QUESTION 1

A company has client Windows Vista and Windows 8.1.

You need to ensure that the client computers can share local resources.

Which two actions should you perform on the client computers? (Each correct answer presents part of the solution. Choose two.)

- A. Disable IPv6.
- B. Enable network discovery.
- C. Configure IPsec.
- D. Enable IPv6.
- E. Configure the Windows Firewall.

Correct Answer: BE

By changing your network location to Home or Work, network discovery is automatically turned on . You can also turn on these sharing options individually:

Network discovery File sharing (in Windows 7, this is automatically turned on when you share a file or folder) Public folder sharing

When you turn on these options, your computer can: Find other computers and devices on your home network and have other computers find your computer Share its files and folders Share its Public folders

QUESTION 2

A company has 100 client computers that run various editions of Windows 7. The company plans to upgrade or replace computers so that all client computers run an edition of Windows 8.1.

The company plans to use the following programs and features on the Windows 8 computers:

32-bit and 64-bit software

Desktop apps

Windows Media Player

Storage Spaces

You need to identify the installation or upgrade paths that support the programs and features.

Which three paths meet the requirements? (Each correct answer presents a complete solution. Choose three.)

- A. Purchase hardware with Windows RT pre-installed.
- B. Perform a clean installation of Windows RT.

- C. Perform a clean installation of Windows 8.1 Pro.
- D. Perform a clean installation of Windows 8.1.
- E. Upgrade from Windows 7 Enterprise to Windows 8.1 Enterprise.

Correct Answer: CDE

QUESTION 3

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows Vista and are members of the domain. A Group Policy object (GPO) configuring a software restriction policy is implemented in the domain to block a specific application.

You upgrade a computer to Windows 8 and implement a GPO that configures an AppLocker rule in the domain. The blocked application runs on the Windows 8 computer but not on the Windows Vista computers.

You need to ensure that the application is blocked from running on all computers and the AppLocker rule is applied to the computers in the domain.

What should you do?

- A. Add the blocked application as an additional AppLocker rule to the GPO that configures AppLocker.
- B. Run the Get-AppLockerPolicy Windows PowerShell cmdlet.
- C. Run the Set-ExecutionPolicy Windows PowerShell cmdlet.
- D. Configure the software restriction policy as a local policy on the Windows 8 computer.
- E. Add the blocked application as a software restriction policy to the GPO that configures AppLocker.

Correct Answer: A

QUESTION 4

A company has client computers that run Windows 8.

The client computers are connected to a corporate private network.

Users are currently unable to connect from their home computers to their work computers by using Remote Desktop.

You need to ensure that users can remotely connect to their office computers by using Remote Desktop. Users must not be able to access any other corporate network resource from their home computers.

Which setting should you configure on the home computers?

- A. Virtual Private Network connection
- B. Remote Desktop local resources

C. DirectAccess connection

D. Remote Desktop Gateway IP address

Correct Answer: A

DirectAccess is for Windows Server 2008/2012/Win 7 Ultimate/Enterprise/Win 8 Enterprise only RD Gateway setup is only for servers

Create VPN through manage networks. File --> Allow incoming connections. Connect through internet and create VPN which will allow one computer at a time to view the hosts resources, and only the hosts resources unlike standard VPNs.

QUESTION 5

A company has Windows 8.1 client computers.

One computer named Computer1 will be used to centralize event logs from other client computers. You configure a Group Policy Object (GPO) that pushes event logs to Computer1.

You need to configure Computer1 to receive the event logs.

What should you do?

A. Create a collector-initiated subscription.

B. Run the New-EventLogcmdlet.

C. Run the Get-EventLogcmdlet.

D. Create a source-computer-initiated subscription.

Correct Answer: A
