### QUESTION 1

Your network includes the client computer hardware configurations shown in the following table.

Memory	HAL type	Architecture
2 GB	ACPI Uniprocessor PC	x86
4 GB	ACPI Uniprocessor PC	x64
2 GB	ACPI Multiprocessor PC	x86
8 GB	ACPI Multiprocessor PC	x64

You need to deploy Windows 7 by using the fewest images. How many images are needed?

- A. 2
- B. 3
- C. 4
- D. 8

Correct Answer: A

One for 32bit image and one for 64bit image

### QUESTION 2

A company has 1,000 computers in the main office and 20 computers in store kiosks. All the computers run Windows 7 Enterprise. The kiosk computers do not have network connections.

The company brands the Microsoft Internet Explorer program window on all computers by displaying the company logo at the left end of the title bar. The company changes its logo.

You have the following requirements:

- Display the new logo on the Internet Explorer program window title bar on the main office computers and the kiosk computers.
- Modify the search providers that are available to main office computers. You need to define Internet Explorer settings to support the requirements.

Which two actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Create a deployment CD for the kiosk computers.

Create and distribute a new OpenSearch description file for the main office computers.

Enable automatic version synchronization and specify a flash drive for the path.

Copy the deployment package to a flash drive and distribute the file to all computers.

Save the logo as Logo.png and copy the file to the C:\Windows\Branding\ directory on each kiosk computer.

Use the Internet Explorer Administration Kit (IEAK) to create a custom configuration-only deployment package on the main office computers.

Correct Answer:

Use the Internet Explorer Administration Kit (IEAK) to create a custom configuration-only deployment package on the main office computers.

Create a deployment CD for the kiosk computers.

### QUESTION 3

Your company is planning to deploy Windows 7 to all client computers.

You have the following requirements:

Test an application to detect potential compatibility issues caused by User Account Control (UAC). Monitor an applications operating system use.

You need to select the appropriate method to detect application compatibility issues.

What should you do?

- A. Use the Setup Analysis Tool in a virtual environment.
- B. Use the standalone Setup Analysis Tool.

- C. Use the Standard User Analyzer Wizard.
- D. Use the Standard User Analyzer tool.

Correct Answer: D

The Standard User Analyzer (SUA) tool enables you to test your applications to detect potential compatibility issues due to the User Account Control (UAC) feature. [http://technet.microsoft.com/en-us/library/cc765948\(v=ws.10\).aspx](http://technet.microsoft.com/en-us/library/cc765948(v=ws.10).aspx)

#### QUESTION 4

You are the desktop architect for an enterprise organization with computers that run Windows 7.

You need to create a Group Policy object (GPO) to prevent Windows Explorer from starting until all logon scripts have finished.

Which setting should you select? To answer, select the appropriate setting in the work area.

Hot Area:

Answer Area

Scripts

Select an item to view its description.

Setting	State	Comment
Run legacy logon scripts hidden	Not configured	No
Run logoff scripts visible	Not configured	No
Run logon scripts synchronously	Not configured	No
Run logon scripts visible	Not configured	No
Run Windows PowerShell scripts first at user logon, logoff	Not configured	No

Correct Answer:

Answer Area

Scripts

Select an item to view its description.

Setting	State	Comment
Run legacy logon scripts hidden	Not configured	No
Run logoff scripts visible	Not configured	No
Run logon scripts synchronously	Not configured	No
Run logon scripts visible	Not configured	No
Run Windows PowerShell scripts first at user logon, logoff	Not configured	No

**QUESTION 5**

Your company has an Active Directory Domain Services (AD DS) forest with a single domain. A server has the Windows Deployment Services (WDS) role installed. You create a Windows 7 image.

You plan to use the Lite Touch Installation deployment method to deploy the Windows 7 image.

You need to design a deployment strategy that will install an image on unknown client computers only if administrative approval is granted.

What should you do?

