QUESTION 1

You are a desktop administrator for a small company.

You are building a Windows 8.1 image to rollout to all new computers. Your company plans to administer all client computers from a single location.

You need to ensure that you can manage all client computers remotely once they are deployed.

Which action should you perform from the computer you are building the image from?

- A. Run the winrmenumerate command.
- B. Run the Enable-PSRemotingcmdlet.
- C. Run the Set-PSStrictModecmdlet.
- D. Run the New-PSSessionConfigurationFilecmdlet.

Correct Answer: A

QUESTION 2

A company has an Active Directory Domain Services domain. All client computers run Windows 8 and are joined to the domain.

You run the ipconfig command on a client computer. The following output depicts the results.

Ethernet adapter Local Area Connection 3:

```
Ethernet adapter Local Area Connection 3:
```

```
Connection-specific DNS Suffix. :  
IPv4 Address. . . . . : 192.168.1.102  
Subnet Mask . . . . . : 255.255.255.0  
Default Gateway . . . . . :
```

```
Tunnel adapter isatap.{DFC221ED-2EE5-46BA-93BE-97743DE6FC94}:
```

```
Media State: . . . . . : Media disconnected  
Connection-specific DNS Suffix. . . . . :
```

You need to ensure that you can establish a DirectAccess connection from the client computer to the network. What should you do?

- A. Create a new VPN connection.

- B. Remove the computer from the domain.
- C. Enable IPv6 on the network adapter.
- D. Configure a static IPv4 address.

Correct Answer: C

QUESTION 3

You administer Windows 8 Pro computers in your company network. The computers are configured to allow remote connections. You attempt to create a Remote Desktop Connection to a computer named Computer1. You receive the following message:

```
\\\'Remote Desktop can\'t connect to the remote computer."
```

You are able to ping Computer1. You discover that Remote Desktop Firewall rules are not present on Computer1.

You need to connect to Computer1 by using Remote Desktop.

Which PowerShell commands should you run on Computer1?

- A. `New-NetFirewallRule -DisplayNameRdpTCPin -localPort 3389 -Protocol TCP`
- B. `Set-NetFirewallRule -Name RemoteSvcAdmin-In-TCP -Enabled True`
- C. `New-NetFirewallRule -DisplayNameRdpTCPout -localPort 3389 -Protocol TCP - Direction Out -Action Allow`
- D. `Set-NetFirewallRule -Name RemoteFwAdmin-In-TCP -Enabled True`

Correct Answer: A

QUESTION 4

A company has client computers that run Windows 8. The company implements the following security requirements:

?All client computers must use two-factor authentication.

?At least one authentication method must include more than four characters or gestures.

You need to choose authentication methods that comply with the security requirements.

Which two authentication methods should you choose? (Each correct answer presents part of the solution. Choose two.)

- A. PIN
- B. Biometric authentication
- C. Picture Password
- D. Microsoft Account

Correct Answer: BD

More than 4 characters are of course supported with the Microsoft Account. It is something the user knows. The picture password would be another thing the user knows (gestures).

So there's only MS Account and Biometric authentication left. Two-factor authentication requires the use of two of the three authentication factors:

Something the user knows (e.g., password, PIN); Something the user has (physical Object) (e.g., ATM card, smart card); and Something the user is (e.g., biometric characteristic, such as a fingerprint). The factors are identified in the

standards and regulations for access to U.S. Federal Government systems.

QUESTION 5

You use a computer that has Windows 7 Professional (32-bit) installed.

You need to migrate the computer to Windows 8.1 Pro (64-bit).

Which installation method should you use?

- A. Download and run Windows 7 Upgrade Advisor.
- B. Download and run Windows 8.1 Upgrade Assistant.
- C. Start Windows 8.1 custom installation from a DVD.
- D. Open Windows Anytime Upgrade.

Correct Answer: C
