QUESTION 1

You have a Windows 8.1 Enterprise client computer named Computer1. The Storage Spaces settings of Computer1 are configured as shown in the following exhibit (Click the Exhibit button.)

You plan to create a three-way mirror storage space in the storage pool and to set the size of the storage space to 50 GB.

You need to identify the minimum number of disks that must be added to the storage pool for the planned mirror.

How many disks should you identify?

- A. 1
- B. 3
- C. 4
- D. 5

Correct Answer: B

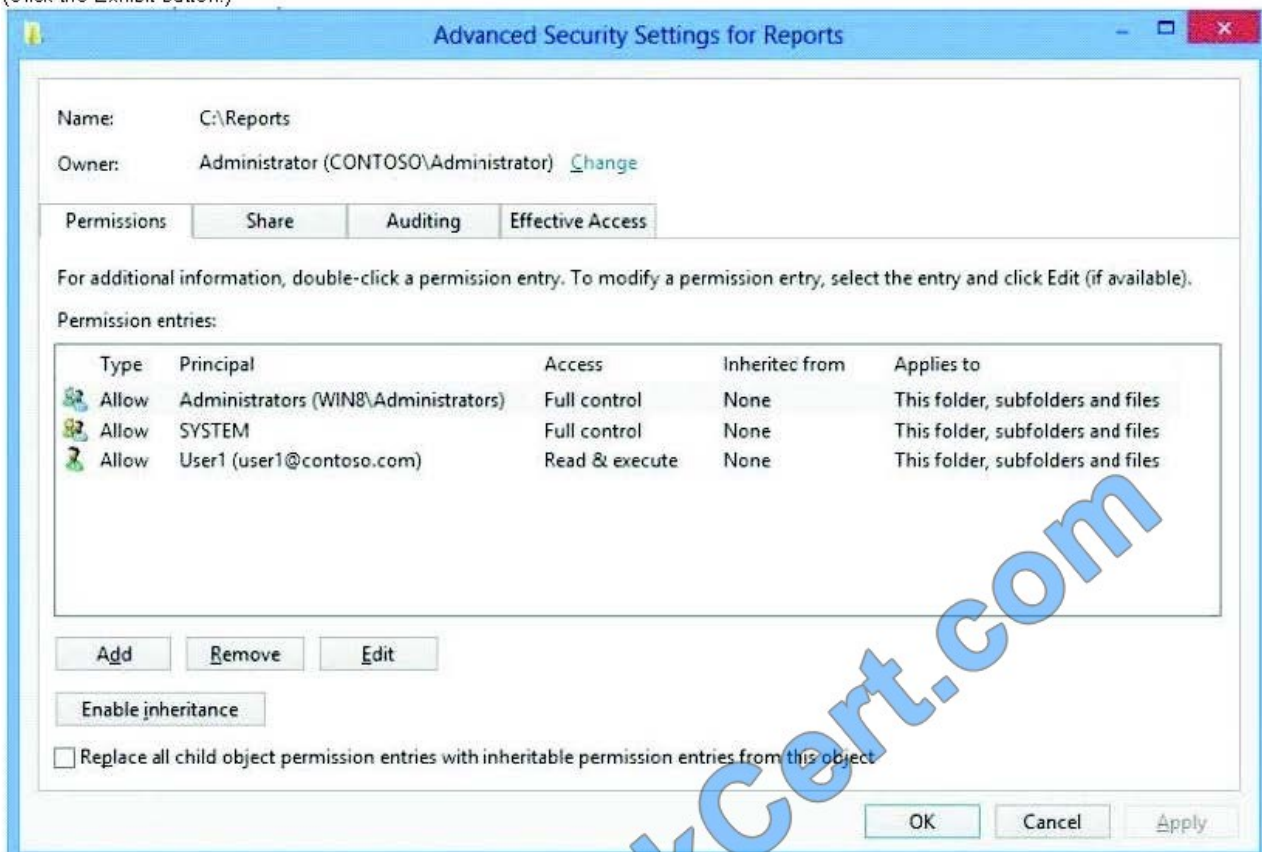

QUESTION 2

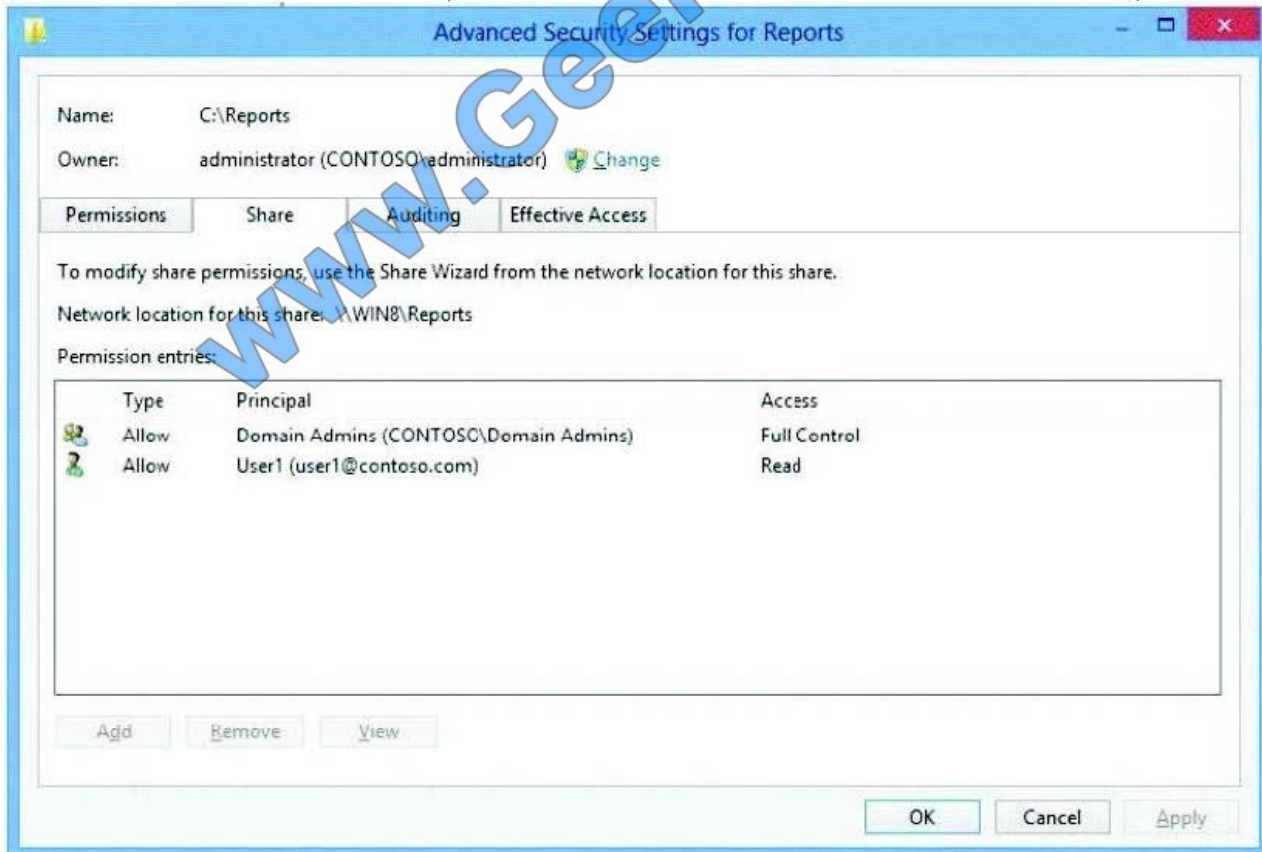

You support a desktop computer that runs Windows 8 Pro. The computer is joined to an Active Directory domain. The computer has a folder named C:\Reports. The folder NTFS permissions are shown in Exhibit 1.

(Click the Exhibit button.)

The folder is shared over the network with Read permission for a domain user account named User1 as shown in Exhibit 2. (Click the Exhibit button.)

(Click the Exhibit button.) The folder is shared over the network with Read permission for a domain user account named User1 as shown in Exhibit 2. (Click the Exhibit button.)

Members of the domain security group named Accountants must have access to the shared folder.

You need to assign the required permissions.

Which three actions should you perform in sequence? (To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Select and Place:

Answer Area

- Open the Sharing tab from the folder properties window.
- Open permission entry for User1.
- Add a condition for the Accountants group.
- Click the **Share...** button.
- Add the Accountants security group and grant it Read permission.
- Add a condition for a device group.
- Open advanced security settings for the folder.

