QUESTION 1

A company has Windows 8.1 client computers.

A user stores files in multiple locations.

You need to determine which of the locations will be included in File History.

Which three of the following file locations are included in File History? (Each correct answer presents part of the solution. Choose three.)

- A. Public Documents and Public Pictures
- B. Contacts, Desktop, and Favorites
- C. All system files
- D. C:\Users and C:\ProgramData
- E. My Documents and My Pictures
- F. Desktop and Recycle Bin

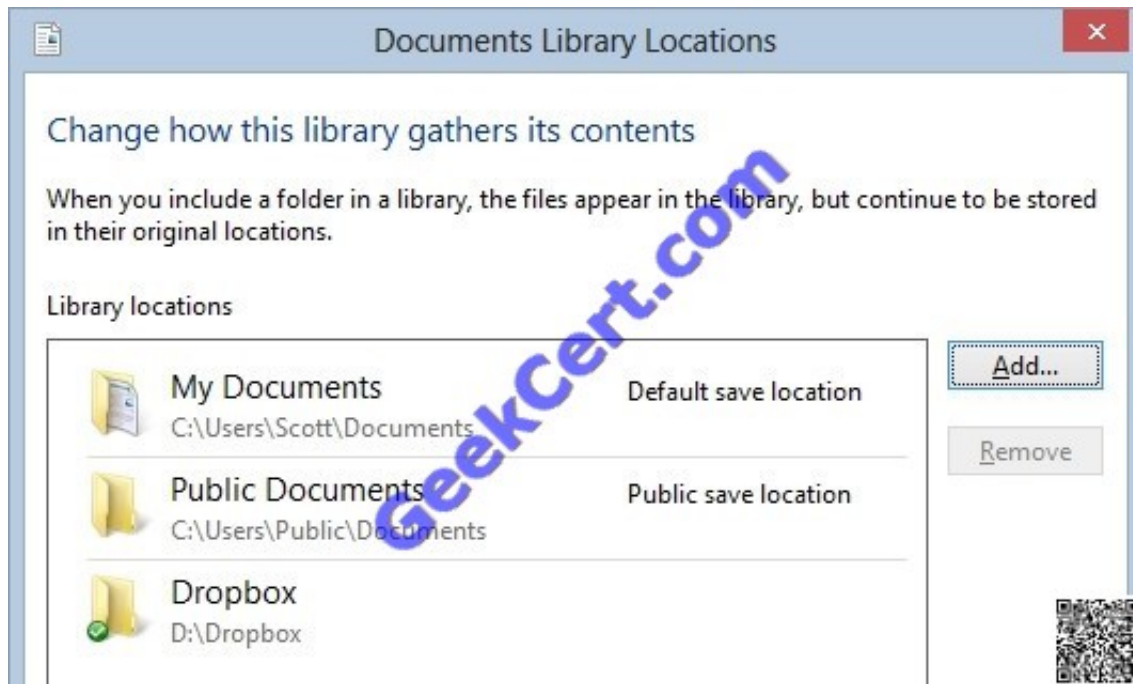

Correct Answer: ABE

*

File History has a predefined set of items that it backs up automatically: all your libraries (both default libraries and custom libraries you created), the Desktop, your Contacts, Internet Explorer favorites and the SkyDrive.

*

Library example:

