QUESTION 1

You manage computers that run Windows 8.1.

You plan to install a desktop app named App1 on one of the client computers.

You need to install the app without any user interaction and without displaying a progress bar.

Which command should you run?

- A. `msiexec /i appl.msi /qb`
- B. `msiexec /x appl.msi /qn`
- C. `msiexec /i appl.msi /qn`
- D. `msiexec /x appl.msi /qb`

Correct Answer: C

Explanation: [http://technet.microsoft.com/en-us/library/cc759262\(v=ws.10\).aspx](http://technet.microsoft.com/en-us/library/cc759262(v=ws.10).aspx)

Msiexec (command-line options)

Provides the means to install, modify, and perform operations on Windows Installer from the command line.

`/i` installs or configures a product

`/qn` displays no user interface

Further information:

`/x` uninstalls a product.

QUESTION 2

You are the PC Support Specialist for Contoso, Ltd. You are configuring Windows 8.1 so that you can create an image. An additional web browser is installed on the image.

You need to ensure that Internet Explorer 11 for the Desktop is the default web browser.

Which two actions should you perform? (Each correct answer presents a complete solution. Choose two.)

- A. Go to Programs and Features in Control Panel and set Internet Explorer as the default application.
- B. Tap the tile of another web browser on the Start Menu and tap the Unpin from start option.
- C. Under Set program access and computer defaults, select Default Programs, then choose Microsoft Windows.
- D. On the Security tab of Internet options, click Reset all zones to default level.
- E. In Default Programs, associate the .htm and .html files with Internet Explorer.

Correct Answer: CE

QUESTION 3

A company has an Active Directory Domain Services (AD DS) domain. All client computers run Windows 7. You plan to upgrade the client computers to Windows 8.1 Pro.

You need to choose the methods that do not require the manual entry of a product key during the upgrade.

Which two methods should you choose? (Each correct answer presents a complete solution. Choose two.)

A. Extract the contents of the Windows 8.1 .iso image file to a new shared folder and run the setup program from that folder.

B. Use the Microsoft Deployment Toolkit.

C. Use the Windows 8.1 online upgrade tool.

D. Use Group Policy to assign the Windows 8 installation file to the client computers.

Correct Answer: AB

QUESTION 4

Your network contains Windows 8.1 Enterprise client computers. The computers are members of an Active Directory domain.

Your company purchases a subscription to Windows Intune. Synchronization between Active Directory and Windows Intune is not configured.

You enroll all of the computers in Windows Intune.

You plan to create groups that contain the computers by using dynamic membership.

You need to identify which criteria you can use to populate the groups dynamically.

Which three criteria should you identify? (Each correct answer presents a complete solution. Choose three.)

A. organizational unit (OU)

B. manager

C. security group

D. device type

E. domain

Correct Answer: ABC

Explanation: Windows Intune Dynamic membership query criteria include:

Security group

Manager

Organizational unit (OU)

Note:

*

A group can have direct members (static membership), dynamic query-based members, or both. When you create a dynamic membership query, you define the criteria that determines the query that Windows Intune runs to retrieve the list of group members. The group is automatically updated with members that meet the criteria whenever changes occur. You can also create groups that have static membership lists. These are groups that you manually define by explicitly adding members.

*

Windows Intune is a Microsoft cloud-based management solution. Intune is primarily aimed at small and medium enterprises and service providers who want to manage up to 500 Microsoft Windows computers. Distribution is through a subscription system in which a fixed monthly cost is incurred per PC. The minimum subscription duration is one year. Included in the package is the Windows operating system, currently Windows 8 Enterprise.

QUESTION 5

A company has client computers that run Windows 7. Each employee has two client computers: one at work and one at home.

The company plans to deploy Windows 8.1 to all client computers.

You are planning a deployment strategy.

You have the following requirements:

Minimize deployment time.

Ensure that the PC Reset and PC Refresh features can be utilized on all work computers.

You need to plan a deployment strategy that meets the requirements.

What should you do? (To answer, drag the appropriate installation method or methods to the correct location or locations in the answer area. Methods may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Select and Place:

Installation Methods

Install Windows 8.1 directly on the client computer.

Start the client computer from a USB flash drive on which you have installed Windows 8.1.

Start the client computer from a USB flash drive on which you have installed Windows To Go.

Start the client computer from a OneDrive location on which you have installed Windows 8.1.

Answer Area

Computer	Method
Work computer	Installation Method
Home computer	Installation Method

Correct Answer:

Installation Methods

Start the client computer from a USB flash drive on which you have installed Windows 8.1.

Start the client computer from a OneDrive location on which you have installed Windows 8.1.

Answer Area

Computer	Method
Work computer	Install Windows 8.1 directly on the client computer.
Home computer	Start the client computer from a USB flash drive on which you have installed Windows To Go.