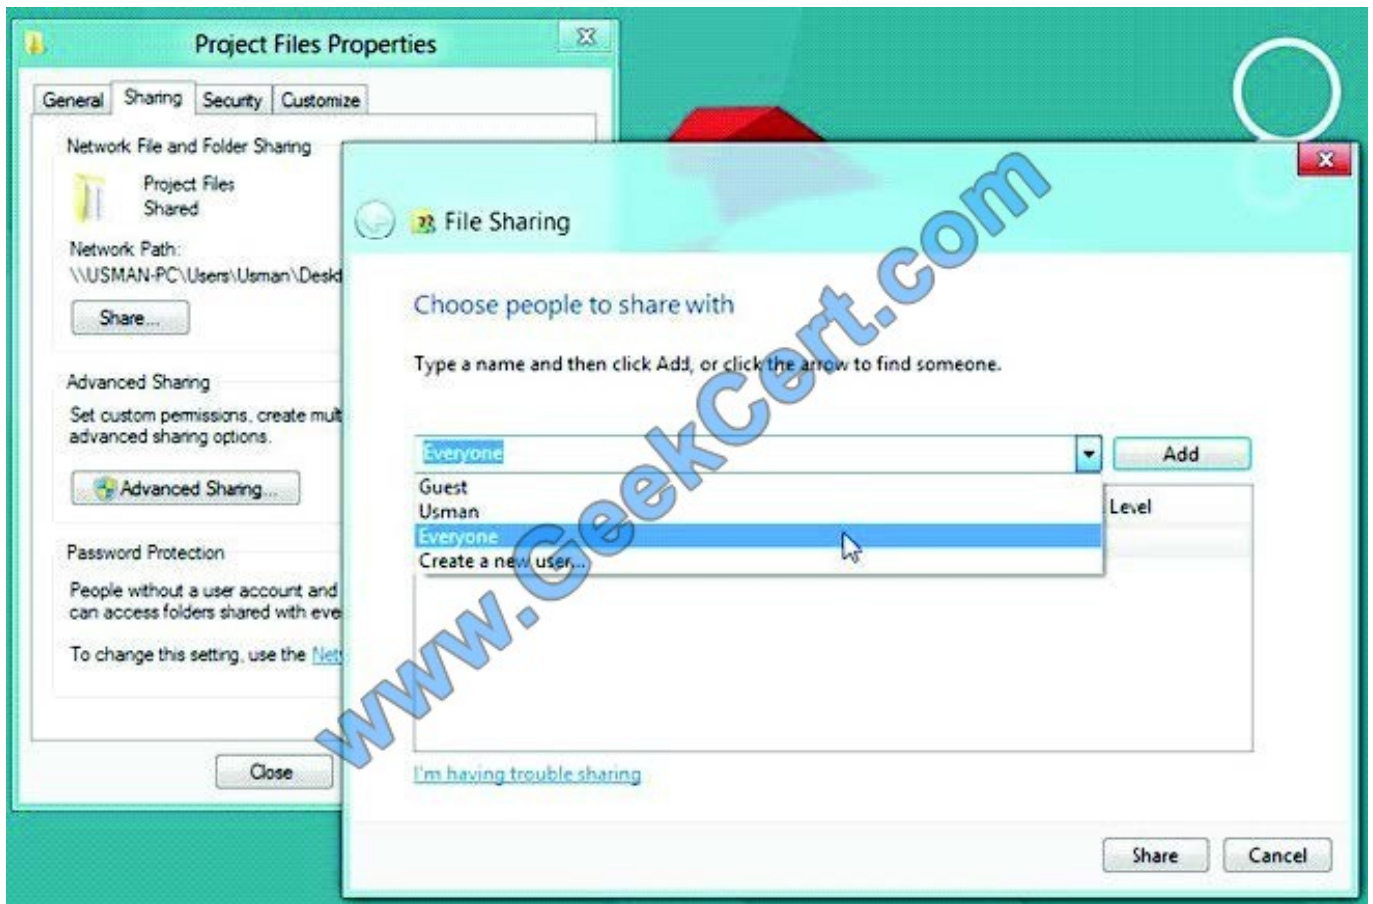

Correct Answer:

Answer Area

- Open the Sharing tab from the folder properties window.
- Click the **Share...** button.
- Add the Accountants security group and grant it Read permission.

- Open permission entry for User1.
- Add a condition for the Accountants group.
- Add a condition for a device group.
- Open advanced security settings for the folder.

