QUESTION 1

A corporate environment will include Exchange Server 2010.

You are planning capacity for the Mailbox servers. You require 800 GB of disk space for mailbox content.

You need to recommend the minimum amount of additional space required for content indexing.

What should you recommend?

A. 160 GB

B. 96 GB

C. 120 GB

D. 80 GB

Correct Answer: D

Content Indexing Content indexing creates an index, or catalog, that allows users to easily and quickly search through their mail items rather than manually search through the mailbox, Which is placed on the same LUN as the database. Therefore, an additional 10 percent needs to be factored into the database LUN size for content indexing.

QUESTION 2

You have an Exchange Server 2010 organization.

You plan to delegate administration of the organization.

You have a group named Technicians that contains all the level-two technicians in the organization.

You need to ensure that the Technicians group can manage the properties of all the mailbox databases. The solution must minimize the number of permissions assigned to the Technicians group.

Which management role should you assign to the Technicians group?

A. Help Desk

B. Organization Management

C. Recipient Management

D. Server Management

Correct Answer: D

Administrator who are the members of server management role group have administrative access to Exchange 2010 server configuration. They don\\'t have access to administer Exchange 2010 recipient configuration.

QUESTION 3

A corporate environment includes an on-premise deployment of Exchange Server 2010 SP1.

The company needs to share calendar availability information with a partner. The partner is using a cloud-based Exchange Server 2010 SP1 service.

You need to recommend a solution for sharing calendar availability information for all employees with the partner.

What should you recommend?

A. Create a federation trust and a TXT DNS record. Then create an organization relationship with the partner.

B. Create a federation trust and a CNAME DNS record. Then create an organization relationship with the partner.

C. Add the partner\'s domain as an accepted domain. Then create a TXT DNS record and a transport rule.

D. Add the partner\'s domain as an accepted domain. Then create a CNAME DNS record and a group policy for all users.

Correct Answer: A

QUESTION 4

Your company has 10 offices. The offices connect to the Internet by using a WAN link. The offices connect to each other by using a VPN connection. An Active Directory site exists for each office.

You plan to deploy Exchange Server 2010. Each site will contain two Exchange Server 2010 servers.

You need to recommend the placement of domain controllers and global catalog servers to meet the following requirements: Minimize the number of domain controllers Must be able to deliver e-mail messages between users of the same office, if a domain controller and a WAN link fail simultaneously

What should you recommend?

A. In each site, install two global catalog servers.

B. In each site, install two domain controllers. Enable Universal Group Membership caching for each site.

C. In each site, install two domain controllers. Create a publishing point for an offline address list on one Exchange server in each site.

D. In each site, install one domain controller that is configured as a global catalog server. Enable Universal Group Membership caching for each site.

Correct Answer: A

QUESTION 5

You are planning the audit and discovery infrastructure for an Exchange Server 2010 Service Pack l (SP1) organization.

You need to identify which Exchange technologies achieve your audit and discovery requirements.

What should you identify?

To answer, drag the appropriate technology to the correct audit and discovery requirement in the answer area.

Select and Place:

Technology	Answer Area	
a litigation hold	Technology	Identify which user account deletes a specified mailbox.
a multi-mailbox search	Technology	Identify which user sent an email message as another user.
administrator audit logging	Technology	Discover email messages in specified mailboxes by using keywords.
mailbox audit logging	Technology	Automatically move items to a specified location based on a specified criterion.
retention policies		

Correct Answer:

Technology	Answer Area	
a litigation hold	administrator audit logging	Identify which user account deletes a specified mailbox.
	mailbox audit logging	Identify which user sent an email message as another user.
	a multi-mailbox search	Discover email messages in specified mailboxes by using keywords.
	retention policies	Automatically move items to a specified location based on a specified criterion.
