QUESTION 1

You are using SharePoint 2010 to design a site at your company. All employees need to have permission to fill out a new form. When an employee submits the form, the request should be saved as an item in a custom list.You have the following requirements:

.For security reasons, employees must only be able to view their own requests. .Employees must not be able to view requests that other employees have submitted. .Company managers must have permission to view every request submitted.

Which approach should you recommend?

A. Create a new workflow that updates the owner of the list item to the username of the employee who submitted the form.

B. Create and schedule a SharePoint timer job that sets item level security on each item in the list.

C. Create an event receiver that sets the appropriate item level security. Add the event receiver to the ItemAdded event in the list.

D. Create an event receiver that sets the appropriate list level security. Add the event receiver to the ItemUpdated event in the list.

Correct Answer: C

QUESTION 2

You are designing a SharePoint 2010 solution.You need to design the solution to meet the following requirements:

.All sites must have a consistent structure when initially created.

.All sites must include a document library that contains Word documents with searchable properties.

.Site users must be able to generate a spreadsheet detailing the properties of the document library contents.

Which approach should you recommend?

A. Create a feature to create the required site structure programmatically. Create a content type for the document library. Create a custom workflow for the document library to allow users to generate the spreadsheet.

B. Create a feature to create the required site structure programmatically. Use feature stapling to associate the feature with all site definitions. Create a custom action for the standard document library to allow users to generate the spreadsheet.

C. Create a custom site definition for the sites and allow only that site definition to be used. Create a content type for the document library. Create a custom action for the document library to allow users to generate the spreadsheet.

D. Create a custom site definition for the sites and allow only that site definition to be used. Create a content type for the document library. Create a custom event receiver to allow users to generate the spreadsheet.

Correct Answer: C