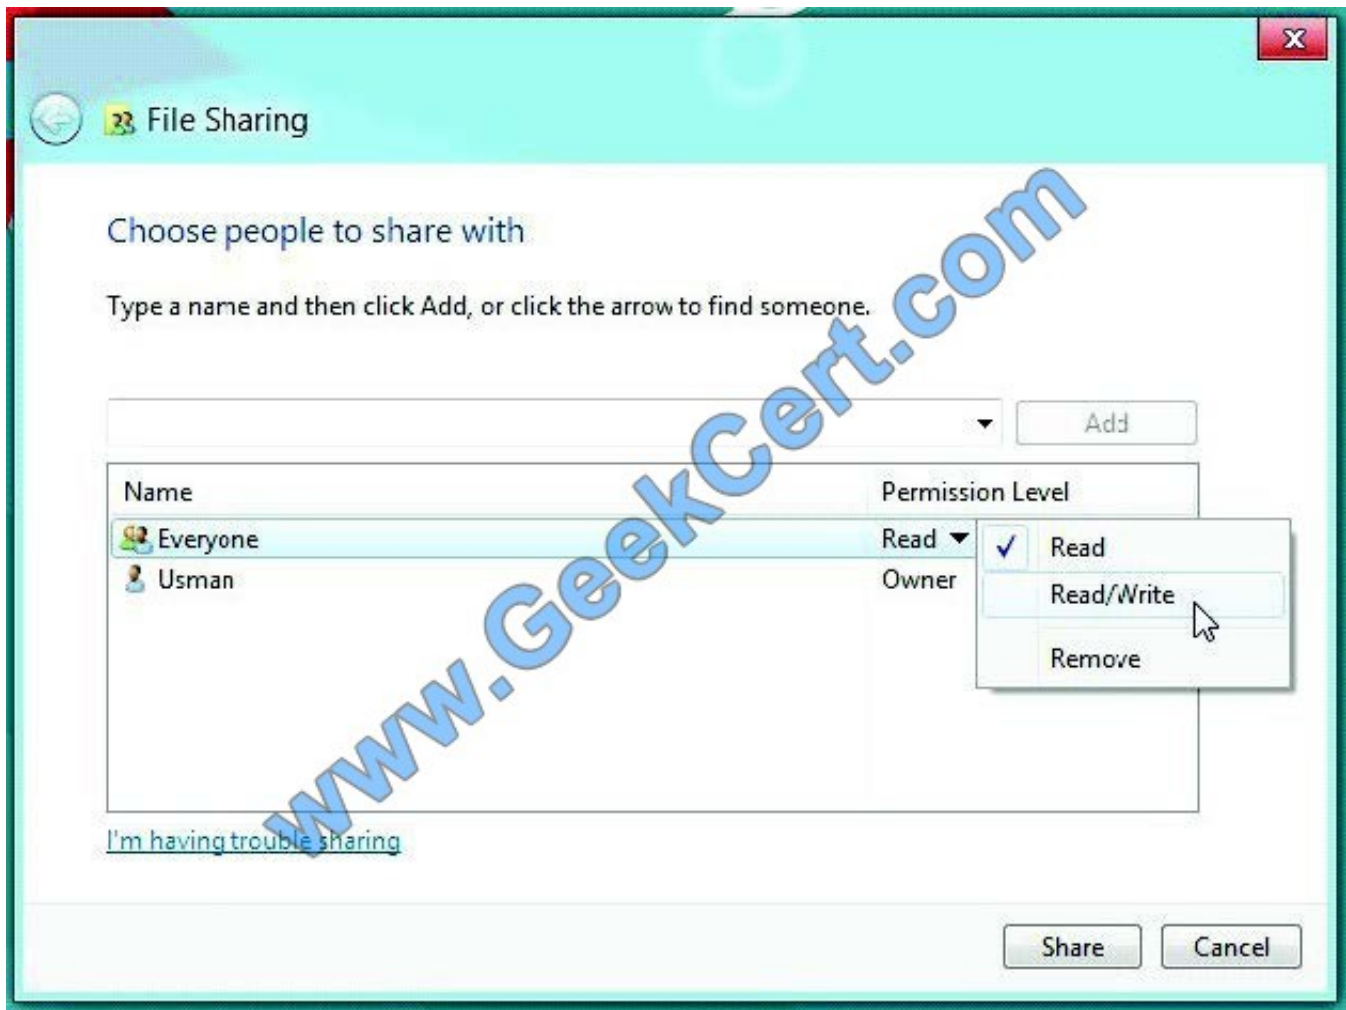

Share Folders From 'Users Profile' Locations and Local Drives If you want to quickly share a folder residing in local drives or User Profile folders, open Properties dialog from right-click context menu, and then head over to Sharing tab. From Network File and Folder Sharing section, click Share to open

