QUESTION 1

You create a shim database and distribute it to each of a companys client computers through a script. You name the database Shim_Database and give it a filename of shimdatabase.sdb. The database GUID is 18315260-2ecb-43af-945a56810da33fb4.

The database must be registered on all client computers. The registration process must be invisible to the user.

You need to construct a command to register the shim database.

Which command should you use? To answer, drag the appropriate component from the list of command components to the correct location or locations in the work area.

Select and Place:

Answer Choices:

- g
- q
- u
- Regsvr32.exe
- Sdbinst.exe
- "Shim_Database"
- C:\shimdatabase.sdb
- 4bf33ad01865-a549-fa34-bc e2-06251381

Answer Area:

```
C:\Windows\system32\cmd.exe  
C:\Users>
```

Correct Answer:

Answer Choices:

- g
- q
- u
- Regsvr32.exe
- "Shim_Database"
- C:\shimdatabase.sdb
- 4bf33ad01865-a549-fa34-bc e2-06251381

Answer Area:

```
C:\Windows\system32\cmd.exe  
C:\Users> Sdbinst.exe C:\shimdatabase.sdb -q
```

QUESTION 2

Your network has a single domain with 1,000 client computers that run Windows Vista. All client computers are members of the domain.

You are planning to deploy Windows 7.

You need to create a report that shows hardware and device compatibility on all client computers.

You need to perform this action without installing any additional software on the client computers.

Which tool should you use?

- A. System Center Configuration Manager
- B. System Center Capacity Planner
- C. Windows Performance Monitor Data Collector Sets
- D. Microsoft Assessment and Planning Toolkit

Correct Answer: D

Microsoft Assessment and Planning Toolkit performs a detailed analysis of hardware and device compatibility for migration to Windows 7, Windows Server 2008 R2, SQL Server 2008 R2, Microsoft Office 2010, and Office 365. The hardware assessment looks at the installed hardware and determines if migration is recommended. If it is not recommended, then reports provide information about why it is not. <http://technet.microsoft.com/en-us/library/bb977556.aspx>

QUESTION 3

You are the desktop architect for an enterprise organization with computers that run Windows 7.

You need to create a Group Policy object (GPO) to prevent Windows Explorer from starting until all logon scripts have finished.

Which setting should you select? To answer, select the appropriate setting in the work area.

Hot Area:

Answer Area

Scripts

Select an item to view its description.

Setting	State	Comment
Run legacy logon scripts hidden	Not configured	No
Run logoff scripts visible	Not configured	No
Run logon scripts synchronously	Not configured	No
Run logon scripts visible	Not configured	No
Run Windows PowerShell scripts first at user logon, logoff	Not configured	No

Correct Answer:

Answer Area

Scripts

Select an item to view its description.

Setting	State	Comment
Run legacy logon scripts hidden	Not configured	No
Run logoff scripts visible	Not configured	No
Run logon scripts synchronously	Not configured	No
Run logon scripts visible	Not configured	No
Run Windows PowerShell scripts first at user logon, logoff	Not configured	No

QUESTION 4

Your network is configured as shown in the following diagram.

You are planning to deploy Windows 7.

You have the following requirements:

?Use BitLocker on all computers in the isolated network.

?Provide DirectAccess on all portable computers.

?Use the Key Management Service (KMS) to activate all client computers.

You need to plan a client computer licensing strategy that meets the requirements.

What should you do?

A. License 500 copies of Windows 7 Ultimate.

B. License 500 copies of Windows 7 Enterprise.

C. License 350 copies of Windows 7 Professional, license 150 copies of Windows 7 Ultimate, and purchase Software Assurance for the Windows 7 Professional licenses.

D. License 350 copies of Windows 7 Enterprise, and license 150 copies of Windows 7 Ultimate.

Correct Answer: B

hints:

Direct Access only available for Ultimate and Enterprise only.

Company should use Enterprise version

QUESTION 5

A company uses Microsoft Deployment Toolkit (MDT) 2010 to deploy Windows 7 Enterprise and Microsoft Office 2010. The company is replacing existing computers with new 64-bit computers.

You have the following requirements:

You need to create an image that meets these requirements.

What should you do? (Choose all that apply.)

A. Import the Windows 7 Enterprise x86 source files.

B. From the MDT deployment workbench, select the Custom Task Sequence template.

C. Use a reference computer and capture a WIM image.

D. From the MDT deployment workbench, select the Sysprep and Capture template.

E. Import the necessary OEM drivers.

F. Import the 32-bit version of Office 2010.

G. Import the 64-bit version of Office 2010.

H. Import the Windows 7 Enterprise x64 source files.

Correct Answer: ABEF

hints:

The specialized hardware is compatible with Windows 7 but only 32-bit drivers are available from the manufacturer.