QUESTION 2

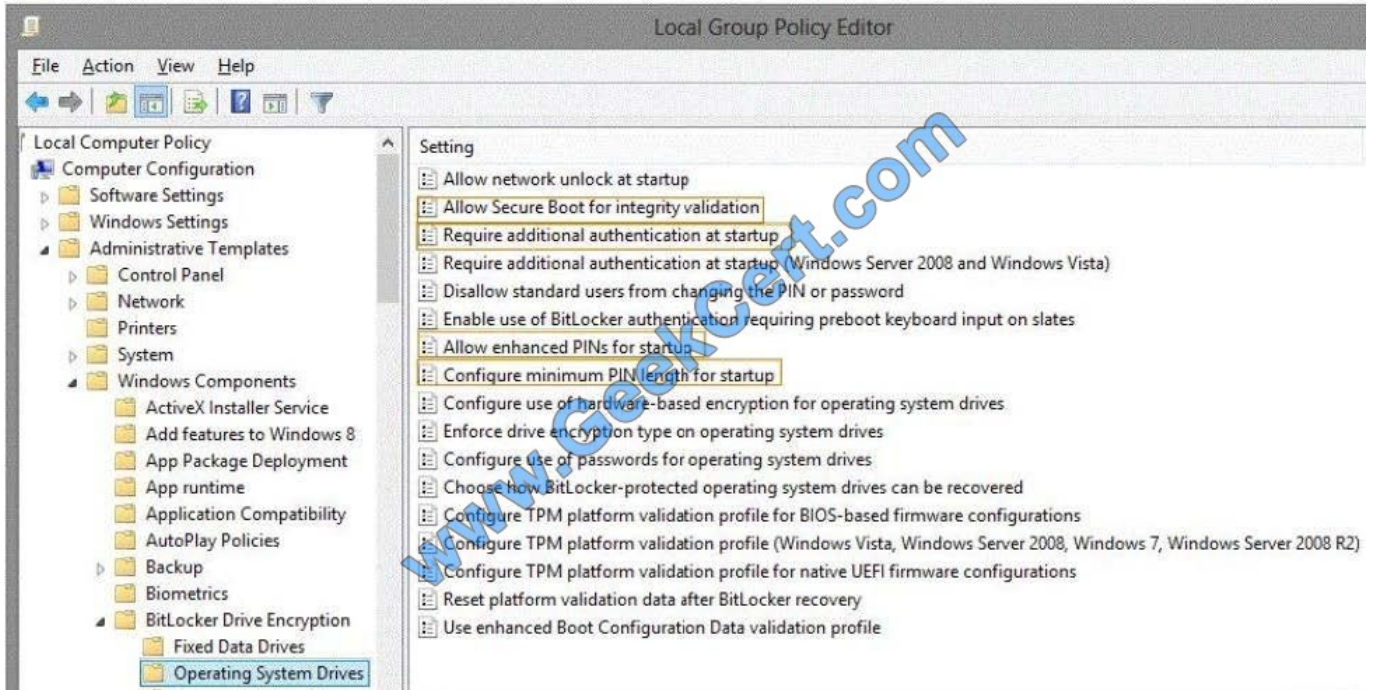

You administer Windows 8 computers in your company network. All computers include Windows 8 compatible Trusted Platform Module (TPM).

You configure a computer that will run a credit card processing application.

