QUESTION 1

Your company has purchased a subscription to Windows Intune. You use Windows Intune to automatically deploy Windows updates.

You create an automatic approval rule in Windows Intune but notice that previously existing updates are not deployed.

You need to ensure that all previously existing updates are automatically approved.

What should you do?

- A. Create and deploy a policy that uses the recommended settings in the Windows Intune Center Settings template.
- B. Edit the schedule for the automatic approval rule.
- C. Create and deploy a custom policy in the Windows Intune Center Settings template.
- D. Run the approval rule.

Correct Answer: D

QUESTION 2

A company has an Active Directory Domain Services (AD DS) domain with Windows 8.1 client computers.

You need to configure 20 portable computers so that they sleep after 20 minutes when running on battery power. You must accomplish this goal by using the least amount of administrative effort.

Which two actions should you perform? (Each correct answer presents part of the complete solution.

Choose two.)

- A. Edit the local Group Policy to configure the Shut Down options.
- B. Create a Group Policy object (GPO) that configures the Sleep Management settings.
- C. Create a Group Policy object (GPO) that configures the Power Management settings.
- D. Link the Group Policy object (GPO) to the organizational unit containing the portable computers.
- E. Edit the local Group Policy to configure the Power Management settings.

Correct Answer: CD

Put the Laptops into an OU. Create an appropriate GPO. Link the GPO to the OU.

Note:

* Networking power management (not sleep management) refers to the set of features that you can configure to allow the computers in your network to save energy.

Incorrect:

Local Group Policy would have to be edited locally on each laptop.

QUESTION 3

Your company has a main office and a branch office. Each office contains several servers that run Windows Server 2012. You need to configure BranchCache for the client computers in the branch office. The solution must ensure that all of

the cached content is in a central location.

What should you run on each client computer?

- A. the winrm command
- B. the Enable BCHostedClient cmdlet
- C. the Enable-BCLocal cmdlet
- D. the netdom command

Correct Answer: B

QUESTION 4

At home, you use a desktop computer that runs Windows 8. At work, you use a laptop that runs Windows 8 and is connected to a corporate network. You use the same Microsoft account to log on to both computers.

You have a folder with some personal documents on your desktop computer.

The folder must be available and synced between both computers. You need to ensure that the latest version of these files is available.

What should you do?

- A. Create a folder by using SkyDrive for Windows. Move all of the personal documents to the new folder.
- B. Right-click the folder and select Share With, and then select Homegroup (view and edit).
- C. Install SkyDrive for Windows. In Windows Explorer, move the folder that contains the personal documents to the SkyDrive folder.
- D. Right-click the folder and click Include in library, and then click Documents.
- E. Move the folder to the Documents folder. Go to PC Settings. Under Sync your settings, enable Other windows settings.
- F. Move the folder to the Libraries folder. Go to PC Settings. Under Sync your settings, enable App settings.
- G. Move the folder to the Documents folder. Go to PC Settings. Under Homegroup, select Documents to be Shared.
- H. Right-click the folder and click Properties. Under Security, provide Full Control for the Microsoft account.

Correct Answer: A

If "Create a folder by using SkyDrive for Windows. Move all of the personal documents to the new folder." not a ineligible take this answer: Install SkyDrive for Windows. In Windows Explorer, move the folder that contains the personal documents to the SkyDrive folder.

QUESTION 5

A computer currently runs a 64-bit version of Windows 7 Enterprise.

You need to deploy a 64-bit version of Windows 8 Pro to the computer. The new deployment must not affect the Windows 7 installation on the computer.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

- Select the installation option to delete each partition on the hard drive.
- Start the computer from the Windows 8 installation media.
- Using Windows Explorer, run the setup program from the Windows 8 installation media.
- Select the **Custom** installation option.
- Select the **Upgrade** installation option.
- In Disk Management, shrink the current hard drive partition.

Correct Answer:

- | | |
|--|--|
| Select the installation option to delete each partition on the hard drive. | In Disk Management, shrink the current hard drive partition. |
| | Start the computer from the Windows 8 installation media. |
| Using Windows Explorer, run the setup program from the Windows 8 installation media. | Select the Custom installation option. |
| | |
| Select the Upgrade installation option. | |
