### QUESTION 1

You are designing an ASP.NET Web application. You have the following requirements:

The application must be usable in partially connected scenarios.

Data that is entered into the application offline must be synchronized with the server the next time the application is online.

You need to design the application to meet the requirements.

What should you use?

A.

jQuery

B.

ASP.NET AJAX

C.

WCF Data Services

D.

Microsoft Silverlight

Correct Answer: D

---

### QUESTION 2

You are designing an ASP.NET Web application that will support multiple display languages. You have the following requirements:

Change server control settings based on the selected language.

Enable strongly typed access to the resource objects.

You need to recommend a strategy for localizing server control properties.

Which strategy should you recommend?

A.

Wrap localized server controls with a Localize server control. In the App\_GlobalResources folder, create a resource file that contains localized values with keys named according to the .. format.

B.

Use implicit resource expressions and store the resource file in the App\_LocalResources folder.

C.

Use explicit resource expressions and store the resource file in the App\_GlobalResources folder.

D.

Add the Localizable attribute to the control definitions in the code-behind. In the App\_LocalResources folder, create a resource file that contains localized values with keys named according to the . format.

Correct Answer: C

---

### QUESTION 3

You are implementing additional functionality within an existing ASP.NET 4 Web Forms Web site project by using ASP.NET MVC2. You need to design a Web site project configuration that supports Web Forms and ASP.

NET MVC 2 in the same Microsoft Visual Studio 2010 project. Which two approaches should you recommend? (Each correct answer presents part of the solution. Choose two.)

- A. Convert the Web site project to a Web application.
- B. Convert the Web site project to an ASP. NET MVC 2 application.
- C. Modify the T4 templates to support ASP.NET Web Forms.
- D. Reference the ASP.NET MVC 2 assemblies in the application configuration file.

Correct Answer: AD

---

### QUESTION 4

You are designing an ASP.NET Web application for content management. You have the following requirements:

Support multiple languages.

Support dynamic changes to site content.

Provide the ability to add content to the site without making changes to files within the application directory.

You need to recommend the application's source for retrieving content. Which source should you recommend?

- A. a database based on CurrentUICulture
- B. a master page based on CurrentUICulture
- C. local resources based on CurrentCulture
- D. global resources based on CurrentCulture

Correct Answer: A

---

#### QUESTION 5

You are redesigning an existing three-tier ASP.NET Web application that is deployed to a Web server, an application server, and a database server that runs Microsoft SQL Server 2008.

Usage has increased significantly. The application has become slow and occasionally times out. Health monitoring logs indicate that the data access logic on the application server is consuming the majority of the CPU resources.

You need to recommend an approach for addressing the scalability and reliability issues.

Which two actions should you recommend? (Each correct answer presents part of the solution. Choose two.)

- A. Partition the tables and indexes in the database.
- B. Move the application tier to a Web farm.
- C. Move the Web tier to a Web farm.
- D. Use a clustered database server configuration.

Correct Answer: BD
