QUESTION 1

You are the administrator for a SharePoint 2010 farm. The farm topology is as shown in the following table.

Servers	Roles
Server A	<ul style="list-style-type: none">• Web Front End• All service applications
Server B	<ul style="list-style-type: none">• Microsoft SQL Server 2008

You want to improve the performance of the search.

You need to add an application server named Server C.

Which component should you place on each of the three servers? (To answer, drag the appropriate server or server to the correct location or locations in the answer area.)

Select and Place:

The interface shows a 'Server' column on the left with three boxes labeled 'Server A', 'Server B', and 'Server C'. The 'Component' column on the right has four items: 'Query', 'Search Administration', 'Database', and 'Crawl'. To the right of each component is a grey rectangular box for placement. A large diagonal watermark 'www.GeekCert.com' is overlaid on the interface.

Correct Answer:

QUESTION 2

You have a SharePoint Server 2010 server farm that contains two servers. You need to recommend a solution to ensure that both servers have a complete copy of the index.

What should you recommend?

- A. Add a mirror query component
- B. Add a new crawl database
- C. Add a new crawl component
- D. Add a new query component

Correct Answer: A

QUESTION 3

You have a SharePoint Server 2010 Service Pack I (SP1) server farm.

You need to modify the search infrastructure to meet the following requirements:

- Users must be able to perform searches that only return results from content that is contained in a specific site.
- When users perform searches, results from both SharePoint and Microsoft Bing must be displayed.

You need to recommend which SharePoint technology must be implemented to meet the requirements.

What should you recommend? To answer, drag the appropriate technology to the correct requirement in the answer area.

Select and Place:

Technologies	Answer Area
Audiences	Technology Users must be able to perform searches that only return results from content that is contained in a specific site.
Managed Properties	Technology When users perform searches, results from both SharePoint and Microsoft Bing must be displayed.
Search Federation	
Search Scopes	
Term Stores	

Correct Answer:

Technologies	Answer Area
Audiences	Search Scopes Users must be able to perform searches that only return results from content that is contained in a specific site.
Managed Properties	Search Federation When users perform searches, results from both SharePoint and Microsoft Bing must be displayed.
Term Stores	

QUESTION 4

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains two servers. The servers are configured as shown in the following table.

Server name	Server configuration
SQL1	Microsoft SQL Server
WFE1	Front-end Web server

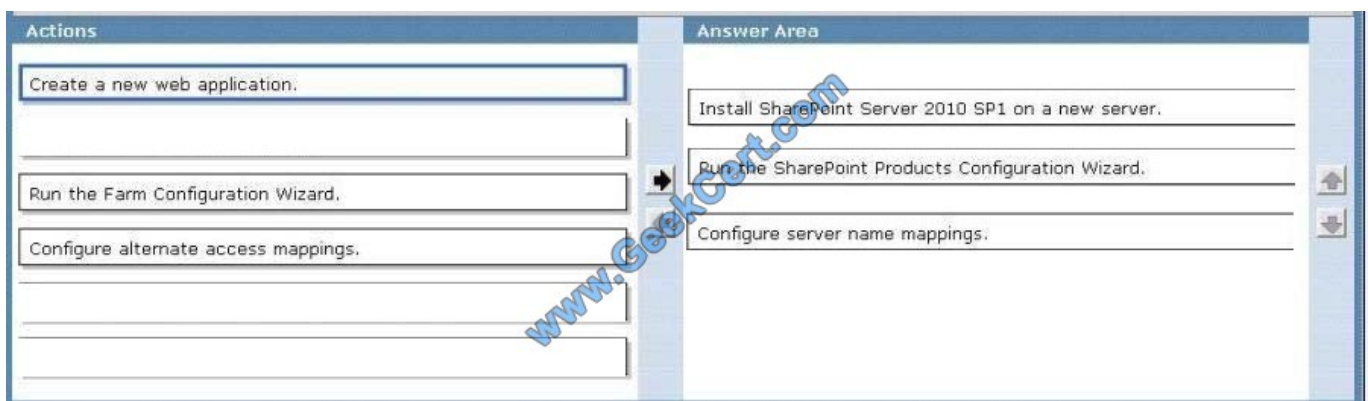

You need to add an additional server to the farm. The new server will host the following service applications: User Profile Service Excel Calculation Services Managed Metadata Web Service

What should you do? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Correct Answer:

QUESTION 5

You plan to deploy three SharePoint Server 2010 Service Pack 1 (SP1) server farms. The farms will be configured as shown in the following table.

Farm name	Farm configuration
Farm1	Dedicated to hosting shared services
Farm2	Dedicated to hosting content for the human resources department
Farm3	Dedicated to hosting content for the finance department

You identify the following deployment requirements:

Users in the finance department must be able to search for finance content, to manage their user profile, and to use term stores. Users in the human resources department must be able to manage their user profile and to view Microsoft Excel

files by using a web browser.

You need to identify which service application or service applications must be deployed to each farm. Any services that can be shared must be deployed to Farm1.

Which service applications should you identify? To answer, drag the appropriate service application or service applications to the correct farm in the answer area.

Select and Place:

Service Applications	Answer Area		
Excel Services	Farm1	Farm2	Farm3
Managed Metadata Service	Service application	Service application	Service application
Search	Service application	Service application	Service application
User Profile Service	Service application	Service application	Service application
	Service application	Service application	Service application

Correct Answer:

Service Applications	Answer Area		
Excel Services	Farm1	Farm2	Farm3
Managed Metadata Service	Search	Excel Services	Service application
Search	User Profile Service	Service application	Service application
User Profile Service	Managed Metadata Service	Service application	Service application
	Service application	Service application	Service application
