QUESTION 1

What PowerShell cmdlet do you use to enable POP3 access for a mailbox?

- A. Set-CASMailbox
- B. Set-MailboxProtocols
- C. Set-Mailbox
- D. Put-MailboxProtocols

Correct Answer: A

To enable POP3 access for a mailbox, you need to use the Set-CASMailbox cmdlet, such as: Set- CASMailbox-identity robert.jones@wiley.com - POPEnabled:\$true.

QUESTION 2

Your Exchange Server 2010 organization contains two Hub Transport servers in a single site.

The organization receives all e-mail sent to a SMTP domain named contoso.com.

Your company purchases another company that uses a SMTP domain named fabrikam.com.

You plan to manage message hygiene for both SMTP domains. You need to recommend changes to the organization to support the planned deployment. The solution must prevent e-mail sent to fabrikam.com from being delivered to your internal organization.

What should you recommend?

- A. Deploy a new Hub Transport server, and then create remote domains.
- B. Deploy a new Hub Transport server, and then configure transport rules.
- C. Deploy an Edge Transport server, and then create accepted domains.
- D. Deploy an Edge Transport server, and then configure a federation trust.

Correct Answer: C

The correct answer is C - while a hub transport can provide message hygiene for this question deploying Edge Transport Servers is the proper solution

QUESTION 3

A corporate environment includes Exchange Server 2010 with multiple Client Access servers. Employees connect to the Exchange Server environment from their Exchange ActiveSync enabled mobile devices. You need to recommend a solution for preventing the mobile devices from using removable storage.

What should you recommend?

- A. Configure the ActiveSync virtual directory on all Client Access servers.
- B. Create an Exchange ActiveSync mailbox policy and apply the policy to all mailboxes.
- C. Create a Group Policy Object (GPO) that enforces the use of BitLocker To Go and apply the GPO to all users.
- D. Create a Group Policy Object (GPO) that enforces the use of BitLocker To Go and apply the GPO to all member servers.

Correct Answer: B

QUESTION 4

Your network contains an Active Directory forest named contoso.com and two Active Directory sites named Site1 and Site2.

You plan to deploy an Exchange Server 2010 Service Pack 1 (SP1) organization.

An independent consultant recommends a design for the Exchange Server 2010 SP1 deployment as shown in the following table.

Server name	Server role	Database name	Site name
DC1	Domain controller Global catalog Certification authority (CA) DNS	Not applicable	Site1
DC2	Domain controller Global catalog	Not applicable	Site2
EX1	Mailbox Client Access Hub Transport	Mailbox Database 1	Site1
EX2	Mailbox	Mailbox Database 2	Site1
EX3	Mailbox Client Access Hub Transport	Mailbox Database 3	Site2
EX4	Mailbox	Mailbox Database 4	Site2

You need to recommend a change to the current Exchange Server 2010 SP1 design that will ensure that all users can access their mailbox if DC1 or DC2 fails.

Which change should you recommend?

- A. shadow redundancy
- B. an activation preference for a database
- C. a database availability group (DAG)
- D. Datacenter Activation Coordination (DAC) mode
- E. a DNS server on DC2
- F. delayed acknowledgments (ACKs)
- G. local continuous replication (LCR) on EX1, EX2, EX3, and EX4

- H. a single copy cluster (SCC)
- I. DNS round robin on DC1 and DC2
- J. Edge Transport server cloned configuration
- K. EdgeSync synchronization
- L. a Hosts file on EX1, EX2, EX3, and EX4

Correct Answer: E

Test4Sure had e as the correct answer however I do not see how that even makes sense. If it is a domain controller then it has DNS running as there is no way to install a domain controller without it. However it is the only answer that does seem to work.

QUESTION 5

You have an Exchange Server 2010 organization.

You need to recommend a mailbox storage management solution for your organization to meet the following requirements: Apply quota limits for users by department Automatically apply quota limits for new users

What should you recommend?

- A. A storage group for each department.
- B. A mailbox database for each department.
- C. An organizational unit for each department.
- D. A managed folder mailbox policy for each department.

Correct Answer: B