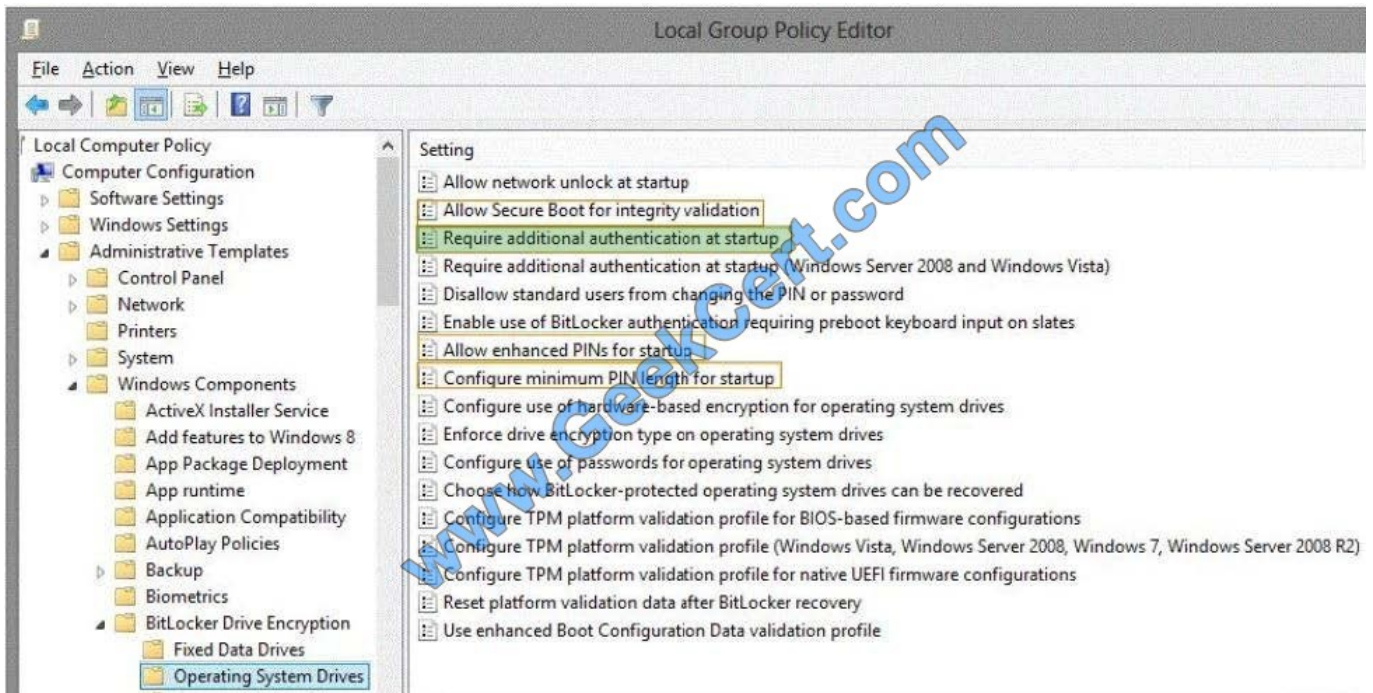

You need to ensure that the computer requires a user to enter a PIN code when starting the computer.

Which policy should you configure? (To answer, select the appropriate policy in the answer area.)

Hot Area:

Correct Answer:

QUESTION 3

You administer Windows 8.1 Pro computers in your company network. A server named Server1 runs Windows Server 2012. Server1 allows incoming VPN and Remote Desktop connections.

A remote user requires access to files on Server1.

You need to prevent the user from downloading any files from Server1 to his local computer.

Your solution must ensure that the user can read the files on Server1.

What should you do?

- A. Create a new VPN connection. Disable local drive mappings.
- B. Create a new VPN connection. Disable offline files.
- C. Create a new Remote Desktop connection. Set the Local Computer policy to Disable drives redirection for Remote Desktop Services.
- D. Create a new Remote Desktop connection. Set the Local Computer policy to Disable clipboard redirection for Remote Desktop Services.

Correct Answer: C

QUESTION 4

A company has Windows 8.1 client computers.

You are designing a remote management solution. IIS is installed on some remote computers and configured to use port 80 and port 443.

You have the following requirements:

Ensure that you can perform most of the same tasks through the remote management solution that you can while working directly on the remote computer.

Ensure that the solution can operate on port 80 and on port 443. You need to choose the remote management tool to meet the requirements. Which remote management tool should you choose?

- A.
Windows Remote Shell (WinRS)
- B.
Remote Desktop Connection (RDC)
- C.
Network Shell (netsh)
- D.
Windows Management Instrumentation (WMI)

Correct Answer: A

QUESTION 5

A local printer named PRINTER1 is shared from a client computer named COMPUTER1 that run a 64-bit version of Windows 8.

The workgroup contains client computers that run a 32-bit version of Windows 8.

Computers in the workgroup can't currently print to PRINTER1.

You need to ensure that the workgroup computers can print to PRINTER1.

Which three actions should you perform in sequence? (To answer, move the appropriate actions to the answer area and arrange the correct order.)
