QUESTION 1

You are designing a SharePoint 2010 application. You need to ensure that a custom list named Phone Numbers is automatically created and added to the site whenever a new Team Site is created.

Which approach should you recommend?

- A. Create a feature that defines a Phone Numbers list template. Then activate the feature on the team site.
- B. Create a feature that defines a Phone Numbers list template. Then use feature stapling to associate the feature with the site definition of the team site.
- C. Create the custom Phone Numbers ListTemplate element and add the ListTemplate element to the onet.xml file of the team site.
- D. Create the custom fields, views, and other specifications for the Phone Numbers list definition and add them to the schema.xml file.

Correct Answer: B

QUESTION 2

You are designing a SharePoint 2010 application that stores data in a list named BaseList.

This list contains 25,000 records. A view named ViewList filters data on a column named CreateDate. The CreateDate column is of type Date and Time. The ViewList view requires too much processing time when displaying BaseList data. Your

design needs to improve the performance of the ViewList view when it displays the BaseList data.

Which approach should you recommend?

- A. Enable the Display items in batches of the specified size property in the Item Limit option of ViewList.
- B. Set the Group By option of ViewList to group by the CreateDate column.
- C. Add a column index to BaseList based on the CreateDate column.
- D. Change the CreateDate column type to Date Only.

Correct Answer: C

QUESTION 3

You have a public-facing SharePoint 2010 site. The site resides on two Web front-ends that are not load balanced. You are asked to design an update for a Web Part to the site. The update requires modifications to the code in the global assembly cache (GAC). You need to design the update with minimal impact to users who are accessing the site.

Which approach should you recommend?

- A. Deploy the update directly to the GAC. Perform an IISReset on each Web front-end.
- B. Deploy the update directly to the GAC. Recycle the application pool for the SharePoint site on each Web front-end.
- C. Deploy the update within a custom Microsoft Windows Installer package that copies the code into the GAC and performs an IISReset on each Web front-end.
- D. Deploy the update in a SharePoint solution file.

Correct Answer: B

QUESTION 4

You are designing a SharePoint 2010 solution that requires custom configuration settings. The solution will reside in every Web application within the environment because subsequent features depend on these settings. The server farm that the code is currently deployed to is going to be replaced with a new one. The content databases will be migrated to the new server farm. Manual changes to any files will not be allowed after the migration is complete. You need to ensure that the configuration settings are in place on the new server farm.

Which approach should you recommend?

- A. Place your settings within a feature that uses the SPWebConfigModification property to persist the information in the web.config file.
- B. Place your settings in a file named webconfig.MySolution.xml and place it in the \14\config directory.
- C. Place your settings in the current web.config file for each Web application.
- D. Place your settings in the hierarchical object store in the SPPersistedObject class.

Correct Answer: D

QUESTION 5

You are designing a SharePoint 2010 solution that allows users to enter address information for contacts into a list named Address. You have the following requirements:

- .Ensure that users enter full nine-digit zip codes for the address information.
- .Display a custom message indicating that a zip code is invalid if the entered zip code does not match the full nine-digit requirements.

You need to ensure that the application is designed to meet these requirements.

Which approach should you recommend?

- A. Create a custom command.

- B. Create a Datasheet view on the Address list.
- C. Use the Form Options of the Address list.
- D. Create a formula on the column.

Correct Answer: D