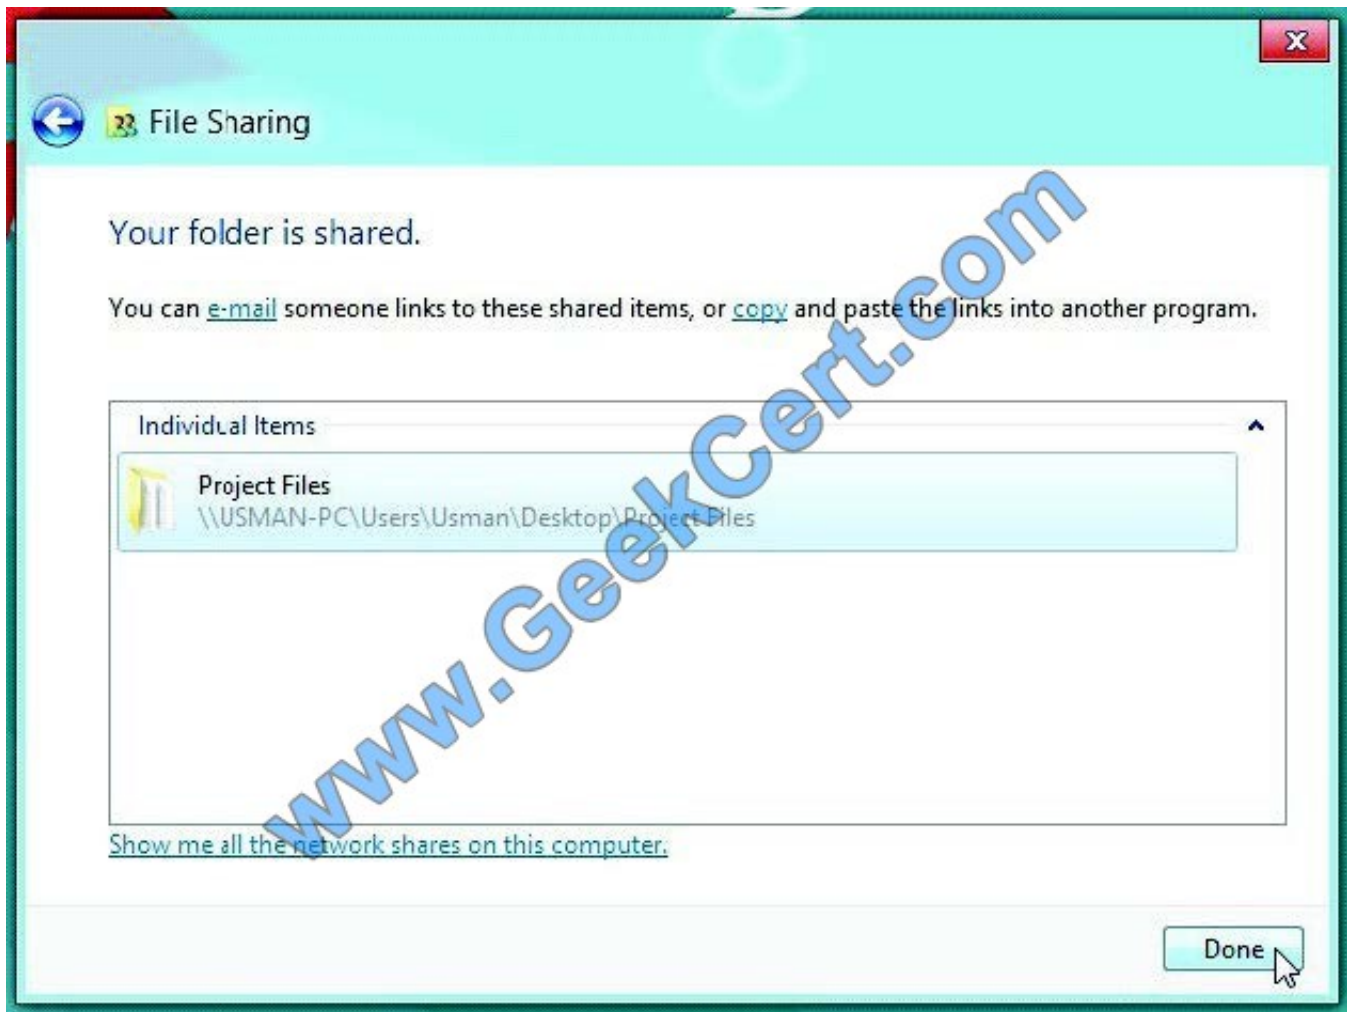

File Sharing dialog. Now, select Everyone from drop-down menu, and click Add.

This will add Everyone group in File Sharing list, and allow you to change folder access permission.

Using Read pull-down menu, you can give read and write permissions to users, and remove Everyone group from the File Sharing list.

Once done, click Share to share the folder on the network. It will open a separate dialog, allowing you to email and copy the shared folder link.

Now, you can access the shared folder from any PC connected on the network.

QUESTION 3

You have Windows 8.1 Pro client computers.

You need to recommend a solution to roll back the Windows Defender engine and the malware signature files on the computers. The solution must minimize administrative effort.

What should you include in the recommendation?

- A. the Program and Features Control Panel item
- B. the Reset your PC push-button reset feature
- C. System Restore points
- D. the Refresh your PC push-button reset feature

Correct Answer: C

Restore System to a Previous State Using Restore Point Restoring your Windows operating system to a previous state

is nothing new, but this feature can be very handy and time saving. For example, if you installed a new application or driver and your system starts to behave abnormally, or if your computer is infected by a virus from one unintentional mouse click on a link, wherever the case may be, you may want to go back to a previous state, say yesterday. You can refresh or reset your system, but system restore is your best bet for this kind of scenarios.

QUESTION 4

You have five client computers that are configured as shown in the following table.

Computer name	Operating system
Computer1	64-bit version of Windows XP Professional
Computer2	32-bit version of Windows 7 Professional
Computer3	64-bit version of Windows 7 Ultimate
Computer4	32-bit version of Windows 8.1 Pro
Computer5	64-bit version of Windows 7 Professional

You verify that each computer supports the installation of the 64-bit version of Windows 8.1 Pro.

