QUESTION 1

You are the administrator for a SharePoint Server 2010 Service Pack 1 (SP1) farm that spans the corporate network and perimeter network. Your company network contains Active Directory accounts for employees in the corporate network.

The network also includes separate Active Directory accounts for vendors in the perimeter network. You want to prevent the perimeter network from accessing the accounts of employees.

You need to design the extranet farm topology.

Which type of topology should you use? (Choose the best answer.)

A. Consolidate the perimeter network and corporate network to use a single Active Directory infrastructure.

B. Configure a one-way domain trust where the perimeter network trusts the corporate network.

C. Configure a one-way domain trust where the corporate network trusts the perimeter network.

D. Configure a two-way domain trust.

Correct Answer: B

QUESTION 2

You are a SharePoint administrator for Tailspin Toys.

The company has a main office. The main office is located in London. The company has 1,000 employees and 1,000 customers. You plan to create a product information Web site by using SharePoint technologies named www.tailspintoys.com.

You need to recommend a solution to filter the search results based on product category. What should you include in the solution?

A. content sources

B. host distribution rules

C. authoritative pages

D. managed properties

Correct Answer: D

QUESTION 3

You are planning the taxonomy of a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

You identify the following requirements:

The legal department will require a list view threshold of 1,000 items.

The accounting department will require a list view threshold of 2,000 items.

The manufacturing department will require a list view threshold of 1,000 items.

You need to identify the minimum number of web applications and site collections that must be created to meet the requirements.

How many web applications and site collections should you identify? To answer, configure the appropriate number of web applications and site collections in the answer area.

Hot Area:

Correct Answer:

QUESTION 4

You are the administrator for a SharePoint 2010 farm that contains a document library that has multiple content types.

No additional metadata is gathered when documents are uploaded.

You need to ensure that users can refine their document searches based on the content type of the document.

What should you do? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Create a managed metadata term set for document types.

Add the new column to the search refinement panel definition.

Create a choice column in the document content type.

Create a new list and include a lookup in the document content type.

Include the managed metadata in the document content type.

Add the secure store application to the search refinement panel definition.

Correct Answer:

Create a choice column in the document content type.

Create a new list and include a lookup in the document content type.

Add the secure store application to the search refinement panel definition.

Create a managed metadata term set for document types.

Include the managed metadata in the document content type.

Add the new column to the search refinement panel definition.

QUESTION 5

You are a SharePoint administrator for Northwind Traders.

The company has 20,000 employees distributed across 11 different departments. You plan to implement a SharePoint Server 2010 server farm for internal collaboration.

You need to recommend a strategy to manage access to SharePoint content. You must achieve this goal by using the minimum amount of administrative effort.

What should you recommend?

A. Configure managed accounts.

B. Implement Active Directory Lightweight Directory Services (AD LDS).

C. Add Active Directory groups to the SharePoint groups.

D. Create user policies and permission policies for the Web application.

Correct Answer: C
