QUESTION 1

Your customer purchases all licenses through a Microsoft Open License agreement. The customer retains all purchasing information in a Microsoft Office Excel spreadsheet. The customer has a complete Microsoft License Statement (MLS)

tool. You need to ensure that the customer's purchasing information is accurate.

Which report should you use?

- A. MLS
- B. Microsoft Product License Advisor (MPLA)
- C. Microsoft System Center Configuration Manager (CfgMgr)
- D. Microsoft Volume Licensing Service (MVLS)

Correct Answer: A

QUESTION 2

Your customer plans to replace several physical servers for virtual servers. The customer does not plan to modify the software inventory.

The customer signs all financial statements and confirms that all fixed asset reports are complete. You need to reconcile an inventory against the fixed asset report.

Which inventory should you reconcile?

- A. configuration management database (CMDB) desktop hardware inventory
- B. configuration management database (CMDB) server hardware inventory
- C. Windows Server license inventory
- D. Windows Server Client Access License (CAL) inventory

Correct Answer: B

QUESTION 3

You plan to do a SAM optimization assessment for a customer. The customer has no documented SAM processes or defined roles.

You need to gather information for the assessment.

What should you do?

- A. Collect sample SAM process documents.

- B. Formally document the customer's SAM processes.
- C. Review the customer's Active Directory forest structure.
- D. Interview managers who have SAM-related responsibilities.

Correct Answer: D

QUESTION 4

Your customer's network consists of one Active Directory forest. The network contains a Microsoft Systems Center Configuration Manager (CfgMgr) server. CfgMgr clients are deployed on all desktop computers. CfgMgr clients are not deployed on the servers. All software installed on the servers is added to the inventory.

You need to complete the software inventory.

What should you do?

- A. Review the initial configuration of all the servers.
- B. Audit all logon information from Active Directory.
- C. Run a software discovery scan of the entire network.
- D. Review the product packages in the CfgMgr software catalog.

Correct Answer: C

QUESTION 5

Your customer has 800 thin clients that log on to Terminal Services servers. The network consists of one Active Directory forest.

You need to ensure that the software inventory is accurate.

What should you do?

- A. Collect user logon information from Active Directory.
- B. Collect user licensing information from the Terminal Services servers.
- C. Ensure that the thin client device names and names of accessed software products are stored in the inventory database.
- D. Ensure that the Terminal Services server name and names of accessed software products are stored in the inventory database.

Correct Answer: C