You need to identify which method to use to deploy the 64-bit version of Windows 8.1 Pro to each computer. The solution must minimize the need to reinstall applications and to reconfigure settings.

In the table below, identify the correct deployment method for each computer. Make only one selection in each row. Each correct selection is worth one point.

Answer Area

Computer name	In-place upgrade	Clean installation
Computer1	<input type="radio"/>	<input type="radio"/>
Computer2	<input type="radio"/>	<input type="radio"/>
Computer3	<input type="radio"/>	<input type="radio"/>
Computer4	<input type="radio"/>	<input type="radio"/>
Computer5	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Computer name	In-place upgrade	Clean installation
Computer1	<input type="radio"/>	<input checked="" type="radio"/>
Computer2	<input type="radio"/>	<input checked="" type="radio"/>
Computer3	<input checked="" type="radio"/>	<input type="radio"/>
Computer4	<input type="radio"/>	<input checked="" type="radio"/>
Computer5	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 5

You are a Windows 8 user. Your organization has purchased an Office 365 subscription. You install Microsoft Lync and Microsoft Outlook on your computer.

You need to connect Office 365 to Lync and Outlook.

What should you do?

- A. Run the Windows Mail application. Add a new account by using your Office 365 credentials.
- B. Run the People application. Add a new account by using your Office 365 credentials.
- C. Run the Office Professional Plus setup from the Office 365 portal.
- D. Run the Office 365 desktop setup from the Office 365 portal.

Correct Answer: D

Set up your desktop for Office 365

Reference: <http://onlinehelp.microsoft.com/en-us/office365-enterprises/ff637594.aspx> When you have set up your desktop, you will be able to:

Install the complete suite of Microsoft Office 2010 desktop apps, if you have a Office Professional Plus subscription. Install Lync, your workplace connection for instant messaging and online meetings, including audio and video.

Use your user ID to sign in to Office 365 from your desktop applications.
