### QUESTION 1

You are designing a SharePoint 2010 application. You need to plan the deployment of a user control named MyControlTemplate.ascx as a control template.

What should be added to the solution manifest (manifest.xml) to achieve this goal?

- A. Add a TemplateFile element, specifying a Location of MyControlTemplate.ascx.
- B. Add a TemplateFile element, specifying a Location of ControlTemplates\MyControlTemplate.ascx.
- C. Add a RootFile element, specifying a Location of MyControlTemplate.ascx.
- D. Add a RootFile element, specifying a Location of ControlTemplates\MyControlTemplate.ascx.

Correct Answer: B

---

### QUESTION 2

A company with offices worldwide has asked you to design a SharePoint 2010 feature for an intranet portal. The feature must:

- .Be activated only on a site collection.
- .Contain a customized list template.
- .Contain a custom List page.
- .Use globalized resources that can be shared with other features.

You need to design the feature to support all these requirements.

Which approach should you recommend?

- A. Use the Scope attribute of the feature to limit the availability of the feature to a site collection. Then set the RequireResources element to true. Store globalized resources in a file in a global document library.
- B. Use the Scope attribute of the feature to limit the availability of the feature to a site collection. Then use the Module element in the feature to provision a file into the SharePoint 2010 site. Store shared resources in the \web server extensions\14\Resources folder.
- C. Use the Scope attribute of the feature to limit the availability of the feature to a farm. Then use the Module element to provision a file into the SharePoint site. Store shared resources in the \\_catalogs folder.
- D. Use the Module element in the feature to limit the availability of the feature to a site collection. Then set the RequireResources element to true. Store shared resources in the \web server extensions\14\Resources folder.

Correct Answer: B

---

### QUESTION 3

Your company has more than 100 SharePoint 2010 intranet sites. The branding of several individual department subsites is not consistent with company standards. You need to ensure that the branding of all intranet subsites is consistent with company standards and graphics.

Which approach should you recommend?

- A. Create a master page at the root level that specifies the company branding and graphics, and force all subsites to inherit the master page.
- B. Create a master page in the Master Page gallery that specifies the company branding and graphics, and disable document versioning within the Master Page gallery.
- C. Create a theme at the root level that specifies the company branding and graphics, and force all subsites to inherit the theme.
- D. Create a theme at the root level that specifies the company branding and graphics, and reset each subsite back to its original site definition.

Correct Answer: A

---

### QUESTION 4

You have multiple SharePoint 2010 sites based on the same site definition. You need to plan a strategy to update the property value for a Web Part specified in the site definition for all existing sites. You must accomplish this with a minimum of developer hours.

Which strategy should you recommend?

- A. Update the site definition to specify the new property for the Web Part and deploy it through a feature to each of the sites.
- B. Create a delegate control with the updated value and deploy it through a feature to each of the sites.
- C. Copy an update to the Web Part into the global assembly cache (GAC) and perform an IISReset.
- D. Use a PowerShell script to iterate through the sites and update the property.

Correct Answer: D

---

### QUESTION 5

You are designing a SharePoint 2010 application. You need to specify that a custom button is defined and added to the SharePoint 2010 ribbon. Which two actions should be performed? (Each correct answer presents part of the solution. Choose two.)

- A. Create a new Content Organizer content type that defines the button.
- B. Create Feature Definition and Feature Element XML files that define the button.
- C. Use the STSADM.EXE utility to deploy the button.
- D. Use the Site Collection Features option in the Site Collection Administration group to deploy the button.

Correct Answer: BC