- A. Create a multicast transmission for the Windows 7 image.
- B. Use an Auto-Add policy on the WDS server.
- C. Create a unicast transmission for the Windows 7 image.
- D. Use DHCP rogue detection on the WDS server.

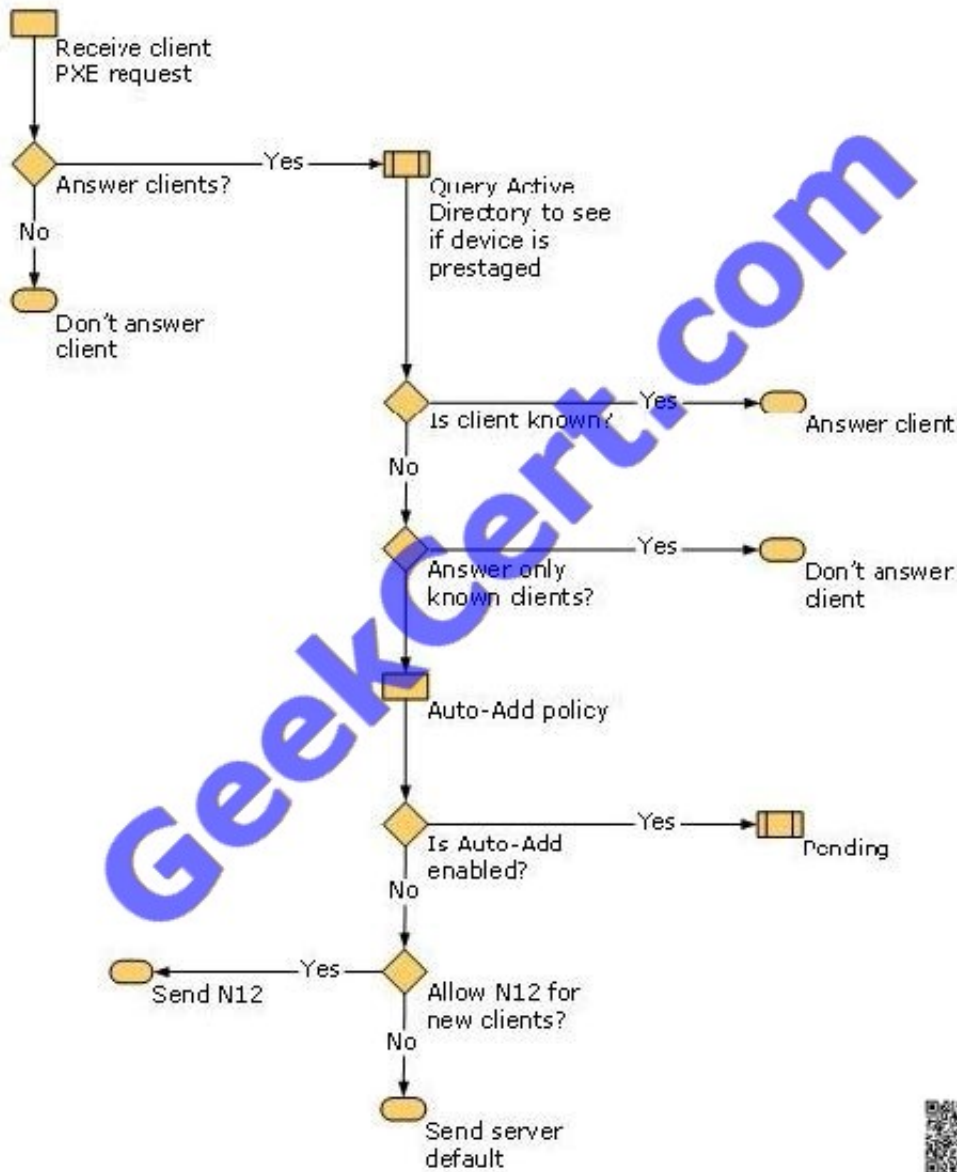

Correct Answer: B
