
- F. Constraints

Correct Answer: ACD

---

### QUESTION 2

You are the lead tester for Contoso, Ltd. The company is using Microsoft Visual Studio to develop a new software product.

Management wants to test the product as it is developed. Some components that require testing have dependencies that are not yet built or are otherwise unavailable.

You need to test the components.

In the table below, identify where only a shim or a stub can be used in the situation. Make only one selection in each column.

Hot Area:

Answer Area

Testing situation	Shim	Stub
a call that uses defined interface to reach an external service	<input type="checkbox"/>	<input type="checkbox"/>
a call to an internal type	<input type="checkbox"/>	<input type="checkbox"/>
a call to a private method.	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Answer Area

Testing situation	Shim	Stub
a call that uses defined interface to reach an external service	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a call to an internal type	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a call to a private method.	<input checked="" type="checkbox"/>	<input type="checkbox"/>

QUESTION 3

You are using the Microsoft Visual Studio Scrum process template. You recently finished a sprint.

You need to conduct a retrospective meeting prior to planning the next sprint.

What should you do?

- A. Analyze items in the product backlog for the next sprint.
- B. Analyze the previous sprint to identify what the team is going to do differently during the next sprint
- C. Analyze and revise the story points of the work items completed in the previous sprint.
- D. Determine which items have been finished on the previous sprint.

Correct Answer: B

The Sprint Retrospective is an opportunity for the Scrum Team to inspect itself and create a plan for improvements to be enacted during the next Sprint. The purpose of the Sprint Retrospective is to:

- Inspect how the last Sprint went with regards to people, relationships, process, and tools;
- Identify and order the major items that went well and potential improvements; and,
- Create a plan for implementing improvements to the way the Scrum Team does its work. Sprint Retrospectives are used by teams to deliberately improve.

Effective Sprint Retrospectives are an important ingredient in helping good teams become great and great teams sustain themselves.

#### QUESTION 4

Your development team is using the Microsoft Solution Framework (MSF) for Capability Maturity Model Integration (CMMI) Process Improvement 6.0 process template. The team has identified all of the acceptance criteria for a new application. This data currently resides in a series of spreadsheets.

You need to enter the criteria into TFS for team traceability and tracking.

Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)

- A. Create test case work items for each criterion in the spreadsheet. Link the test case work items with the work item(s) for the appropriate requirements.
- B. Create Requirement work items.
- C. Create a new task work item for each criterion in the spreadsheet. Set the Triage attribute for each task work item to Information Received.
- D. Create a new quality of service test case work item for each criterion in the spreadsheet. Link the quality of service test case work items with the work item(s) for the appropriate requirements.

Correct Answer: AB

## QUESTION 5

You are a developer for Contoso, Ltd. The product owner sends an email with a list of requirements that need to be built out for your company's social media product.

You plan to use the list of requirements to create the Product Backlog. The development team will break these features into user stories.

You need to create a user story from a user's perspective in which the user accesses the contact history. Additionally, you need to document the action the user wants to take and the benefit the user will receive from that action.

Complete the user story. To answer, drag the appropriate component of the user story to the correct target. Each component of the user story may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Select and Place:

## User Story Component

registered member

user

log on by using a Public-key authentication protocol

I can access my history

I can access a secure area of the system

my history displays

my information displays

A message displays and explains that my username is not registered

an error is displayed

## Answer Area

As a:

User Story component

I want to:

User Story component

So That:

User Story component

When I perform this action:

This is the result:

log on with my registered username, and register a 6-10 character alphanumeric password

User Story component

try to log on with an unregistered username

User Story component

Correct Answer:

## User Story Component

user
I can access a secure area of the system
my information displays
an error is displayed

## Answer Area

As a:	registered member
I want to:	log on by using a Public-key authentication protocol
So That:	I can access my history
When I perform this action:	This is the result:
log on with my registered username, and register a 6-10 character alphanumeric password	my history displays
try to log on with an unregistered username	A message displays and explains that my username is not registered
